Berube, 2010-06-01 American science education is in trouble As the United States continues to lag behind other nations in science achievement the question is asked how can we better get our students excited and inspired by science This is the science teacher's duty The irony of the education profession is that some of the most important aspects of it are the hardest to measure and replicate The things that matter most can be the hardest to quantify Some teachers can know the different learning styles intelligences and brain preferences of their students They can know best practices of how to deliver instruction They can do all these things and more but still not convey imagination and passion for science to their students But some science teachers do inspire These special teachers seem to possess something the others don't but what is it Exceptional science teachers make us feel better about ourselves through their teaching of science and bring us to a higher quality of life as a result while some science teachers can be the leading researchers in their fields yet leave us flat What is the recipe for this unique special teacher And why is it so hard to explain and describe The objective of this book is to uncover these aspects of teaching that are so hard to measure and quantify This is achieved through interviewing people who are either current or retired teachers or who were positively affected by a teacher and also through case studies of exceptional teachers in order to quantify and explain the exact traits and personality quirks of these exceptional people The contribution to the field of education this book hopes to achieve is the examination of the question why do some teachers have that X factor what exactly is it and how can we all have it **Intro to Astronomy Parent Lesson Plan**, 2013-10-01 This Intro to Astronomy Curriculum Guide contains materials for use with The Stargazer's Guide to the Night Sky Lesson Planner Weekly Lesson Schedule Student Worksheets Quizzes Test Answer Key 7th 9th grade 1 Year Science 1 2 Credit Features Each suggested weekly schedule has three easy to manage lessons which combine reading worksheets and
