Us Destroyers 1934 45 Pre War Classes New Vanguard:

US Destroyers 1934-45 Dave McComb,2011-12-20 Since the beginning of the 20th century destroyers have been all purpose ships indispensable from delivering the mail at sea to screening other vessels and where larger ships were not present forming the front line in battle This illustrated guide details the 169 ships of ten classes introduced in the 1930s early 1 500 tonners and 1 850 ton destroyer leaders designed to conform to the 1930 London Naval Treaty plus the successor 1 570 ton Sims class and 1 620 and 1 630 ton Benson and Gleaves classes In wartime most 1 500 tonners and leaders initially saw front line duty in the Pacific but were relegated to secondary assignments as newer vessels arrived while the later 1 620 and 1 630 tonners became the standard destroyers of the Atlantic War This volume reveals the fascinating design story behind these pioneering classes from the constraints of peacetime treaties to advances in propulsion engineering and wartime modifications With an operational overview of their service and tables listing all ships by class builder and initial squadron this is the definitive guide to the pre war US destroyer classes **Kriegsmarine U-boats 1939-45 (1)** Gordon Williamson,2012-04-20 This the first of two volumes on Germany s World War II U boats traces their development from the early U boats of the Kaiser s Navy culminating in the formation of the 1st U boat Flotilla in 1935 with the modern Type II Gordon Williamson explores key moments in the U boats history such as the prohibition on Germany having U boats following the Armistice in 1918 and the subsequent Treaty of Versailles and the secret development of U boats using a cover firm in Holland The operational history section includes examples from the Classes Type VIIA Type VIIB VIID VIIE and VIIF before concentrating on the mainstay of the U boat arm the Type VIIC Comparisons are also made with the standard allied submarines their strengths weaknesses and U boat tactics *British Destroyers 1892-1918* Jim Crossley,2012-02-20 A history of the first destroyers of the Royal Navy which revolutionized the way war was fought at sea with new armaments and a great improvement on earlier designs Between 1892 when the first destroyers were laid down and 1918 destroyers evolved radically from 27 knot 250 ton ships into 35 knot 1 530 ton ships All these ships were involved in some form during World War I the smaller original destroyers in an auxiliary support role and the newer larger destroyers at some of the greatest sea battles of the war This account highlights the role the destroyers played in the North Sea during the crucial battles to control the Heligoland Bight as well as the major fleet action at the battle of Jutland in 1916 Complete with a detailed description of the technical evolution of each class of destroyer from the 27 knotters to the Tribal and Marksman classes Jim Crossley offers a complete overview of the vessels that helped to maintain Britain s naval supremacy Imperial Japanese Navy Submarines 1941-45 Mark Stille,2012-06-20 During World War II the Imperial Japanese Navy was at the forefront of submarine technology It fielded the largest pre nuclear submarines in the world some capable of carrying floatplane bombers which operated alongside fast combat vessels and midget submarines all equipped with the best torpedoes available The Japanese submarine fleet should have been an awe inspiring force but despite playing a crucial scouting role and enjoying

several notable successes it was surprisingly ineffective Alongside unique color plates Mark Stille describes the astounding technical advances of this range of vessels and the wartime tactics responsible for their failure German E-boats 1939-45 Gordon Williamson,2012-04-20 By the outbreak of World War II Germany had done much to replace the Kaiser's High Seas Fleet which was scuttled following their surrender at the end of World War I Forced to build anew the Kriegsmarine possessed some of the most technically advanced warships in existence Although the heavy units of the fleet were too small in number to pose much of a threat Germany was particularly well served by her Navy's smaller vessels in particular the U Boats and the S Boats Known to the allies as the E Boats Enemy they performed sterling duties in the Black Sea and English Channel where they became a particular scourge Alongside ample illustrations Gordon Williamson explores these E Boats and the details of their design *German Battleships 1914-18* (2) Gary Staff,2012-01-20 The design and development of the key dreadnought classes for the German Imperial Navy and their deployment in World War I including the great clash of dreadnoughts at the Battle of Jutland and operations in the Baltic Supported by official documents personal accounts official drawings and specially commissioned artwork this is an informative history of the key classes Kaiser K nig and Bayern that formed the backbone of the German Imperial Navy throughout World War I Gary Staff details the technological revolution that had taken place to enable the building of these large dreadnought classes Kriegsmarine U-boats 1939-45 (2) Gordon Williamson,2012-04-20 Following on from New Vanguard 51 Kriegsmarine U boats 1939 45 1 this book charts the continuing development of the U boat in German service including the evolution of the Type IX as a long range cruiser intended for solo operations in distant waters Also covered is the revolutionary Type XXI conceived of in 1942 and launched in April 1944 the first true submarine rather than submersible whose arrival was just too late to influence the war Other vessels covered are the Type XXIII a small vessel armed with only two torpedoes but technically highly advanced and the Type X minelayers which were rarely used in their intended role and more often used as supply boats **Italian Light Tanks** Filippo Cappellano,Pier Paolo Battistelli,2012-06-20 By November 1918 only one Italian training unit equipped with French Schneider and Renault tanks had been formed Consequently during the 1920s the Italian army had just one single tank type in its armoured inventory the Fiat 3000 Only in 1927 was the first tank unit formed as a branch of the infantry and not as an independent organization Pier Paolo Battistelli and Filippo Cappellano explore the development of these tanks Between 1933 and March 1939 a further 2 724 CV 33 L 3 tanks were built 1 216 of which were exported all over the world By the time Italy entered the war in June 1940 the army had 1 284 light tanks 855 of which were in combat units including three armoured divisions Featuring detailed illustrations this compact guide covers all of these types including variants of the CV 33 L 3 tanks that included flame throwers bridge layers recovery vehicles and a radio command tank *Cromwell Cruiser Tank 1942-50* David Fletcher,Richard C Harley,2012-05-20 For most of World War II British tank development remained faithful to the design philosophy inaugurated during World War I Experiences in North Africa highlighted flaws in this basic design

however and the General Staff identified the need for a new heavy cruiser that could combine speed and manoeuvrability with increased armour and armament The Cromwell Cruiser tank was designed as a result and soon proved itself one of the fastest and most successful tanks deployed by the Allies during World War II This book details the design and development of the Cromwell and its many variants from its introduction at D Day through its many successes in the final year of World War II and beyond

US Nuclear Submarines Jim Christley,2012-01-20 The adoption of nuclear power revolutionized submarine design Vessels can stay underwater for months trailing the enemy or training weapons on land targets from secret positions always there never seen Jim Christley a former submariner explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war and frankly discusses the power and perils of using nuclear reactors at sea Using unique and detailed artwork he outlines the many evolving aspects of design within the submarine classes from the very first nuclear submarine USS Nautilus to the classes under construction even now

Matilda Infantry Tank 1938-45 David Fletcher,2012-05-20 The Matilda was the principal British infantry tank in the early years of World War II It served with the BEF in France and later in North Africa where it earned the title Queen of the Desert Outclassed by increasingly powerful German anti tank weapons it still remained a power in the South East Pacific and was kept in service until the end of the war by Australian forces In this book David Fletcher deals with Marks I to V Development and operational history are discussed along with service in other countries including Germany and Russia Numerous variants are also covered including the prototype Hedgehog bunker busting weapon

War Elephants Konstantin Nossov,2012-04-20 A detailed examination of the elephant in war exploring both the technical details of armament and equipment as well as their use in some of ancient history s most dramatic battles Elephants have been deployed as weapons for centuries particularly in South and South East Asia where war elephants constituted the bulk of most armies in the region from antiquity right up to the 19th century This book offers an insight into the incredible history of these living tanks focusing on the design of the equipment and armament that made them so terrifying Konstantin S Nossov traces the history of war elephants from their deployment against Alexander the Great s army at the battle of Gaugamela through to their use in the 19th century by the armies of South East Asia analyzing the battle formation and tactics of war elephants in action and how these tactics developed

Sherman Crab Flail Tank David Fletcher,2012-05-20 The Sherman Crab Flail tank was the powerful culmination of a series of mine clearing flail tanks developed during World War II Here David Fletcher recounts how the Sherman Crabs were among the first tanks ashore on D Day and as the war progressed they were in constant demand both for formal attacks and more incidental operations Following the development of the tank and its use in the war he details the US Army s initial lack of interest in the flail but how after cooperative actions with the British they too decided to adopt the type themselves In addition to its special mine clearing role the Sherman Crab was also capable of fighting in tank duels and this book includes dramatic accounts of its use by the famous 79th Armoured Division and the US Army The book explores the beginnings of the

design in the Matilda Scorpion and Baron flails developed for the Valentine and M3 Grant tanks through to the Sherman and particularly the Crab version This detailed account of one of the most interesting tanks in the Funnies series is a delight for any modeller or tank enthusiast Zeppelins Charles Stephenson,2012-03-20 On 2 July 1900 the people of Friedrichshafen Germany witnessed a momentous occasion the first flight of LZ 1 Count Ferdinand von Zeppelin s first airship Although deemed a failure a succession of better craft LZ2 to 10 enabled the Zeppelin to expand into the consumer market of airship travel whilst also providing military craft for the German Army and Navy The years of the Great War saw the Zeppelins undertake strategic bombing missions against Great Britain This engaging illustrated study covers the post war fate of the Zeppelins including the crash of the Hindenburg and their use by the Luftwaffe at the beginning of World War II

Fighting Ships of the Far East (1) Stephen Turnbull,2012-06-20 Authored by an expert on Southeast Asian history an illustrated addition to the hitherto small corpus of knowledge about a fascinating and little known subject Using detailed descriptions accurate cutaway plates and reliable historical examples this book covers the history of Chinese ship design and naval warfare from the beginning of the Han dynasty to the first few years of the Ming dynasty The epic battle of Lake Poyang in 1363 won by the man who was to become the first Ming Emperor is also detailed Kriegsmarine Auxiliary Cruisers Gordon Williamson,2012-06-20 Despite being relatively unknown compared to famous ships like Graf Spee or Bismarke or the more famous U boats the Auxiliary Cruisers were immensely successful not only in the number of enemy ships they sank but in the resources which were tied up trying to track them down The Royal Navy s auxiliary cruisers tended to be merchant vessels used to protect convoys from attack The German Auxiliary Cruisers however heavily armed and usually carried torpedo tubes as well as guns and even sometimes their own aircraft These ships were aggressive predators searching the sea lanes for unsuspecting enemy merchants and were not only capable of destroying enemy merchant ships but also of defending themselves against well armed enemy warships This book looks at the specifications and designs of the 11 Auxiliary Cruisers as well as their combat histories their eventual fates and the careers of some of the most famous commanders *Modern Israeli Tanks and Infantry Carriers 1985-2004* Marsh Gelbart,2012-05-20 Over the last two decades of the 20th century the Israel Defence Force IDF introduced a variety of new AFVs Old models such as the M48 and M60 were improved beyond recognition in the form of the Magach 7 The performance of Israel s indigenous Merkava tank was similarly enhanced with new variants and the new Merkava 4 MBT entered service Israeli infantry also received machines such as the Achzarit assault carrier the Puma combat engineer vehicle and the Nagmachon and Nakpadon tank based carriers intended for low intensity conflicts Featuring illustrations this book examines the design modification and combat history of these formidable fighting machines **U-boats of the Kaiser's Navy** Gordon Williamson,2012-03-20 As was the case in World War II one of the greatest threats to Britain during World War I was the German U boat menace This book traces the development of the U boat threat from the Brandtaucher designed by Wilhelm Bauer the father of the German

submarine arm in 1850 through to the commissioning of Germany's first U boat to go into service the U 1 in 1906 It covers the main types of World War I U boat detailing the operational history of the U boat service in depth with a particular focus on the campaigns in the Atlantic and Mediterranean as well as the slow build up of anti submarine measures by the allies

British Mark IV Tank David Fletcher, 2012-05-20 The formidable Mark IV tank was pitted against the German Army from 1917 until the end of World War I This book reveals the important role the tank played in the historic battle of Cambrai in 1917 as well as the first ever tank versus tank actions against German A7Vs It was among the first ever mass produced tank deployed in large numbers on a battlefield In awe of British technology the Germans actively captured salvaged and repaired Mark IVs for deployment against the Allies Using rare photographs and detailed artwork David Fletcher explores the Mark IV's design and development its variants and accessories and brings to life its exciting deployment on the battlefields of World War I

American Light and Medium Frigates 1794-1836 Mark Lardas, 2012-01-20 The Original Six frigates were commissioned by the new born US Navy at a staggering cost of nearly 700 000 Designed to be light and fast these warships enabled America to project its power across the globe Among the ships Mark Lardas examines is USS Constellation the first ship to be commissioned by the United States Navy Alongside stirring accounts of engagements during the Barbary Wars the author explores the design and development of these frigates explaining the shortcomings that led to their replacement by larger heavier 44 gun models by 1800 Packed with contemporary illustrations of US frigates and their British and French rivals this book follows the escalation of the naval arms race during the 18th century
