Writing Your Journal Article in Twelve Weeks, a Guide to Academic Publishing Success alex, 2021-04-19 *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* 120 page journal **Librarians as Researchers** Paul C. Campbell, Sarah Nagle, 2025-07-17 This book is designed to empower librarians to develop their research skills and embrace their identities as scholars Many librarians particularly those in academic libraries are expected to engage in research and scholarly output However unlike disciplinary faculty most librarians have not completed a PhD program and many have never designed or participated in original research upon embarking on their career This edited volume provides inspiration and support for academic librarians looking to develop or refresh their research skills and develop their scholarly identities The focus of this book is toward empowering librarians as researchers rather than librarians supporting student or faculty research This book provides a venue for librarians to share their knowledge on different aspects of research as well as build community for other librarians to actualize their own identities as researchers The existing literature and research in the realm of librarian identity development often touches on librarian identities in the face of emerging technologies and new library types or how librarians can support research at their institutions However there is a gap in the literature around librarians developing their own identities as researchers Librarians have a unique role

in the scholarly community we often sacrifice our own research interests so that we can provide support and instruction to others whether it be faculty students or the public But the library world holds immense opportunity for developing and executing original research Additionally conducting research is beneficial to librarians individual practice as well as the library community as a whole This edited volume will provide guidance as well as actionable methods for librarians to develop foundational research philosophies create communities of practice and hone practical skills in a wide range of research areas

Writing Scientific Research in Communication Sciences and Disorder Robert H. Brookshire, Shelley B. Brundage, 2015-11-02 Writing Scientific Research in Communication Sciences and Disorders is a comprehensive guide to the preparation and publication of research papers for researchers in communication sciences and disorders Individual chapters address the structure content and style of the introduction method results and discussion sections of a research paper The balance of the text examines the writing process including the nuts and bolts of preparing tables and graphs reviewing different voices and grammar issues editing your own work working with editors and peer reviewers and getting started toward becoming a productive writer Each topic is illustrated with informative examples with clear direct and often humorous discussion of what makes the examples good or bad Writing is essential in nearly every profession and particularly in communication sciences and disorders where researchers must be able to express complex ideas to a variety of audiences from colleagues to members of health care teams to clients and family members Therefore competency in written expression is required for certification and entry into clinical practice in communication sciences and disorders Writing Scientific Research in Communication Sciences and Disorders will be a valuable supplementary text for undergraduate and graduate students in courses that include writing assignments and critical assessment of research literature such as research methods and evidence based clinical methods courses as well as in thesis and dissertation preparation Researchers looking for a guide to help improve their own writing will also find this text to be an invaluable resource that answers the big and little questions that arise in preparing manuscripts
