The Waning Of Humaneness:

The Waning of Humaneness Konrad Lorenz, 1987 *Liberation Philosophy: From the Buddha to Omar Khayyam* Mostafa Vaziri, 2019-09-30 The critical narrative of this interdisciplinary book offers a first time look at the interrelationship between biology mythology and philosophy in human development Its daring premise follows the trajectory of human thought starting with the biological roots of fear and the original need for religion truth seeking and myth making The narrative then innovatively links a number of maverick philosophical teachings over the centuries from pre Buddhist times to the Buddha from Epicurus and Pyrrho to Lucretius and eventually to the seminal poetry of Omar Khayyam These emergent philosophies exemplified liberation from the grasp of mythical and religious thinking and instead espoused an empirical and joyful mind The narrative concludes with a look at the emancipating philosophical movement that resulted in the European Enlightenment and it suggests that the philosophical teachings explored in the book may offer the potential for a second broader Enlightenment *(Un)Learning to Be Human?* Stefan Herbrechter, 2024-09-23 Critical posthumanism is a theory paradigm that has become hugely influential across the humanities and social sciences in the last twenty years This volume collects essays written over the last decade by one of the founders and leading figures of this movement Originally a reaction to accelerated technological and media change that challenges traditional notions of what it means to be human posthumanism as opposed to transhumanism has developed into a general critique and reappraisal of life after humanism and anthropocentrism The essays collected here are dealing with aspects of education technology politics media and art and share a focus on how to critique and unlearn traditional understandings of humanness and re learn what it means to be human differently *Against Democracy and Equality* Tomislav Sunic, 2011 Dr Sunic examines the principal themes which have concerned the thinkers of the New Right since its inception by Alain de Benoist in 1968 and also discusses the significance of some of the older authors who have been particularly influential on the development of the movement including Oswald Spengler Carl Schmitt and Vilfredo Pareto *Dictionary for Psychotherapists* Richard D. Chessick, 1993 For experienced professionals and those in various stages of training Written in narrative form proceedings from abandonment neurosis to working through entries are plain spoken and tailored for clinical utility The text also functions as an overview of practical problems in psychotherapy and includes biographical profiles of many important theorists Book News *Catholicism* Richard P. McBrien, 2013-05-28 A new study edition of the classic that has sold over 150 000 copies *The Futurist* , 1986 **The Scourge of Genocide** Adam Jones, 2013-06-26 The Scourge of Genocide collects essays reviews and reportage on the subjects of genocide and crimes against humanity by Adam Jones recently selected as one of Fifty Key Thinkers on the Holocaust and Genocide The volume includes a number of previously unpublished essays and explores a range of debates and approaches in comparative genocide studies such as Genocide pedagogy and visual representation Gender and gendercide The role of media and communications in genocide The historiography of genocide

studies Subaltern genocide or genocides by the oppressed Strategies of genocide prevention and intervention Covering a broad spectrum of theoretical perspectives as well as case studies from the former Yugoslavia Rwanda Guatemala Afghanistan Iraq and Israel Palestine this book is essential reading for all scholars and students of genocide studies political violence and international relations Decision and Structure Mario A. Rivera, 1991-11-13 The 1980 Cuban influx represented a unique challenge to federal refugee policy mechanisms and to prevalent concepts of policy analysis and evaluation The persistence of unworkable policies across two Presidential administrations suggests that organizational structural and decisional rather than personality or motivational factors were principally determinative of policy failure This work suggests elements of a causal theory based on these factors and a mode of normative evaluation based on mixed analytical strategies that attend to both decisional process and institutional structure Challenges of Social Studies Instruction in Middle and High Schools Margaret A. Laughlin, 1995 **Evolutionary Ethics and Moral Idealism** Kenneth N. Rabe, 2002 **Library Journal** , 1987 *New Growth* Lyman Grant, 1989 **Staff Paper** , 1991 *Central European Political Science Review* , 2002 *The Forbidden Body* Shelley Bovey, 1994 The author herself a size 24 exposes discrimination in all its forms and reveals that this is far more threatening to a woman's physical and mental health than the health risks associated with being fat She puts tough questions to Harley Street surgeons dieticians and others with a vested interest in women wanting to be thinner and talks to doctors who confess that prejudice not science makes them condemn fat women as unhealthy Dancing to Different Tunes Ethna Viney, 1996 For much of history sexuality has been an ever present shadow on the lives of women Even today their own true sexuality is distorted by a genitally fixated world and among feminists explorations of sexuality have remained too narrowly focused Too little emphasis has been placed on motherhood and the implications of biology have often been dismissed Disagreements about sexuality have caused serious rifts among feminists obscuring the fact that male dominated interpretations of sexuality are injuring women's happiness and indeed their civil rights **Philosophy East & West** , 1988 **Indian Literature** , 2005 **Kirkus Children's and Young-adult Edition** , 1986
