The Upside Of Down Catastrophe Creativity And The Renewal Of Civilization

Marcel A. Müller

The Upside Of Down Catastrophe Creativity And The Renewal Of Civilization:

The Upside of Down Thomas Homer-Dixon, 2010-04-16 Environmental disasters Terrorist wars Energy scarcity Is this the world's fate a downward spiral that ultimately spells the collapse of society Perhaps says acclaimed author Thomas Homer Dixon or perhaps these crises can actually lead to renewal for ourselves and planet earth *The Upside of Down* takes the reader on a mind stretching tour of societies management or mismanagement of disasters over time From the demise of ancient Rome to contemporary climate change this spellbinding book analyzes what happens when multiple crises compound to cause what the author calls synchronous failure But crisis doesn't have to mean total calamity Through catagenesis or creative bold reform in the wake of breakdown it is possible to reinvent our future Drawing on the worlds of archeology poetry politics science and economics *The Upside of Down* is certain to provoke controversy and stir imaginations across the globe The author's wide ranging expertise makes his insights and proposals particularly acute as people of all nations try to grapple with how we can survive tomorrow's inevitable shocks to our global system There is no guarantee of success but there are ways to begin thinking about a better world and *The Upside of Down* is the ideal place to start thinking

The Upside of Down Thomas F. Homer-Dixon, Thomas Homer-Dixon, 2007 Today's converging energy environmental economic political stresses could case a breakdown of national global order In this book Thomas Homer Dixon shows how to choose a better route into the future Drawing on an array of disciplines Homer Dixon's acute insights are imaginative controversial

The Little Big Number Dirk Philipsen, 2015-05-26 The story of GDP and why we need a better measurement of growth In one lifetime GDP or Gross Domestic Product has ballooned from a narrow economic tool into a global article of faith As *The Little Big Number* demonstrates this spells trouble While economies and cultures measure their performance by it GDP only measures output It ignores central facts such as quality costs or purpose Sustainability and quality of life are overlooked Losses don't count The world can no longer afford GDP rule GDP ignores real development Dirk Philipsen demonstrates how the history of GDP reveals unique opportunities to fashion smarter goals and measures *The Little Big Number* explores a possible roadmap for a future that advances quality of life rather than indiscriminate growth

The Great Awakening Anna Grear, 2020 As we enter a time of climate catastrophe worsening inequality and collapsing market state systems can human societies transcend the old dysfunctional paradigms and build the world anew There are many signs of hope In *The Great Awakening* twelve cutting edge activists scholars and change makers probe the deep roots of our current predicament while reflecting on the social DNA for a post capitalist future We learn about seed sharing in agriculture blockchain technologies for networked collaboration cosmological peer production of houses and vehicles creative hacks on law and new ways of thinking and enacting a rich collaborative future This surge of creativity is propelled by the social practices of commoning new modes of life for creating and sharing wealth in fair minded ecologically respectful ways It is clear that the multiple entangled crises produced by neoliberal capitalism cannot be resolved by existing political and legal institutions

which are imploding under the weight of their own contradictions Present and future needs can be met by systems that go beyond the market and state With experiments and struggle a growing pluriverse of commoners from Europe and the US to the Global South and cyberspace are demonstrating some fundamentally new ways of thinking being and acting This ontological shift of perspective is making new worlds possible

Children and their Urban Environment Claire

Freeman,Paul Tranter,2012-10-02 In our fast changing urban world the impacts of social and environmental change on children are often overlooked Children and their Urban Environment examines these impacts in detail looking at the key activities spaces and experiences children have and how these can be managed to ensure that children benefit from change The authors highlight the importance of planners architects and housing professionals in creating positive environments for children and involving them in the planning process They argue that children s lives are becoming simultaneously both richer and more deprived and that despite apparently increasing wealth disparities between children are increasing further Each chapter includes international examples of good practice and policy innovations for redressing the balance in favour of child supportive environments The book seeks to embrace childhood as a time of freedom social engagement and environmental adventure and to encourage creation of environments that better meet the needs of children The authors argue that in doing so we will build more sustainable neighbourhoods cities and societies for the future

Manufacturing Green Prosperity

Jon Rynn,2010-07-12 This timely set of solutions based on a new theory of economics shows how America can reverse its inexorable economic decline and stop the bleeding of its middle class by rebuilding its manufacturing sector on a green basis Manufacturing Green Prosperity The Power to Rebuild the American Middle Class connects two critical issues the importance of manufacturing to the growth and fair distribution of national wealth and the need to create an environmentally sustainable society In so doing the book offers groundbreaking arguments demonstrating the centrality of manufacturing and shows ways in which creating a green economy will rebuild U S manufacturing and expand the middle class Drawing from the fields of political science economics ecology history engineering and philosophy the author challenges existing myths about manufacturing exposes the weaknesses of neoclassical economics and proposes a production centered alternative America he persuasively argues needs a sophisticated green manufacturing base in order to create an entirely new transportation and energy infrastructure one that will make cities ecologically sustainable prevent the worst effects of global warming protect vulnerable ecosystems and counter the depletion of oil coal and other critical natural resources

Standards, Emergence, and Complex Outcomes D. Linda Garcia,2025-07-16 Standards Emergence and Complex

Outcomes redefines how we think about standards framing them as interfaces that govern interactions and connect causes to their effects Expanding beyond traditional technical and geopolitical discussions Garcia introduces a fresh theoretical perspective that positions standards as central to understanding complexity From food safety and workplace regulations to standardized parts in manufacturing and our reliance on technology standards shape nearly every aspect of modern life By

proposing a multidimensional approach Garcia argues that standards are the mechanisms driving change complexity is the backdrop for this change emergence is the process by which change unfolds and evolution is its ultimate outcome Each chapter explores key elements of complexity theory and supports them with compelling historical and empirical examples providing a richly detailed narrative that deepens understanding This book is an essential resource for academics and students across the social sciences policymakers shaping standards dependent fields and professionals in industries where standards dictate progress Whether you re exploring the intersections of technology governance and complexity or looking to better navigate the systems shaping our world this book offers vital insights into the pivotal role of standards in our increasingly interconnected society

The Axial Age and Its Consequences Robert N. Bellah,Hans Joas,2012-10-31 This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce From Axial Age thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter A variety of utopian visions emerged and led to both reform and repression

Analyzing Collapse Miroslav Bárta,2019-08-27 This book explores the long term trends in the development of what was the first complex civilization in history the Old Kingdom of Egypt c 2650 2200 BC the period that saw the construction of eternal monuments such as Djoser s Step Pyramid complex in Saqqara the pyramids of the great Fourth Dynasty kings in Giza and spectacular tombs of high officials throughout Egypt The present study aims to show that the historical trajectory of the period was marked by specific processes that characterize most of the world s civilizations the role of the ruling elite the growth of bureaucracy the proliferation of interest groups and adaptation to climate change to name but a few and the way that these processes held the germ of ultimate collapse The case is made that the rise and fall of the Old Kingdom state is of relevance to the study of the anatomy of development of any complex civilization

The Virtuous Consumer Leslie Garrett,2011-02-09 Sure there are people who chain themselves to old growth trees raise their one child diaper free and make their own soap The Virtuous Consumer is for the rest of us struggling to make choices that are better for the planet and for us Leslie Garrett has created a comprehensive reference guide that like a smart funny and eco conscious friend will steer you toward ethical purchases for everything from lipstick to cars kids toys to a new mattress The Virtuous Consumer is your key to shopping consciously and creating a simpler greener lifestyle

The Tierra Solution Frans C. Verhagen,2012-05-01 A visionary and immensely practical approach to reforming today s bubble finance and taming its global casino Verhagen illuminates the win win solutions possible when we combine monetary transformation with low carbon renewable resource strategies and equitable approaches to sustainable development Hazel Henderson President of Ethical Markets Media author and creator of The Green Transition Scoreboard As climate change continues to threaten the earth and as the global financial crisis lingers governments and communities need to take charge of their own and global monetary systems Sustainability sociologist Frans Verhagen proposes a solution the Tierra Solution to repair the present global monetary financial and

economic systems that enrich the few impoverish the many and imperil the planet Verhagen calls for transformational changes in order to advance climate resilient economic development The Tierra Solution proposes A credit based financial system governed by a Global Central Bank A banking system without the privilege of money creation and most importantly A carbon standard for the international monetary system with the Tierra as the unit of account The Tierra Solution is an in depth and thought provoking read that shows an innovative path for global citizens who want to combat climate change the economic crisis and poverty and for public officials economists international development experts and climate scientists who want to be part of an integrated solution to the dual challenges of climate change and financial crises Whether you agree or disagree The Tierra Solution challenges us with an innovative proposal No tinkering here Verhagen is out to lay a new foundation for environmental and climate justice with an overhaul of the international monetary system that builds the cost of environmental degradation into economic calculations Rev Arthur Simon President Emeritus and founder of Bread for the World This plan for a carbon based international monetary standard that addresses both climate change and global economic inequities is bold visionary and truly transformative It is a must read for everyone who cares about the fate of the earth Sheila D Collins Professor of Political Science Emerita William Paterson University FRANS C VERHAGEN is a sustainability sociologist with a Ph D in the sociology of international development from Columbia University He founded the Queens Green Party the Riverside Church Ecology Task Force and the Ecolinguistics Commission He has worked around the world and online teaching environmental policies and sustainability

Social Resilience in the Neoliberal Era Peter A. Hall, Mich Le Lamont, 2013-04-22 What is the impact of three decades of neoliberal narratives and policies on communities and individual lives What are the sources of social resilience This book offers a sweeping assessment of the effects of neoliberalism the dominant feature of our times It analyzes the ideology in unusually wide ranging terms as a movement that not only opened markets but also introduced new logics into social life integrating macro level analyses of the ways in which neoliberal narratives made their way into international policy regimes with micro level analyses of the ways in which individuals responded to the challenges of the neoliberal era The product of ten years of collaboration among a distinguished group of scholars it integrates institutional and cultural analysis in new ways to understand neoliberalism as a syncretic social process and to explore the sources of social resilience across communities in the developed and developing worlds

The City of Grace David Wadley, 2019-11-29 In this sweeping appraisal of the urban condition David Wadley argues that anything less than high level resolution in modelling the well being of inhabitants is wasting precious time Humanity is encountering rising entropy caused by unsustainable economic and demographic expansion Supported by a strong interdisciplinary backdrop featuring systems and crisis theories The City of Grace tackles these obstacles by picturing gracious function and graceful form in a human scale settlement In an attempt to salvage things lost in the teleology of urban development over the last 100 years the outlook is both heterodox and contrarian How long can we all go on in the present way In addressing grace a more

elevated concept than those focusing previous urban analyses this manifesto aims not to placate or please but instead to get humanity to face the encompassing realities it tries so hard to forget *Bioregionalism and Global Ethics* Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

New Earth Politics Simon Nicholson, Sikina Jinnah, 2016-03-04 Prominent scholars and practitioners consider the role of global environmental politics in the face of increasing environmental stress Humanity's collective impact on the Earth is vast The rate and scale of human driven environmental destruction is quickly outstripping our political and social capacities for managing it We are in effect creating an Earth 2.0 on which the human signature is everywhere a new earth in desperate need of humane and insightful guidance In this volume prominent scholars and practitioners in the field of global environmental politics consider the ecological and political realities of life on the new earth and probe the field's deepest and most enduring questions at a time of increasing environmental stress Arranged in complementary pairs the essays in this volume include reflections on environmental pedagogy analysis of new geopolitical realities reflections on the power of social movements and international institutions and calls for more compelling narratives to promote environmental action At the heart of the volume is sustained attention to the role of traditional scholarly activities in a world confronting environmental disaster Some contributors make the case that it is the scholar's role to provide activists with the necessary knowledge and tools others argue for more direct engagement and political action All the contributors confront the overriding question What is the best use of their individual and combined energies given the dire environmental reality Contributors Erik Assadourian Frank Biermann Wil Burns Ken Conca Peter

Future States Stephen Paul Haigh, 2016-04-15 Globalization consists of an interlocking array of political economic social and cultural forces that challenge the traditional international order in two key ways First states historically had hard shells by means of which they were capable of consolidating differences between inside and outside to the point where the latter could more easily be quarantined Second for closely related reasons they were largely able to absorb domestic society such that the individual was less a citizen than a subject But through globalizing processes these dubious attributes have been starkly exposed which leads Haigh to ask Whither the state under globalization Insightful and well written this book is sure to spark lively debate while attempting to answer its central question

Museums and the Paradox of Change Robert R. Janes, 2013-05-29 Museums throughout the world are under increasing pressure in the wake of the 2008 2009 economic recession and the many pressing social and environmental issues that are assuming priority The major focus of concern in the global museum community is the sustainability of museums in light of these pressures not to mention falling attendance and the challenges of the digital world Museums and the Paradox of Change provides a detailed account of how a major Canadian museum suffered a 40 percent loss in its operating budget and went on to become the most financially self sufficient of the ten largest museums in Canada This book is the most detailed case study of its kind and is indispensable for students and practitioners alike It is also the most incisive published account of organizational change within a museum in part because it is honest open and reflexive Janes is the first to bring perspectives drawn from complexity science into the discussion of organizational change in museums and he introduces the key concepts of complexity uncertainty nonlinearity emergence chaos and paradox This revised and expanded third edition also includes new writing on strengthening museum management as well as reflections on new opportunities and hazards for museums It concludes with six ethical responsibilities for museum leaders and managers to consider Janes provides pragmatic solutions grounded in a theoretical context and highlights important issues in the management of museums that cannot be ignored

The Green Devotional Karen Speerstra, 2010-01-01 Secular and sacred ancient and new words for contemplation and inspiration to act in defense of the earth Our planet our home is in crisis plain and simple and this collection of quotes poems essays and prayers will inspire all to actively reverse the man made causes of global warming stem the tide of environmental destruction and reconnect to the good earth Short essays of topical interest introduce each of the eight sections of this book and the 250 voices inside most of them contemporary began to harmonize together as they seem to call out for their own canonical structure one bounded by the ancient elements Earth Air Fire Water This collection of voices is like a green book of devotional hours reminiscent of the Books of Hours medieval people used to hold in their palms And like that medieval book The Green Devotional reminds us that we are connected to something broader and wiser than ourselves Including selections from

Rachel Carson Cornel West Bill McKibben Alice Walker Sue Monk Kidd Dean Koontz Barbara Kingsolver Daniel Pinchbeck Arundhati Roy and many others The Green Devotional ends with a section of Closing Prayers that prepare us not just to go to sleep but to rest up for another day of passionate action

The Quest for Security Joseph E. Stiglitz, Mary Kaldor, 2013-04-23 The essays in this collection boldly confront the quest for security arising from the social economic environmental and political crises and transformations of our century Joseph E Stiglitz and Mary Kaldor begin with an expansive balanced analysis of the global landscape and the factors contributing to the growth of insecurity Whereas earlier studies have touched on how globalization has increased economic insecurity and how geopolitical changes may have contributed to military insecurity this volume looks for some common threads in a globalized world without a global government with a system of global governance not up to the task how do we achieve security without looking inward and stepping back from globalization In each of their areas of expertise contributors seek answers to questions about how we achieve protection of those people who are most insecure without resorting to economic military or mafia protectionism Some have suggested that the turmoil in the Eurozone proves the deficiencies in the welfare state This book argues that the superior performance of Scandinavian countries arises from their superior systems of social protection which allow their citizens to undertake greater risk and more actively participate in globalization Some suggest that we can address terrorism or transnational crimes through the strengthening of borders or long distance wars This book develops the proposition that such approaches have the opposite effect and that only through spreading the human security experienced in well ordered societies can these dangers be managed This book also examines how these global changes play out not only in the relations among countries and the management of globalization but at every level of our society especially in our cities It explores the potential for cities to ensure personal security promote political participation and protect the environment in the face of increasing urbanization

Complex Ecology Charles G. Curtin, Timothy F. H. Allen, 2018-05-31 From climate change to species extinction humanity is confronted with an increasing array of societal and environmental challenges that defy simple quantifiable solutions Complexity based ecology provides a new paradigm for ecologists and conservationists keen to embrace the uncertainty that is pressed upon us This book presents key research papers chosen by some sixty scholars from various continents across a diverse span of sub disciplines The papers are set alongside first person commentary from many of the seminal voices involved offering unprecedented access to experts viewpoints The works assembled also shed light on the process of science in general showing how the shifting of wider perspectives allows for new ideas to take hold Ideal for undergraduate and advanced students of ecology and conservation their educators and those working across allied fields this is the first book of its kind to focus on complexity based approaches and provides a benchmark for future collected volumes
