Guide to Volumetric Diet Vincent Bronson, 2020-11-28 Volumetrics is not a new diet but it has stood the test of time Many people use it to lose weight and keep the pounds off for good The diet is based on the premise that it's the volume of food eaten rather than the number of calories consumed which leads to weight loss When we eat more food we experience a sense of satiety or fullness The premise of this diet is simple Eat lots of high water volume foods to help fill you up and shed pounds Nutrition experts agree this is a smart choice as you'll increase nutrient dense choices like vegetables and fruits while naturally consuming fewer calories On the Volumetrics diet you eat low calorie foods that fill you up which helps you lose weight without feeling like you're on a diet The plan is designed so that you don't feel hungry or deprived You will also learn about calorie density on this plan Foods recommended on the Volumetrics diet have a low energy density so they are more filling for fewer calories Foods that you should limit on the Volumetrics diet are energy dense meaning even if they have a lot of calories you need to eat more of them to feel full To follow the plan you will eat low calorie high volume foods that contain either a lot of water or a lot of diet friendly fiber Water and fiber both increase the sense of satisfaction or satiety No food is completely banned on the Volumetrics eating plan You can enjoy foods that are considered to be calorie dense like chocolate as long as it's a treat and as long as you stay within your daily caloric recommendations The recommended lifestyle changes that lead to long term weight management include keeping an exercise and food journal and planning ahead for social situations that may throw you a curveball such as parties They also recommend that you get at least 30 minutes of exercise on most days of the week In addition they suggest you weigh in no more than once a week during the weight loss phase
