Is sustainable economic development a myth or reality in the context of digitalization? What threats and opportunities does digitalization bring? What are realities and prospects of digitalization in the context of business practice? How do we create a digital infrastructure for the economy? How should the legal environment of the economy be transformed in the context of digitalization? The conclusions and recommendations presented are not recipes for solving the existing economic problems but instead are intended for use in further research on transformation processes in the economy and in the development of state economic policies in various countries and regions.
