Full of practical advice and examples, this book will help you to find a writing strategy that works for you and to develop your own style. Some simple but very effective ideas are used, such as making writing a normal activity, just keeping going and not necessarily starting at the beginning. Roger Watson, Professor of Nursing, University of Hull, UK. The focus of this book is on how to write well. As I have argued previously, we all need to be reminded of the skills required in order to make a difference to our patient clients and their carers' lives. Lifelong learning is the way that we update our knowledge, skills, and competencies. But in order to do this effectively, we need to have the right skill set. The ability to write well is fundamental to our personal and professional learning, and this is regardless of what stage we are in our careers. Writing is a skill that we use every day, be it an email to a friend or an assignment for a course. With practice, we can develop and refine this essential skill. I particularly like the way the authors encourage us to be critical of our writing; this is also

something that we can offer to others as critical friends Sian E Maslin Prothero Professor of Nursing Clinical School of Nursing Midwifery and Sir Charles Gairdner Hospital Edith Cowan University Western Australia The Complete Guide to Performance Appraisal Richard C.
