Thunder From The East Portrait Of A Rising Asia:

Thunder from the East Nicholas D. Kristof, Sheryl WuDunn, 2001-10-09 An insightful and comprehensive look at Asia on the rise a masterful job of describing Asia's anguish and ambition The Washington Post Book World from the Pulitzer Prize winning journalists and bestselling authors of *Half a Sky* and *Tightrope* The 1997 economic crisis in Asia heaped devastation upon millions Yet Nicholas Kristof and Sheryl WuDunn argue that it was the best thing that could have happened to Asia It destroyed the cronyism protectionism and government regulation that had been crippling Asian business for decades and it left in its wake a vast region of resilient and determined millions poised to wrest economic diplomatic and military power from the West *Thunder from the East* is a riveting look at a complex region a fascinating panoply of compelling characters and a prophetic analysis from arguably the West's most informed and intelligent writers on Asia

The Commanding Heights Daniel Yergin, Joseph Stanislaw, 2002-06-15 *The Commanding Heights* is about the most powerful political and economic force in the world today the epic struggle between government and the marketplace that has over the last twenty years turned the world upside down and dramatically transformed our lives Now the Pulitzer Prize winning author of *The Prize* joins with a leading expert on the new marketplace to explain the revolution in ideas that is reshaping the modern world Written with the same sweeping narrative power that made *The Prize* an enormous success *The Commanding Heights* provides the historical perspective the global vision and the insight to help us understand the tumult of the past half century Trillions of dollars in assets and fundamental political power are changing hands as free markets wrest control from government of the commanding heights the dominant businesses and industries of the world economy Daniel Yergin and Joseph Stanislaw demonstrate that words like privatization and deregulation are inadequate to describe the enormous upheaval that is unfolding before our eyes Along with the creation of vast new wealth the map of the global economy is being redrawn Indeed the very structure of society is changing New markets and new opportunities have brought great new risks as well How has all this come about Who are the major figures behind it How does it affect our lives The collapse of the Soviet Union the awesome rise of China the awakening of India economic revival in Latin America the march toward the European Union all are a part of this political and economic revolution Fiscal realities and financial markets are relentlessly propelling deregulation achieving a new balance between government and marketplace will be the major political challenge in the coming years Looking back the authors describe how the old balance was overturned and by whom Looking forward they explore these questions Will the new balance prevail Or does the free market contain the seeds of its own destruction Will there be a backlash against any excesses of the free market And finally *The Commanding Heights* illuminates the five tests by which the success or failure of all these changes can be measured and defines the key issues as we enter the twenty first century *The Commanding Heights* captures this revolution in ideas in riveting accounts of the history and the politics of the postwar years and compelling tales of the astute politicians brilliant thinkers and tenacious businessmen who brought

these changes about Margaret Thatcher Donald Reagan Deng Xiaoping and Bill Clinton share the stage with the Minister of Thought Keith Joseph the broommaker's son Domingo Cavallo and Friedrich von Hayek the Austrian economist who was determined to win the twenty year battle of ideas It is a complex and wide ranging story and the authors tell it brilliantly with a deep understanding of human character making critically important ideas lucid and accessible Written with unique access to many of the key players *The Commanding Heights* like no other book brings us an understanding of the last half of the twentieth century and sheds a powerful light on what lies ahead in the twenty first century **Globalisation and Labour**

Rights Christine Kaufmann, 2007-01-17 In a world of work that has changed dramatically over the last few years states see themselves confronted with new actors and conflicting international legal obligations This book examines the tensions between core labour rights as defined by the International Labour Organisation and the interests of international economic institutions e g WTO IMF World Bank OECD It provides an analysis of the legal interactions between international regulations and state policy with regard to potential regulatory conflicts at both the horizontal and vertical level The study suggests a model of multilevel consistency as a way of reconciling the highly specialised and fragmented legal systems of core labour rights on the one hand and trade liberalisation on the other to form the coherent framework of a consistent legal order Its detailed analysis and recommendations are designed for both academic readers and practitioners in international organisations and governments *China's Great Leap* Minky Worden, 2011-01-04 With contributions from some of the most well respected and experienced Chinese writers journalists and organizers *China's Great Leap* examines the People's

Republic of China as its government and 1.3 billion people prepare for the 2008 Olympic Games When Beijing first sought the Games China was still recovering from the upheavals of Maoist rule and adapting to a market revolution Today China wants to engage with the outside world while fully controlling the engagement How will the new leaders in Beijing manage the Olympic process and the internal and external pressures for reform it creates *China's Great Leap* will illuminate China's recent history and outline how domestic and international pressures in the context of the Olympics could achieve human rights change Learn about key areas for human rights reform and how the Olympics could represent a possible great leap forward for the people of China and for the world *Women's Rights in the United States* Tiffany K. Wayne, 2014-12-09 A comprehensive encyclopedia tracing the history of the women's rights movement in the United States from the American Revolution to the present day Few realize that the origin of the discussion on women's rights emerged out of the anti slavery movement of the 19th century and that suffragists were active in the peace and labor movements long after the right to vote was granted Thus began the confluence of activism in our country where the rights of women both followed and led the social and political discourse in America Through 4 volumes and more than 800 entries editor Tiffany K Wayne with advising editor Lois Banner examine the issues people and events of women's activism from the early period of American history to the present time This comprehensive reference not only traces the historical evolution of the movement but also covers current

Under Foreign Eyes James King, 2012-02-16 This book is about the perception of Japan in the sixty films set there by gaijin foreigners outsiders who almost always do not speak or read Japanese My area of attention is directed to films depicting post World War II Japan and the Japanese and in many cases films showing how foreigners in the same time frame respond to Japan Why have a substantial number of films been set there by strangers As a body of work what do they tell us about contemporary Japan and about cinema These films certainly provide a new cultural history of the West's reaction to Japan but even more they are constructions that demonstrate how the West gazes at Japan As such more information can often be derived about the onlookers as on those looked upon

The Chinese Chameleon Revisited Zheng Yangwen 郑阳文, 2014-09-01 By examining how the Middle Kingdom has been portrayed by foreigners and the Chinese themselves this volume advances a new perspective in our reading and interpretation of the Chinese past by placing these producers and presenters of China in the spotlight The chapters probe how these figures produced or presented the country cross examining their backgrounds and circumstances Their gaze upon the Middle Kingdom was dictated by religious and political conviction but also particularly by the consumers of that gaze Like invisible hands producers and consumers of China continue to constrain representations of the country looming larger than the literary artistic or journalistic works they produce This volume also addresses scholars of Europe and America who have overlooked what Western writers on China reveal about their own contexts which is indeed often more than they reveal about their ostensible subject As such the Middle Kingdom serves as a convenient mirror to reflect European and American anxieties and ambitions
