The Territorial Cohesion In Europe:

The Territorial Cohesion in Europe ,2010 Uncovering the Territorial Dimension of European Union Cohesion Policy
Eduardo Medeiros,2017-07-14 This book examines the territorial dimension of EU Cohesion Policy specifically assessing territorial impacts at the various spatial levels engaging theoretically and empirically with the notion and role of the territorial dimension within a strongly fragmented EU policymaking process *Services of General Interest and Territorial Cohesion* Heinz Faßmann,Daniel Rauhut,Eduarda Marques da Costa,Alois Humer,2015-10-28 European societies and economies continue to rely on Services of General Interest SGI to produce legitimacy Fair access to basic services such as transport energy and communication infrastructures education and health care is regarded as a cornerstone of the European Model of Society as a way to promote Territorial Cohesion and lastly as a right held by every EU citizen These collective regional and individual perspectives on Services of General Interest are in the focus of this edited volume In the light of postmodern societies demographic aging migratory patterns globalization and economic crises territorially sensitive challenges arise and targeted solutions are needed accordingly From Territorial Cohesion to the New Regionalized Europe Luisa Pedrazzini,Renata Satiko Akiyama,2011 **The Process of Territorial Cohesion in Europe** Luisa Pedrazzini,2006 **Territorial Cohesion** Dietmar Scholich,2009-11-04 Preface Introduction 1 Dietmar Scholich The various regions within the European Union are marked by a high degree of disparity with regard to economic performance and productivity and with respect to their labour markets The intention underlying the EU s concept of territorial cohesion is to reduce these differences and imbalances and at the same time to ensure more balanced spatial development throughout the EU Territorial cohesion for which the German language uses two slightly different terms territoriale Koh sion and territorialer Zusammenhalt has to be seen as a general term encompassing a number of different components In addition to redressing disparities and spatial imbalances this concept aims to improve territorial integration and to promote co operation among EU regions In striving to bring about territorial cohesion due account must be taken of the diversity of the European continent and consideration should be given to the advantages and disadvantages each area exhibits Among the special challenges to be faced are the concentration of population and economic activity in what has come to be known as the Pentagon the process of EU enlargement and the severe imbalances which exist between the major centres of population and other parts of the EU territory Against this background it was only right and proper that territorial cohesion should be included in the draft of the Treaty establishing a Constitution for Europe Article I 3 which lists economic social and territorial cohesion as being among the Union s objectives *Territorial Cohesion in Europe* Committee of the Regions,2003 EU common regional policy seeks to reduce regional disparities and prevent further social and economic imbalances by transferring Community resources to regions undergoing problems using the Structural Funds This study seeks to provide technical advice to the Committee of the Regions on this matter based on a literature review of regional development issues

and on official EU documents such as periodic reports statistical yearbooks and cohesion reports It examines the major socio economic challenges to regional cohesion in the EU 15 considers the impact of enlargement and makes recommendations for a more balanced regional development policy *Territorial Cohesion and the European Model of Society* Andreas Faludi,2007 In this second book in a series on European spatial planning the authors examine territorial cohesion as a successor concept to the European Spatial Development Perspective Fundamental ideas about Europe and its distinct model of society lie behind the concept of territorial cohesion which can be understood as a goal of spatial equity that tends to favor development in place over selective migration to locations of greater opportunity This approach contrasts with an American social model that views the equity principle behind territorial cohesion to be diametrically opposed to the efficiency principle based on free mobility of labor Territorial Development, Cohesion and Spatial Planning Neil Adams,Giancarlo Cotella,Richard Nunes,2011 This study examines some of the evolving challenges faced by EU regional policy in light of enlargement and assesses some of the approaches and trends in terms of territorial development policy and practice The chapters reflect on the diversity of approaches to spatial planning and the politics of policy formation *EU Cohesion Policy and Spatial Governance* Rauhut, Daniel,Sielker, Franziska,Humer, Alois,2021-07-31 Discussing the ongoing and future challenges of EU Cohesion Policy this book critically addresses the economic social and territorial challenges at the heart of the EU s policy It identifies the multifaceted and dynamic nature of the policy as well as the cohesions goal interlinkage with other policies and considers unresolved questions of strategic importance in territorial governance urban and regional inequalities and social aspects and wellbeing **Territorial Cohesion** Eduardo Medeiros,2018-12-14 This book offers a comprehensive overview of several urban related aspects that are of central importance to successful territorial cohesion processes In essence it sheds new light on issues concerning urban polycentrism functional urban regions integrated sustainable urban development and the EU Urban Agenda and on how they can help to achieve territorial cohesion policy goals As an elusive and fairly recent concept territorial cohesion has to date only been vaguely debated in the available literature which for the most part focuses on its historical origins and its relevance for EU policymaking Instead this book synthesizes for the first time a range of perspectives that place urban elements and policies at the core of territorial cohesion analysis As such and given the fact that territorial cohesion is a holistic concept the book will appeal to a broad readership from both the academic and policymaking arenas Territorial Cohesion in Rural Europe Andrew K. Copus,Philomena de Lima,2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the concepts we use to understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy Demographic

change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy

Cohesion in Europe Towards 2050 Lewis Dijkstra,2022 *Spatial Planning and the European Union* Eva Purkarthofer,2024-07-19 European Union policies are intertwined with all sectors of public administration and governance in the member states including spatial urban and regional planning Legal regulations like the Natura 2000 Directives funding programmes associated with EU Cohesion Policy or strategies such as the Territorial Agenda 2030 all leave their mark on planning yet with considerably different effects in Europe s cities and regions This book serves as a guide to navigate the connection points between EU policies and spatial planning by introducing the logics of EU policymaking and European spatial planning outlining the most important EU policies with relevance for spatial planning and presenting examples from Austria and Finland of how EU policies are applied in domestic contexts By exploring the Europeanisation of spatial planning from within the book acknowledges how differential ideas about what spatial planning is and what role the EU plays therein shape the actualised impacts of EU policies By providing a comprehensive perspective on the relevance of the European Union for spatial planning this book is ideal for students academics and administrators who want to grasp how the EU shapes and affects planning practice in Europe s cities and regions

Territorial Cohesion of What and Why? The Challenge of Spatial Justice for EU's Cohesion Policy Mikko Weckroth,Sami Moisio,2020 Abstract Over the past two decades both academics and policy makers have discussed the meaning of territorial cohesion in the context of the European Union EU This debate on the meaning and content of territorial cohesion is becoming increasingly important in a Europe that is facing multiple crises This article contributes to the literature on EU s territorial cohesion policies by tracing the ways in which territorial cohesion has been defined framed and justified as an EU policy We analyse public speeches made by the acting commissioners for Regional Policy and inquire into the Cohesion Reports from 2004 to 2017 produced by the European Commission In particular we interrogate both the meaning of the concept of territorial cohesion and the justifications for pursuing territorial cohesion We conclude with some critical remarks on the relevance of economic production based definitions and justifications for territorial cohesion policies Accordingly we argue that treating macroecon

elements of cultural and planning theories to explain differences and peculiarities among EU member states and develops an analytical model which encourages a scientific approach

Neighbourhood Policy and the Construction of the European External Borders Filippo Celata, Raffaella Coletti, 2015-06-11 This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries. By bringing together the perspectives of critical geopolitics, policy studies and border studies, it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers. Is the EU committed to promoting integration in a wider European space or is a fortress Europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders? The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure, inclusion and exclusion, cooperation and securitisation. The European Neighbourhood Policy is a controversial strategy where regionalization and bordering, homogenisations and differentiations, centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective, mobile and fragmented border. A specific focus is devoted to the diversity of geo-strategies the EU is pursuing in its neighbouring countries and regions, macro-regional strategies and cross-border cooperation initiatives as new scales of cooperation and the role of other global players.

The Institutionalisation of European Spatial Planning Bas Waterhout, 2008 Intends to clarify the enterprise of European spatial planning. This book places emphasis on the need for a understanding of the process of European integration in general. It points at the middle-range theories that used concepts that were showing similarity to those that academics were accustomed to such as networks, discourses and governance.
