Writing At The Margin Discourse Between Anthropology And Medicine:

Writing at the Margin Arthur Kleinman, 1995 This is the work of an energetic scholar whose capacity to read digest and reflect on ideas in diverse domains of inquiry is probably unequaled in the field Sue Estroff author of *Making It Crazy* An important book Charles Leslie coeditor of *Paths to Asian Medical Knowledge*

The Moral Work of Anthropology Hanne Overgaard Mogensen, Birgitte Gorm Hansen, 2021-06-11 Looking at anthropologists at work this book investigates what kind of morality they perform in their occupations and what the impact of this morality is The book includes ethnographic studies in four professional arenas health care business management and interdisciplinary research The discussion is positioned at the intersection of applied or public anthropology and the anthropology of ethics and analyses the ways in which anthropologists can carry out moral work both inside and outside of academia

The Hermeneutics of Medicine and the Phenomenology of Health Fredrik Svenaeus, 2022-07-15 This is the first monograph to deal with medicine as a form of hermeneutics now in a thoroughly revised and updated edition including a whole new chapter on medical ethics The book offers a comprehensive philosophical argument why good medical practice cannot be curtailed to scientific investigations of the body but is a form of clinical hermeneutics performed by health care professionals in dialogue with their patients Medical hermeneutics is rooted in a phenomenology of illness which acknowledges and proceeds from the ill party's bodily feelings everyday life world circumstances and self understanding in aiming to restore health The author shows how the works of classical phenomenologists and hermeneuticians Martin Heidegger Maurice Merleau Ponty Hans Georg Gadamer and Paul Ricoeur may be employed to understand how medical diagnosis is enveloped by professional empathy and clinical judgement and developed by scientific investigations of the patient's bodily condition Health and illness are ultimately considered to be ways of feeling at home or not at home in the world and such experiences are the starting point of medical hermeneutics when aiming to make best use of scientific knowledge The book is aimed at researchers and teachers in philosophy of medicine and medical ethics and at physicians nurses and other health care professionals meeting with patients in ethically complex and challenging situations Phenomenology and hermeneutics most often considered as methods belonging to the humanities are shown to be of vital importance for the understanding of medical practice and ethical dilemmas of health care

Biomedicine as Culture Regula Valérie Burri, Joseph Dumit, 2007-11-21 This collection of essays brings together leading scholars from cultural anthropology history sociology and science studies to conduct a critical dialogue on the culture's of biomedical practice discussing its material epistemic and social implications

The Bridge Between Bioethics and Medical Practice Marko Čurković, Ana Borovečki, 2022-10-14 This book provides insights into dynamic and complex interrelationships between professionalism and medical practice It does so by looking into the most relevant and recent theoretical and practical frameworks and by systematizing and integrating extensive and growing literature on medical professionalism Through honest and prudent contributions from very diverse backgrounds and contexts this book provides an understanding

of medical professionalism derived from a broader historical and cultural context in order to contribute to everyday professional life and practice the very place of its existence The book presents the conflicting and sometimes irreconcilable demands and challenges physicians face in everyday practice A better understanding of these fundamental issues is the only way for medicine to maintain and preserve its unique morality the same one that enabled its existence in the first place The book is relevant for everyone immersed and interested in the subject of medical professionalism as a resource which may ease or guide them through the complexities of issues at hand It will also contribute to the ongoing debate on medical professionalism medical ethics bioethics and professionalism and ethics in general Ethical Problems and Genetics Practice Michael Parker, 2012-04-05 Ethical Problems and Genetics Practice provides a rich case based account of the ethical issues arising in the genetics clinic and laboratory By analysing a wide range of evocative and often arresting cases from practice Michael Parker provides a compelling insight into the complex moral world of the contemporary genetics professional and the challenges they face in the care of patients and their families This book is essential reading for anyone interested in the ethical issues arising in everyday genetics practice Ethical Problems and Genetics Practice is also a sustained engagement with the relationships between bioethics and social science In proposing and exemplifying a new approach to bioethics it makes a significant contribution to debates on methods and interdisciplinarity and will therefore also appeal to all those concerned with theoretical and methodological approaches to bioethics and social science **Caring for the People of the Clouds** Jonathan Yahalom, 2019-04-04 In rural Mexico people often say that Alzheimer's does not exist People do not have Alzheimer's because they don't need to worry said one Oaxacan explaining that locals lack the stresses that people face over there that is in the modern world Alzheimer's and related dementias carry a stigma In contrast to the way elders are revered for remembering local traditions dementia symbolizes how modern families have forgotten the communal values that bring them together In Caring for the People of the Clouds psychologist Jonathan Yahalom provides an emotionally evocative story rich analysis of family caregiving for Oaxacan elders living with dementia Based on his extensive research in a Zapotec community Yahalom presents the conflicted experience of providing care in a setting where illness is steeped in stigma and locals are concerned about social cohesion Traditionally the Zapotec or people of the clouds respected their elders and venerated their ancestors Dementia reveals the difficulty of upholding those ideals today Yahalom looks at how dementia is understood in a medically pluralist landscape how it is treated in a setting marked by social tension and how caregivers endure challenges among their families and the broader community Yahalom argues that caregiving involves more than just a response to human dependency it is central to regenerating local values and family relationships threatened by broader social change In so doing the author bridges concepts in mental health with theory from medical anthropology Unique in its interdisciplinary approach this book advances theory pertaining to cross cultural psychology and develops anthropological insights about how aging dementia and caregiving disclose the intimacies of family life in Oaxaca **The**

African Transformation of Western Medicine and the Dynamics of Global Cultural Exchange David

Baronov,2010-05-14 Beginning with the colonial era Western biomedicine has radically transformed African medical beliefs and practices Conversely in using Western biomedicine Africans have also transformed it The African Transformation of Western Medicine and the Dynamics of Global Cultural Exchange contends that contemporary African medical systems no less biomedical than Western medicine in fact greatly enrich and expand the notion of biomedicine reframing it as a global cultural form deployed across global networks of cultural exchange The book analyzes biomedicine as a complex and dynamic sociocultural form the conceptual premises of which make it necessarily subject to ongoing change and development as it travels the globe David Baronov captures the complexities of this cultural exchange by using world systems analysis in a way that places global cultural processes on equal footing with political and economic processes In doing so he both allows the story of Africa s transformation of Western biomedicine to be told and offers new insights into the capitalist world system

Therapists in Action Robyn Flaum Cruz,Cynthia Florence Berrol,2004 **Society and Medicine** Judith P. Swazey,2017-12-02 The essays in this volume pay tribute to the achievements of Ren e C Fox in the fields of medicine and sociology Many of the contributors are Fox s colleagues and former students from medicine sociology nursing and bioethics The title Society and Medicine reflects the leitmotif in Fox s work her studies of and teaching about the nature of medicine and medical research the training and work of their practitioners the interrelationships between medicine and the societies and cultures of which it is a part and above all the moral and spiritual dimensions of the healing arts *Principles of Chinese Medicine* H. A. I. HONG,2015-07-15 As the world s most comprehensive and deeply researched system of alternative and complementary medicine Chinese medicine enjoys a large following in scientifically developed communities Yet its concepts and principles have been shrouded in mystery and obscure language This path breaking book strips this ancient science of its mystique and metaphysical pretensions and interprets it to strike common ground with biomedical science Concepts like qi and meridians are interpreted not as physical entities but as constructs to facilitate diagnosis and therapy

using heuristic models Written for medical professionals philosophers of medicine and discerning readers interested in holistic therapies the book offers a unique perspective of Chinese medicine in an advanced biomedical world It has practical chapters on cardiovascular disease irritable bowel syndrome and cancer and a compilation of Chinese herbs This second edition of the acclaimed Theory of Chinese Medicine has new material on chronic diseases and the intriguing possible convergence of biomedicine and TCM *Can Precision Medicine Be Personal; Can Personalized Medicine Be Precise?*

Yechiel Michael Barilan, Margherita Brusa, Aaron Ciechanover, 2022 The book provides a multidisciplinary and interdisciplinary discussion of the ethos and ethics of precision personal medicine involving scientists who have shaped the field in dialogue with ethicists social scientists and philosophers of science Languages in Migratory Settings Alison Phipps, Rebecca Kay, 2017-10-02 Research on migration has often focused on push and pull factors and on the mobilities which drive migration What has often received less attention and what this book recognises is the importance of the creative activities which occur when strangers meet and settle for long periods of time in new places Contributions consider case studies in Italy Kyrgyzstan France Portugal and Australia as well as taking a careful look at the Commonwealth City of Glasgow They explore the making and use of literature for adults and children of art installations translation processes in immigration law education materials and intercultural understanding The research reveals the extent to which migration takes a place and takes different forms as life is made anew out of intercultural encounters which have a geographical specificity This shift in focus allows a different lens to be placed on languages intercultural communication and the activities of migration and enables the settings themselves to come under scrutiny This book was originally published as a special issue of Language and Intercultural Communication **English as a Lingua Franca in Migrants' Trauma Narratives** Maria Grazia Guido, 2019-01-08 This book examines how trauma is experienced and narrated differently across languages and cultures drawing on rich ethnographic case studies and a novel cognitive linguistic approach to analyse the variations of English as a Lingua Franca ELF used in the narratives of West African migrants and refugees in the course of intercultural encounters with Italian experts from domain specific fields of discourse including legal medical religious and cultural professionals It examines the ways in which such experts interpret the migrants trauma narratives by applying discourse conventions from within their communities of practice as well as their own native linguacultural norms It argues persuasively for the development of a hybrid ELF mode of intercultural communication to be used by experts in charge of unequal encounters in specialized migration contexts that can accommodate different culture bound categorizations of trauma This timely and important work will appeal in particular to students and scholars of applied linguistics discourse analysis cognitive linguistics intercultural communication pragmalinguistics migration studies and healthcare communication
