

A Tutorial for the TI-83 Plus Graphing Calculator

Introduction

The TI-83 Plus graphing calculator serves as a powerful tool for exploring models in computational science that allow you to analyze real world science problems with mathematics. This introduction to the calculator will show you some of the features you will use in the project; but the calculator has many other capabilities.

As you read through this introduction, please have your calculator nearby and use it as instructed to become familiar with its operation. Also, please keep handy the *TI-83 Plus Graphing Calculator Manual* (the *Manual*), since you will be using it, too.

The graphic at right shows the calculator. When you first turn on the calculator, it always displays the home screen. (The home screen may have numerical expressions or graphs from previous sessions which may be deleted by pressing the **CLEAR** key.)

You may recognize familiar keys as on other calculators you have used, such as the white number keys and blue arithmetic operators. There is no **EQUALS [=]** key; the **ENTER** key is used instead. Note the cursor keys in blue. These move the cursor around the screen in the direction of the white arrows on the keys. The black keys set up functions or other special actions. The row of narrow keys immediately under the screen are used to define functions and to create tables and graphs.

Notice the gold colored **2nd** key and green colored **ALPHA** key. These work as types of shift keys to enable most other keys to serve two or three other ways.

If the calculator's batteries are not installed, please do so now as the *Manual* indicates on pages B-2 to B-3. (You will not need to change the lithium battery.)
