The Trouble With Testosterone By Sapolsky Robert M 1998:

The Trouble With Testosterone Robert M. Sapolsky, 2012-10-16 Finalist for the Los Angeles Times Book Prize From the man who Oliver Sacks hailed as one of the best scientist writers of our time a collection of sharply observed uproariously funny essays on the biology of human culture and behavior In the tradition of Stephen Jay Gould and Oliver Sacks Robert Sapolsky offers a sparkling and erudite collection of essays about science the world and our relation to both *The Trouble with Testosterone* explores the influence of that notorious hormone on male aggression *Curious George's Pharmacy* reexamines recent exciting claims that wild primates know how to medicate themselves with forest plants *Junk Food Monkeys* relates the adventures of a troop of baboons who stumble upon a tourist garbage dump And *Circling the Blanket for God* examines the neurobiological roots underlying religious belief Drawing on his career as an evolutionary biologist and neurobiologist Robert Sapolsky writes about the natural world vividly and insightfully With candor humor and rich observations these essays marry cutting edge science with humanity illuminating the interconnectedness of the world's inhabitants with skill and flair

T: The Story of Testosterone, the Hormone that Dominates and Divides Us Carole Hooven, 2021-07-13 Through riveting personal stories and the latest research Harvard evolutionary biologist Carole Hooven shows how testosterone drives the behavior of the sexes apart and how understanding the science behind this hormone is empowering for all Since antiquity from the eunuchs in the royal courts of ancient China to the booming market for elixirs of youth in nineteenth century Europe humans have understood that typically masculine behavior depends on testicles the main source of testosterone in males Which sex has the highest rates of physical violence hunger for status and desire for a high number of sex partners Just follow the testosterone Although we humans can study and reflect on our own behavior we are also animals the products of millions of years of evolution Fascinating research on creatures from chimpanzees to spiny lizards shows how high testosterone helps males out reproduce their competitors And men are no exception While most people agree that sex differences in human behavior exist they disagree about the reasons But the science is clear testosterone is a potent force in human society driving the bodies and behavior of the sexes apart But as Hooven shows in *T* it does so in concert with genes and culture to produce a vast variety of male and female behavior And crucially the fact that many sex differences are grounded in biology provides no support for restrictive gender norms or patriarchal values In understanding testosterone we better understand ourselves and one another and how we might build a fairer safer society

In Search of Human Nature Mary E. Clark, 2005-08-18 In this magisterial new work biologist Mary Clark argues that the Western view of human nature is built around highly atomistic and ideological framework that encourages us to think about the world and ourselves in the wrong way
