Directors of Central Intelligence and Leaders of the U. S. Intelligence Community Douglas Garthoff,Central Agency,2012-08-01 In the wake of 11 September 2001 the issue of homeland security spawned a vibrant public discussion about the need to coordinate a wide range of federal governmental activities to achieve greater security for the United States

Congress enacted laws that established a new executive department the Department of Homeland Security and a new federal intelligence chief the director of national intelligence In both cases the objective was to integrate activities of disparate organizations better in order to improve critical government functions In fact for more than half a century there have been numerous efforts to enhance cooperation among the many parts of the nation s intelligence establishment under the leadership of a principal intelligence official called the director of central intelligence The story of this study is what the nation s leaders expected of directors of central intelligence in accomplishing this task and how those who held the responsibility attempted to carry it out The hope is that lessons drawn from that experience can inform today s ongoing debate about how best the new director of national intelligence can accomplish America s national intelligence mission The study presents an unusual perspective Examinations of past intelligence performance often focus on how intelligence has played a role in specific circumstances Studies of directors of central intelligence have usually stressed how they led the Central Intelligence Agency conducted their relationships with the president or affected US policy No study until this one has focused on how each director sought to fulfill his community role This book was prepared under the auspices of the Center for the Study of Intelligence by Dr Douglas F Garthoff a former CIA analyst and senior manager It reflects the author s deep experience in Intelligence Community affairs as well as his extensive research and interviews Dr Garthoff s study represents a valuable contribution to our professional literature and a rich source of insights at a moment when the responsibilities and authorities of the Intelligence Community s senior leadership are again in the public spotlight

Eyes on Spies Amy B. Zegart, 2013-09-01 Amy Zegart examines the weaknesses of US intelligence oversight and why those deficiencies have persisted despite the unprecedented importance of intelligence in today s environment She argues that many of the biggest oversight problems lie with Congress the institution not the parties or personalities showing how Congress has collectively and persistently tied its own hands in overseeing intelligence

Transforming U.S. Intelligence Jennifer E. Sims, Burton Gerber, 2005-08-24 The intelligence failures exposed by the events of 9 11 and the missing weapons of mass destruction in Iraq have made one thing perfectly clear change is needed in how the U S intelligence community operates Transforming U S Intelligence argues that transforming intelligence requires as much a look to the future as to the past and a focus more on the art and practice of intelligence rather than on its bureaucratic arrangements In fact while the recent restructuring including the creation of the Department of Homeland Security may solve some problems it has also created new ones The authors of this volume agree that transforming policies and practices will be the most effective way to tackle future challenges facing the nation s security This volume s contributors who have served in intelligence agencies the Departments of State or Defense and the staffs of congressional oversight committees bring their experience as insiders to bear in thoughtful and thought provoking essays that address what such an overhaul of the system will require In the first section contributors discuss twenty first century security challenges and how the intelligence community can successfully defend U S

national interests The second section focuses on new technologies and modified policies that can increase the effectiveness of intelligence gathering and analysis Finally contributors consider management procedures that ensure the implementation of enhanced capabilities in practice Transforming U S Intelligence supports the mandate of the new director of national intelligence by offering both careful analysis of existing strengths and weaknesses in U S intelligence and specific recommendations on how to fix its problems without harming its strengths These recommendations based on intimate knowledge of the way U S intelligence actually works include suggestions for the creative mixing of technologies with new missions to bring about the transformation of U S intelligence without incurring unnecessary harm or expense The goal is the creation of an intelligence community that can rapidly respond to developments in international politics such as the emergence of nimble terrorist networks while reconciling national security requirements with the rights and liberties of American citizens Overview of the U. JONES, 2025-05-22 Prior to World War II the formal collection and exploitation of foreign intelligence in the United States fell almost exclusively in the domain of the military The attack on Pearl Harbor and other events during that war created a growing consensus that the nation required a central authority to manage national intelligence pertinent to multiple departments of the government In response the national security act of 1947 created the central intelligence agency and the position of director of central intelligence Over the next half century numerous commissions and panels found neither the agency nor the director ever wielded effective control over the diverse and growing intelligence community In response to such findings presidents issued National Security Council directives and executive orders and congress signed multiple bills to reinforce the CIA and DCI s authority over the intelligence community but the problems of decentralization persist The terrorist attack of 9 11 provided sufficient impetus to make the first significant structural changes to the failed us intelligence community since 1947 To evaluate the prospects of the national intelligence reform act of 2004 to establish effective central control over the community it is helpful to identify the factors that frustrated previous reform efforts This work has been selected by scholars as being culturally important and is part of
