city of ruins and the epicenter of an explosive growth in images of urban decay In Beautiful Terrible Ruins art historian Dora Apel explores a wide array of these images ranging from photography advertising and television to documentaries video games and zombie and disaster films Apel shows how Detroit has become pivotal to an expanding network of ruin imagery imagery ultimately driven by a pervasive and growing cultural pessimism a loss of faith in progress and a deepening fear that worse times are coming The images of Detroit s decay speak to the overarching anxieties of our era increasing poverty declining wages and social services inadequate health care unemployment homelessness and ecological disaster in short the failure of capitalism Apel reveals how through the aesthetic distancing of representation the haunted beauty and fascination of ruin imagery embodied by Detroit s abandoned downtown skyscrapers empty urban spaces decaying factories and derelict neighborhoods help us to cope with our fears But Apel warns that these images while pleasurable have little explanatory power lulling us into seeing Detroit s deterioration as either inevitable or the city s own fault and absolving the real agents of decline corporate disinvestment and globalization Beautiful Terrible Ruins helps us understand the ways that the pleasure and the horror of urban decay hold us in thrall

Cognitive Media Theory Ted Nannicelli, Paul Taberham, 2014-03-26 Across the academy, scholars are debating the question of what bearing scientific inquiry has upon the humanities. The latest addition to the AFI Film Readers series, *Cognitive Media Theory* takes up this question in the context of film and media studies. This collection of essays by internationally recognized researchers in film and media studies, psychology and philosophy offers film and media scholars and advanced students an introduction to contemporary cognitive media theory, an approach to the study of diverse media forms and content that draws upon both the methods and explanations of the sciences and the humanities. Exploring topics that range from color perception to the moral appraisal of characters to our interactive engagement with videogames, *Cognitive Media Theory* showcases the richness and diversity of cognitivist research. This volume will be of interest not only to students and scholars of film and media but to anyone interested in the possibility of a productive relationship between the sciences and humanities.

Art and Science in Word and Image, 2019-03-27 *Art and Science in Word and Image* investigates the theme of riddles of form, exploring how discovery and innovation have functioned interdependently between art, literature and the sciences. Using the impact of evolutionary biologist D'Arcy Thompson's *On Growth and Form* on Modernist practices as a springboard into the theme, contributors consider engagements with mysteries of natural form in painting, photography, fiction, etc., as well as theories about cosmic forces and other fields of knowledge and enquiry. Hence the collection also deals with topics including cultural inscriptions of gardens and landscapes, deconstructions of received history through word and image, artworks and texts, experiments in poetic materiality, graphic re-mediations of classic fiction and textual transactions with animation and photography. Contributors are Dina Aleshina, Marcia Arbex, Donna T. Canada, Smith Calum, Colvin Francis, Edeline Philippe, Enrico Tienne, Fvriar Madeline, B. Gangnes, Eric T.
