

Two others are on either side of the front of the DVD drive. Once the screws are removed unplug the IDE cable to the Hard Drive and loosen the power cord from the track it sits in on the drive tray if you miss this step you won't be able to remove the drive. The power cord can be left plugged in on the hard drive, the cord is long enough to allow you to position as desired. The hard drive needs to be lifted straight up for removal and there is no really good way

to grab it, I find sticking a finger in the hole in the front right of the carrier and grasping the rear of the carrier with the other hand works to get it loose, moved up about an inch or so and then lifting it with both hands from the sides to remove it.
