Leeuwen, 2022-02-26 Quantum Physics shows us that we create what we observe Countless experiments confirm that it is our information which manifests reality Matter and time are created by our observation This is not only true when we do experiments in laboratories but it works the same way in everyday reality We manifest our own experiences Science does not prove that our consciousness must be a product of our material brain On the contrary Consciousness emerging from the brain is just a belief This book tells the story how physics did develop from a quest to understand nature into its current highly myopic materialistic paradigm The profound spiritual message of Quantum Physics is ignored to our detriment A wonderful very readable book that will convince thousands upon thousands of serious readers including students of science why consciousness is necessary to understand quantum physics and why materialist science is not adequate I give the book my highest recommendation Amit Goswami PhD author of *The Self Aware Universe* A monumental book A masterpiece in disguise Prof Emer dr Dirk K F Meijer University of Groningen **Enchanting - Life's Dream Calling** Margrit Eleonore Haid, 2024-01-18 How can the 2nd half of life become a rewarding and enchanting adventure with zest and esprit How can your life dream and the dream that LIFE has of you come true How can this be accomplished despite all the challenges that

life and aging present 70plus psychotherapist Margrit E Haid shows in an easy to understand way and in a colourful sequence of topics how the findings of psychotherapy offer inspiring enriching unconventional and encouraging answers to the questions posed above In our highly complex time it is imperative to better understand and consider the interplay of body mind soul and spirit including the unconscious Therefore particular emphasis is placed on the significance of its integration and on the nocturnal dream as an evolutionary map With it also the immense creative capacity inherent in every human being and willpower are of great importance Integrating and embracing all these areas are crucial for an empowering and deeply satisfying 2nd half of life however challenging it may be Besides her own conclusions also well known authors are explored from the fields of psychotherapy consciousness research medicine sociology philosophy quantum physics biology and anthropology such as C G Jung C P Est s Ken Wilber James Hillman Leopold Rosenmayr Danielle Quinodoz Helen Luke Roberto Assagioli Ingrid Riedel Marie Louise v Franz Arnold Mindel Rupert Sheldrake Alan Wolf and others *The Many Faces of Coincidence* Laurence Browne, 2017-11-10 Although much has been said and written about coincidences there is a marked absence when it comes to the development of a comprehensive model that incorporates the many different ways in which they can be understood and explained One reason for this omission is undoubtedly the sharp divide that exists between those who find coincidences meaningful and those who do not with the result that the conclusions of the many books and articles on the subject have tended to fall into distinct camps The Many Faces of Coincidence attempts to remedy this impasse by proposing an inclusive categorisation for coincidences of all shapes and sizes At the same time some of the implications arising from the various explanations are explored including the possibility of an underlying unity of mind and matter constituting the ground of being **This Book is from the Future** Marie D. Jones, Larry Flaxman, 2012-07-22 A very engaging read about how time travel has captured our imaginations You will find a number of surprising discoveries awaiting you Fred Alan Wolf author of Taking the Quantum Leap The idea of time travel has tantalized humans for millennia We can send humans into space but roaming through time has eluded us Do the laws of physics demand that we stay forever trapped in the present This Book Is From the Future will explore Time travel theories and machines of the past present and future Time and the multiverse why wormholes parallel universes and extra dimensions might allow for time travel The paranormal aspects of time Might we already be mentally time traveling Mysterious time shifts slips and warps that people are reporting all over the world Are we experiencing coexisting timelines Time travel conspiracy theories Are we already walking among real time travelers Has a real time machine already been created in a top secret government facility From pop culture fantasies to wild conspiracy theories to the latest scientific thinking This Book Is From the Future is a fascinating exploration of our collective obsession with time Jones and Flaxman cover the subject from just about every angle with a dash of humor and the serious scientific curiosity it deserves Stephen Wagner author of True Tales of the Ouija Board A superb study of how past present and future may be manipulated controlled and even altered Back to the Future and H G Wells s The Time

Boje,2014-06-20 Once upon a time the practice of storytelling was about collecting interesting stories about the past and converting them into soundbite pitches Now it is more about foretelling the ways the future is approaching the present prompting a re storying of the past Storytelling has progressed and is about a diversity of voices not just one teller of one past it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies Within this exciting new book David M Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future This after all is where management practice concentrates its storytelling while much of the theory and method work is all about how the past might recur in the future Storytelling Organizational Practices takes the reader on a journey from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re storying of the past
