The Wisdom Of The Bones In Search Of Human Origins:

The Wisdom of the Bones Alan Walker, Pat Shipman, 1997-09-02 Fascinating As engaging an explanation of how scientists study fossil bones as any I have ever read John R Alden Philadelphia Inquirer In 1984 a team of paleoanthropologists on a dig in northern Kenya found something extraordinary a nearly complete skeleton of Homo erectus a creature that lived 1.5 million years ago and is widely thought to be the missing link between apes and humans The remains belonged to a tall rangy adolescent male The researchers called him Nariokotome boy In this immensely lively book Alan Walker one of the lead researchers and his wife and fellow scientist Pat Shipman tell the story of that epochal find and reveal what it tells us about our earliest ancestors We learn that Nariokotome boy was a highly social predator who walked upright but lacked the capacity for speech In leading us to these conclusions The Wisdom of the Bones also offers an engaging chronicle of the hundred year long search for a missing link a saga of folly heroic dedication and inspired science Brilliantly captures an intellectual odyssey One of the finest examples of a practicing scientist writing for a popular audience Portland Oregonian A vivid insider's perspective on the global efforts to document our own ancestry Richard E Leakey

The Wisdom of Bones Alan Walker, Pat Shipman, 1996 A groundbreaking book concerning the excavation of Nariokotome Boy which asserts among other things that Homo Erectus lacked language [The Story of Life in 25 Fossils](#) Donald R. Prothero, 2015-08-25 Every fossil tells a story Best selling paleontology author Donald R Prothero describes twenty five famous beautifully preserved fossils in a gripping scientific history of life on Earth Recounting the adventures behind the discovery of these objects and fully interpreting their significance within the larger fossil record Prothero creates a riveting history of life on our planet The twenty five fossils portrayed in this book catch animals in their evolutionary splendor as they transition from one kind of organism to another We witness extinct plants and animals of microscopic and immense size and thrilling diversity We learn about fantastic land and sea creatures that have no match in nature today Along the way we encounter such fascinating fossils as the earliest trilobite Olenellus the giant shark Carcharocles the fishibian Tiktaalik the Frogamander and the Turtle on the Half Shell enormous marine reptiles and the biggest dinosaurs known the first bird Archaeopteryx the walking whale Ambulocetus the gigantic hornless rhinoceros Paraceratherium the largest land mammal that ever lived and the Australopithecus nicknamed Lucy the oldest human skeleton We meet the scientists and adventurers who pioneered paleontology and learn about the larger intellectual and social contexts in which their discoveries were made Finally we find out where to see these splendid fossils in the world's great museums Ideal for all who love prehistoric landscapes and delight in the history of science this book makes a treasured addition to any bookshelf stoking curiosity in the evolution of life on Earth **The World from Beginnings to 4000 BCE** Ian Tattersall, 2008-02 In this lively and readable introduction renowned anthropologist Ian Tattersall thoroughly examines both fossil and archaeological records to trace human evolution from the earliest beginnings of our zoological family Hominidae through the appearance of Homo sapiens to
