Reconceptualizing the Literacies in Adolescents' Lives Donna E.

Alvermann, Kathleen A. Hinchman, 2012-03-12 Like previous editions the third edition of *Reconceptualizing the Literacies in Adolescents' Lives* invites middle and high school educators to move toward a broad generative view of adolescent literacies. Recognizing that digital media social networking phenomena are now central in adolescents' lives, what is different is the focus in this edition on bridging students' everyday literacies and subject matter learning. Four chapters from earlier editions serve as touchstone texts honoring youth's diverse experiences and illustrating how young people's literacies are enacted, situated, and mediated in various locales. Nine new chapters consider how these themes are lived in today's schools and in the rapidly changing world outside of school. This edition features heightened attention to multimodal meaning construction, more discussion of practical implications of the ideas presented, and co-authored teacher commentaries at the end of each section. A Companion Website new for this edition facilitates practical application of the text's key ideas with discussion questions and links to instructional activities, blogs, additional readings and viewings, and interactive web pages and videos.

New Directions in Teaching English Antero Eidman-Aadahl, Elisa A. Scherff, 2015-03-25 *New Directions in Teaching English: Reimagining Teaching* Teacher Education and Research attempts to create a comprehensive vision of critical and culturally relevant English teaching at the dawn of the 21st century. This book is multi-voiced. It includes perspectives from classroom teachers, teacher educators, and researchers in language and literacy positioned to respond to recent changes in national conversations about literacy learning and assessment. These variously situated authors also recognize the rapidly changing demographics in schools, the changing nature of literacy in the digital age, and the increasing demands for literacy in the workplace. This book is critical. At all times, education is a political act, and schools are embedded within a sociocultural reality that benefits some at the expense of others. Therefore, the approach advocated through many of the chapters is one of critical literacy, where English students gain reading and writing skills and proficiency with digital technologies that allow them to become more able, discerning, and empowered consumers and producers of texts.
