

A large, semi-transparent portrait of Alfred von Tirpitz, a prominent figure in the Imperial German Navy, is overlaid on the top half of the book cover. He is shown from the chest up, facing slightly to the left, with a full, dark beard and mustache. He is wearing a dark naval uniform with a white shirt and a dark tie. The background of the entire cover is a reddish-brown color.

Tirpitz And The Imperial German Navy:

Tirpitz Patrick J. Kelly, 2011-05-03 A first rate biography of this grand admiral who is better known for his political skills than his naval ones US Naval Institute Proceedings Grand Admiral Alfred von Tirpitz 1849 1930 was the principal force behind the rise of the German Imperial Navy prior to World War I challenging Great Britain's command of the seas As State Secretary of the Imperial Naval Office from 1897 to 1916 Tirpitz wielded great power and influence over the national agenda during that crucial period By the time he had risen to high office Tirpitz was well equipped to use his position as a platform from which to dominate German defense policy Though he was cool to the potential of the U boat he enthusiastically supported a torpedo boat branch of the navy and began an ambitious building program for battleships and battle cruisers Based on exhaustive archival research including new material from family papers Tirpitz and the Imperial German Navy is the first extended study in English of this germinal figure in the growth of the modern navy Well written and based on new sources allows the reader deep insights into the life of a man who played a very important role at the turn of the last century and who like almost nobody else shaped German policy International Journal of Maritime History An invaluable reference work on Tirpitz the Imperial German Navy and on politics in Wilhelmine Germany The Northern Mariner **Tirpitz** Michael Epkenhans, 2008 Alfred von Tirpitz 1849 1930 who joined the Prussian Navy in 1865 as a midshipman was chiefly responsible for rapidly developing and enlarging the German Navy especially the High Seas Fleet from 1897 until the years immediately prior to the First World War Epkenhans uses newly discovered documents to provide a fresh treatment of this important naval leader In 1897 Tirpitz became the Secretary of State of the Imperial Navy Department In four major building acts of 1898 1900 1908 and 1912 and in working closely with Kaiser Wilhelm II Tirpitz expanded the Imperial Navy from a small coastal force into a major blue water navy Great Britain reacting with alarm to this challenge to its overseas trade and naval supremacy accelerated the naval arms race by launching a revolutionary type of battleship the Dreadnought in 1906 and entering into strategic alliances with France and Russia By the start of the First World War in 1914 the British Royal Navy still held a sizable advantage in capital ships over Germany so that only one notable fleet action Jutland in 1916 took place during the war Tirpitz who had become the German Navy commander with the outbreak of the war thereafter became a staunch advocate of unrestricted submarine warfare This policy did not differentiate between neutral and belligerent shipping and proved so controversial with the neutral United States that Germany was forced to retract it albeit only temporarily In the meantime Tirpitz tendered his resignation to the Kaiser who surprisingly accepted it Tirpitz remained a minor figure thereafter later serving the right wing Fatherland Party as a deputy in the Reichstag 'Luxury' Fleet Holger H. Herwig, 1987-08 Originally published London Boston Allen Unwin 1980 *German Naval Strategy, 1856-1888* David H. Olivier, 2004-08-26 This book is a comparative study of the evolution of the German navy in the second half of the nineteenth century It examines the development of strategy especially commerce raiding in comparison to what other navies were doing

in this era of rapid technological change **"Luxury" Fleet** Holger H. Herwig, 1987 *Luxury Fleet* the phrase was Winston Churchill's is the first history of the Imperial German Navy from 1888 to 1918 After tracing the historical background to German naval ambitions the first two sections of the book analyze Admiral Tirpitz's program of building a battle fleet strong enough to engage the Royal Navy in the North Sea Professor Herwig shows that fleet as a force that would complement the most efficient army in Europe and describes the warships that were built and the attitudes of the officer corps and men The last section of the book considers the tactical deployment of the German fleet during the First World War both in home waters and overseas and it ends appropriately perhaps with the scuttling of the German fleet in Scapa Flow in 1919 Tides of Fortune Zack Cooper, 2025-02-25 An ambitious look at how the twentieth century's great powers devised their military strategies and what their implications mean for military competition between the United States and China How will the United States and China evolve militarily in the years ahead Many experts believe the answer to this question is largely unknowable But Zack Cooper argues that the American and Chinese militaries are following a well trodden path For centuries the world's most powerful militaries have adhered to a remarkably consistent pattern of behavior determined largely by their leaders' perceptions of relative power shifts By uncovering these trends this book places the evolving military competition between the United States and China in historical context Drawing on a decade of research and on his experience at the White House and the Pentagon Cooper outlines a novel explanation for how militaries change as they rise and decline *Tides of Fortune* examines the paths of six great powers of the twentieth century tracking how national leaders adjusted their defense objectives strategies and investments in response to perceived shifts in relative power All these militaries followed a common pattern and their experiences shed new light on both China's recent military modernization and America's potential responses *Genesis of the Grand Fleet* Christopher Buckey, 2021-05-15 *Genesis of the Grand Fleet* The Admiralty Germany and the Home Fleet 1896-1914 tells the story of the prewar predecessor to the Royal Navy's war-winning Grand Fleet the Home Fleet Established in early 1907 by First Sea Lord Sir John Fisher the Home Fleet combined an active core of powerful armored warships with a unification of the various reserve divisions of warships previously under the control of the three Royal Navy home port commands Fisher boasted that the new Home Fleet would be able to counter the growing German Hochseeflotte While these boasts were accurate they were not the sole motivation behind the Home Fleet's establishment The Liberal Party's landslide victory in the 1906 General Election made fiscal economy on the part of the Admiralty even more important than before and this significantly influenced the Home Fleet's creation Subsequently the Home Fleet suffered a sustained campaign of criticism by the commander in chief of the Channel Fleet Lord Charles Beresford This campaign ruined many careers including Beresford's and resulted in the assimilation of the Channel Fleet into the Home Fleet in 1909 From 1910 onward the Home Fleet steadily evolved and became the most important single command in the Royal Navy and the Home Fleet's successive commanders in chief had influence on strategic policy rivaled only by the

Board of Admiralty The last prewar commander of the Home Fleet Admiral Sir George Callaghan achieved this influence by impressing the civilian head of the Admiralty Winston Churchill A driven reformer Churchill s influence was almost as important as Fisher s Against this backdrop of political drama Genesis of the Grand Fleet The Admiralty Germany and the Home Fleet 1896 1914 explains how Britain maintained its maritime preeminence in the early twentieth century As Christopher Buckey describes the fleet sustained Britain and her allies path to victory in World War I Fighting the Great War at Sea Norman Friedman,2014-10-22 Winner of the John Lyman Book Award for Naval and Maritime Science and Technology A compelling and convincing historical analysis of World War I Navy News While the overriding image of the First World War is of the bloody stalemate on the western front the overall shape of the war arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in Germany s desperate attempts to counter the American industrial threat which ultimately drew the United States into the war This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing describes rapid wartime changes not only in ship and weapons technology but also in the way naval warfare was envisaged and fought Melding strategic technical and tactical aspects Friedman approaches the First World War from a fresh perspective and demonstrates how its perceived lessons dominated the way navies prepared for the Second World War Friedman is a master of the evolution of naval strategy tactics and technology a rewarding read that will leave many wanting to return again and again just to see what they might have missed the first time Australian Naval Institute Dr Friedman s research credentials are impeccable and the huge amount of factual detail he has unearthed will be sure to delight many there is nothing comparable in either depth or scope out there and for this reason if no other this book is likely to become a standard work on the naval aspects of the Great War Naval War College Review **Economic Warfare and the Sea** David G. Morgan-Owen,Louis Halewood,2020 Economic Warfare and the Sea examines the relationship between trade maritime warfare and strategic thought between the early modern period and the late twentieth century Using a variety of geographic and chronological examples it presents a longue duree approach to a crucial theme in maritime strategic thought

Germany at War David T. Zabecki,2014-10-28 Written by experts for use by nonexperts this monumental work probes Germany s Genius for War and the unmistakable pattern of tactical and operational innovation and excellence evident throughout the nation s military history Despite having the best military forces in the world some of the most advanced weapons available and unparalleled tactical proficiency Germany still lost both World Wars This landmark four volume encyclopedia explores how and why that happened at the same time examining Germany as a military power from the start of the Thirty Years War in 1618 to the present day Coverage includes the Federal Republic of Germany its predecessor states and the kingdoms and principalities that combined to form Imperial Germany in 1871 The Seven Years War is discussed as are the Napoleonic Wars the Wars of German Unification including the Franco Prussian War World War I World War II and

the Cold War In all more than 1 000 entries illuminate battles organizations leaders armies weapons and other aspects of war and military life The most comprehensive overview of German military history ever to appear in English this work will enable students and others interested in military history to better understand the sociopolitical history of Germany the complex role conflict has played in the nation throughout its history and why Germany continues to be an important player on the European continent
