Unnatural Harvest How Genetic Engineering Is Altering Our Food:

Unnatural Harvest Ingeborg Boyens,2000-02-01 Do you know what you re eating Do you know what you re feeding your children Chances are the last time you visited the grocery store you unwittingly purchased foodstuffs that have been genetically altered That means you ve become part of a grand yet alarming experiment on food and humans being carried out on a global scale by powerful biotech companies And no one including the scientists and the governments who are giving them the go ahead knows the long term effects of genetically modified foods In *Unnatural Harvest* Ingeborg Boyens presents the startling implications of a new technology that is quietly revolutionizing the production of food our most basic component of life exposing the serious consequences this science poses for the biodiversity of our planet for animal welfare and for the health of ourselves and our children

Unnatural Harvest Ingeborg Boyens,2018-03-27 Advertisers may want us to believe that our food is produced on picturesque farms but the cold reality is that the plants and animals we consume may be the result of genetic engineering in the laboratories of multinational corporations Biotechnology brings with it implications for human and animal health the threat of environmental damage a possible redefining of our global food system and a Pandora s box of ethical questions But the consuming public remains virtually unaware of the genetic alterations of their food and what that may hold in store Thoroughly researched and accessibly written *Unnatural Harvest* holds nothing back in telling us how the food we now serve ourselves and our children may be altered and why we should be very concerned

Unnatural Harvest Ingeborg Boyens,1999 Advertisers may want us to believe that our food is produced on picturesque farms but the cold reality is that the plants and animals we consume may be the result of genetic engineering in the laboratories of multinational corporations Biotechnology brings with it implications for human and animal health the threat of environmental damage a possible redefining of our global food system and a Pandora s box of ethical questions But the consuming public remains virtually unaware of the genetic alterations of their food and what that may hold in store Thoroughly researched and accessibly written *Unnatural Harvest* holds nothing back in telling us how the food we now serve ourselves and our children may be altered and why we should be very concerned Corporate Crops Gabriela

Pechlaner,2012-12-01 Biotechnology crop production area increased from 1 7 million hectares to 148 million hectares worldwide between 1996 to 2010 While genetically modified food is a contentious issue the debates are usually limited to health and environmental concerns ignoring the broader questions of social control that arise when food production methods become corporate owned intellectual property Drawing on legal documents and dozens of interviews with farmers and other stakeholders *Corporate Crops* covers four case studies based around litigation between biotechnology corporations and farmers Pechlaner investigates the extent to which the proprietary aspects of biotechnologies from patents on seeds to a plethora of new rules and contractual obligations associated with the technologies are reorganizing crop production The lawsuits include patent infringement litigation launched by Monsanto against a Saskatchewan canola farmer who in turn

claimed his crops had been involuntarily contaminated by the company's GM technology a class action application by two Saskatchewan organic canola farmers launched against Monsanto and Aventis later Bayer for the loss of their organic market due to contamination with GMOs and two cases in Mississippi in which Monsanto sued farmers for saving seeds containing its patented GM technology Pechlaner argues that well funded corporate lawyers have a decided advantage over independent farmers in the courts and in creating new forms of power and control in agricultural production Corporate Crops demonstrates the effects of this intersection between the courts and the fields where profits not just a food supply are reaped
