Student and Teacher Writing Motivational Beliefs Steve Graham, Gary A. Troia, Gustaf Bernhard Uno Skar, 2024-06-21 The study of students' motivational beliefs about writing and how such beliefs influence writing has increased since the publication of John Hays' 1996 model of writing. This model emphasized that writers' motivational beliefs influence how and what they write. Likewise, increased attention has been devoted in recent years to how teachers' motivational beliefs about writing, especially their efficacy to teach writing, impact how writing is taught and how students progress as writers. As a result, there is a need to bring together in a Research Topic studies that examine the role and influence of writing beliefs. Historically, the psychological study of writing has focused on what students write or the

processes they apply when writing Equally important but investigated less often are studies examining how writing is taught and how teachers efforts contribute to students writing What has been less prominent in the psychological study of writing are the underlying motivational beliefs that drive or inhibit students writing or serve as catalysts for teachers actions in the classroom when teaching writing This Research Topic will bring together studies that examine both students and teachers motivational beliefs about teaching writing This will include studies examining the operation of such beliefs how they develop cognitive and affective correlates how writing motivational beliefs can be fostered and how they are related to students writing achievement By focusing on both students and teachers beliefs the Research Topic will provide a more nuanced and broader picture of the role of motivation beliefs in writing and writing instruction This Research Topic includes papers that address students motivational beliefs about writing teachers motivational beliefs about writing or teaching writing Students motivational beliefs about writing include beliefs about the value and utility of writing writing competence attitudes toward writing goal orientation motives for writing identity epistemological underpinnings writing and attributions for success failure as examples Teacher motivational include these same judgements as well as beliefs about their preparation and their students competence and progress as writers to provide additional examples This Research Topic is interested in papers that examine how such beliefs operate develop are related to other cognitive and affective variables how they are impacted by instruction and how they are related to students writing performance Submitted studies can include original research both quantitative qualitative or mixed methods meta analysis and reviews of the literature

The Role of Teacher Interpersonal Variables in Students' Academic Engagement, Success, and Motivation Ali Derakhshan, Reza Pishghadam, Anna Mystkowska-Wiertelak, 2022-07-05 **Subject Guide to Books in Print**, 2001 **Facilitating**

Reviews in Educational Psychology Douglas F. Kauffman, Ting-Chia Hsu, Jesús N. García, Jesus de la Fuente, 2025-09-15 Frontiers in Psychology is delighted to present the Reviews in series of article collections This line is of great interest since it makes it possible to achieve transversal collaborations of all existing and new lines of research within the field of Educational Psychology The maturity of a discipline is seen when reviews eg of theoretical or instructional models systematic reviews quantitative systematic reviews with effect size calculations meta analyses meta meta analyses and the like begin to be necessary Multiple forms such as bibliographic mapping or other qualitative and quantitative analyses Considering that this phase is the first necessary for the justification of any empirical research and for the design of any empirical research it seems very interesting to support and collaborate with this line of the initiative There are many examples in each of the possible revision modalities as well as other novel ones some that require an analysis that is above all qualitative and others that require analysis in addition to qualitative of a quantitative type The reviews must be specific to the topics concepts and problems of the specific conceptual domain of the Educational Psychology area Contributions from scientific psychology in general or especially cognitive or instructional or other psychological perspectives in Education The following are examples for which systematic reviews following Prisma guidelines and or meta analysis will be welcomed 1 Cognitive and instructional contemporary perspectives in educational psychology research including reading writing and learning from text and other learning and instructional processes 2 Learning and individual differences 3 Assessment and intervention studies 4 Socio cultural and contextual perspectives in education 5 Technology and educational processes The Reviews in Educational Psychology collection welcomes full length mini or systematic review papers New articles will be added to this collection as they are published Please see details on the specific requirements for the different review article types **Emotional Regulation and Human Flourishing: Theoretical and Empirical Perspectives** Claudia Navarini, Blaine Fowers, Juan Andrés Mercado, Angelo Panno, Pía Valenzuela, 2025-04-01 Several authors i e Scheler Arnold Goldie Keltner and Ekman agree that traditionally in the history of Western thought emotions have been seen as enemies of rationality and disruptive of cooperative social relations However emotions guide our perceptions of the world our memories of the past and even our moral judgments of right and wrong most typically in ways that enable effective responses to the current situation For

example studies find that when we are angry we are acutely attuned to what is unfair which helps animate actions that remedy injustice Emotions structure not just colour diverse social interactions such as attachment between parents and children flirtations and negotiations between rivals Thus emotions organize rather than disrupt rational thinking According to Arnold positive or negative we need to deal with emotions We need to think about them and what they tell us As Williams poses the moral significance of emotions reveals how fact and value come together in the moral agent Human beings capacity for ethics arises from the intersection between reason and emotion
