Thresholds Of Listening Sound Technics Space:

Thresholds of Listening Sander van Maas, 2016 This title addresses recent and historical changes in the ways listening has been conceived. Listening having been emancipated from the passive subjected position of reception has come to be asserted as an active force in culture and in collective and individual politics. The chapters here show that the exteriorisation of listening brought into relief by recent historical studies of technologies of listening involves a renegotiation of the theoretical and pragmatic distinctions that underpin the notion of listening.

Thresholds of Listening Sander van Maas, 2015-09-01 Thresholds of Listening addresses recent and historical changes in the ways listening has been conceived. Listening having been emancipated from the passive subjected position of reception has come to be asserted as an active force in culture and in collective and individual politics. The contributors to this volume show that the exteriorization of listening brought into relief by recent historical studies of technologies of listening involves a renegotiation of the theoretical and pragmatic distinctions that underpin the notion of listening. Focusing on the manifold borderlines between listening and its erstwhile others such as speaking, reading, touching, seeing, or hearing, the book maps new frontiers in the history of aurality. They suggest that listening's finitude defined in some of the essays as its death or deadliness should be considered as a heuristic instrument rather than as a mere descriptor. Listening emerges where it appears to end or to run up against thresholds and limits or when it takes unexpected turns. Listening's recent emergence on the cultural and theoretical scene may therefore be productively read against contemporary recurrences of the motifs of elusiveness, finitude, and resistance to open up new politics, discourses, and technologies of aurality.

Sound Authorities Edward J. Gillin, 2022-02-11 Sound Authorities shows how experiences of music and sound played a crucial role in nineteenth-century scientific inquiry in Britain. In Sound Authorities, Edward J. Gillin focuses on hearing and aurality in Victorian Britain, claiming that the development of the natural sciences in this era cannot be understood without attending to the study of sound and music. During this time, scientific practitioners attempted to fashion themselves as authorities on sonorous phenomena, coming into conflict with traditional musical elites as well as religious bodies. Gillin pays attention to sound in both musical and nonmusical contexts, specifically the cacophony of British industrialization. Sound Authorities begins with the place of acoustics in early nineteenth-century London, examining scientific exhibitions, lectures, spectacles, workshops, laboratories, and showrooms. He goes on to explore how mathematicians mobilized sound in their understanding of natural laws and their vision of a harmonious ordered universe. In closing, Gillin delves into the era's religious and metaphysical debates over the place of music and humanity in nature, the relationship between music and the divine, and the tensions between spiritualist understandings of sound and scientific ones.

Free Listening Naomi Waltham-Smith, 2024-11 Free Listening offers a radical reframing of seemingly intractable debates and polarized positions on free speech, academic freedom, systemic injustice, and political dissent by shifting attention from our voices to our ears. Instead of reclaiming the terrain of free speech that is increasingly ceded to

conservatives Naomi Waltham Smith argues that progressives should assume a more radical task to liberate listening from those frameworks that have determined what freedom looks like who enjoys it and at what cost Refocusing on aural responsiveness forces a confrontation with the liberal tradition that has traditionally anchored claims for freedom of expression and inquiry If listening is placed at the heart of public deliberation and disagreeing well the relational open ended and unpredictable character of free expression becomes a common good In a wide ranging critical reflection on issues from civility to criticality righteous anger to gentle listening and silencing to streaming platforms Free Listening makes an ambitious contribution to sound studies and political philosophy Weaving together deconstruction Black political thought and decolonial theory Waltham Smith argues that the retort to accusations of cancel culture should be a revival of abolition democracy

Remapping Sound Studies Gavin Steingo, Jim Sykes, 2019-03-14 The contributors to Remapping Sound Studies intervene in current trends and practices in sound studies by reorienting the field toward the global South Attending to disparate aspects of sound in Africa South and Southeast Asia Latin America the Middle East Micronesia and a Southern outpost in the global North this volume broadens the scope of sound studies and challenges some of the field's central presuppositions The contributors show how approaches to and uses of technology across the global South complicate narratives of technological modernity and how sound making and listening in diverse global settings unsettle familiar binaries of sacred secular private public human nonhuman male female and nature culture Exploring a wide range of sonic phenomena and practices from birdsong in the Marshall Islands to Zulu ululation the contributors offer diverse ways to remap and decolonize modes of thinking about and listening to sound Contributors Tripta Chandola Michele Friedner Louise Meintjes Jairo Moreno Ana Mar a Ochoa Gautier Michael Birenbaum Quintero Jeff Roy Jessica Schwartz Shayna Silverstein Gavin Steingo Jim Sykes Benjamin Tausig Herv Tchumkam
