This book provides a new opportunity for corporate strategy analysis within a Japanese context. It is the first academic textbook to be published in English which regroups case studies to emphasize key concepts in Japanese management. Where previous literature has set a separate focus on cultural, managerial and strategic variables, a holistic look is now taken at their influence on effective decision making. Over 11 detailed cases depict issues in entering the Japanese market, strategic issues when managing in Japan, marketing management, crisis management, cross cultural encounters and future technologies. The sophistication and depth of these studies along with their teaching notes provide the basis for pragmatic analysis. The mysticism surrounding Japanese culture seems magnified by the success of Japanese companies abroad and the shortcomings of many MNEs that entered Japan ineffectively. Studying the empirical implications of these issues is a helpful exercise to develop more acute management reflexes in a Japanese setting. The book's carefully laid out cases will benefit business and humanities students who are researching Japan as well as professionals who work within this sphere. **Global Companies, Local Innovations** Yasuyuki Motoyama, 2016-04-22. Investigating the innovation activities of multinational corporations, this book uncovers and examines why the geography of innovation by multinationals is overwhelmingly local in spite of their global operations in manufacturing and sales through case studies of product development by three global players: Toyota, Sony and Canon. The microdynamic approach of the book allows an in-depth investigation of the engineering and technical aspects of innovation, making the book unfold the complex and constant process of trial and error in innovation and reveals three fundamental natures of innovation: making complexity, interdisciplinarity and prototyping and testing. In order to manage these three natures of innovation, firms have to plan ironically for unplanned situations and to collocate knowledge, people and resources. *Engines* John L. Lumley, 1999-06-28.
