Hayward, 2021-11-29 This companion piece to Susan Hayward's *Film Ecology* focuses on ecology documentaries produced in the first 20 years of the new millennium 2000-19 Using Kate Raworth's regenerative economic theoretical model as set out in *Doughnut Economics* this book examines 57 films emanating from Europe and the 4 areas of concern they raise about energy production pollution and waste management agribusiness disrupted ecosystems and the migratory flow These ecology documentaries make explicit the damage done to our planet thanks to growth capitalism and neoliberal globalisation But they also provide the evidence that solutions to this planetary abuse exist The book demonstrates how these documentaries reveal the process of humankind's planetary plundering and explores the structuring of the eco doc as a new generic type in the domain of documentary practice Using Raworth's model allows us to measure the tentacular extent of the planetary harm growth economics induces and too by way of contrast perceive how regenerative economics can work to redress this harm heal the Earth and make it a safe place for humanity This book is ideal for film studies scholars and students including those teaching or studying film practice documentary film European cinema and environmental studies as well as economists interested in regenerative economic models It also has general appeal to all who are concerned about some of the major causes of planetary degradation and its impact on humanity and Earth Technology and Oligopoly Capitalism Luis

Suarez-Villa, 2023-04-14 *Technology and Oligopoly Capitalism* is a major contribution to our understanding of how technology oligopolies are shaping America's social economic and political reality Technology oligopolies are the most powerful socioeconomic entities in America From cradle to grave the decisions they make affect the most intimate aspects of our lives how we work what we eat our health how we communicate what we know and believe whom we elect and how we relate to one another and to nature Their power over markets trade regulation and most every aspect of our governance is more intrusive and farther reaching than ever They benefit from tax breaks government guarantees and bailouts that we must pay for and have no control over Their accumulation of capital creates immense wealth for a minuscule elite deepening

disparities while politics and governance become ever more subservient to their power They determine our skills and transform employment through the tools and services they create as no other organizations can They produce a vast array of goods and services with labor marketing and research that are more intrusively controlled than ever as workplace rights and job security are curtailed or disappear Our consumption of their products and their capacity to promote wants is deep and far reaching while the waste they generate raises concerns about the survival of life on our planet And their links to geopolitics and the martial domain are stronger than ever as they influence how warfare is waged and who will be vanquished

Technology and Oligopoly Capitalism s critical multidisciplinary perspective provides a systemic vision of how oligopolistic power shapes these forces and phenomena An inclusive approach spans the spectrum of technology oligopolies and the ways in which they deploy their power Numerous previously unpublished ideas expand the repertory of established work on the topics covered advancing explanatory quality to elucidate how and why technology oligopolies operate as they do the dysfunctions that accompany their power and their effects on society and nature This book has no peers in the literature in its scope the unprecedented amount and diversity of documentation the breadth of concepts and the vast number of examples it provides Its premises deserve to be taken into account by every student researcher policymaker and author interested in the socioeconomic and political dimensions of technology in America Seed Money Bartow J.

Elmore, 2021-10-12 Winner of the 2022 IACP Award for Food Issues and Matters Finalist for the 2022 George Perkins Marsh Prize Finalist for the 2022 Hagley Prize in Business History An authoritative and eye opening history that examines how Monsanto came to have outsized influence over our food system Monsanto a St Louis chemical firm that became the world s largest maker of genetically engineered seeds merged with German pharma biotech giant Bayer in 2018 but its Roundup Ready seeds introduced twenty five years ago are still reshaping the farms that feed us When researchers found trace amounts of the firm s blockbuster herbicide in breakfast cereal bowls Monsanto faced public outcry Award winning historian Bartow J Elmore shows how the Roundup story is just one of the troubling threads of Monsanto s past many told here and woven together for the first time A company employee sitting on potentially explosive information who weighs risking everything to tell his story A town whose residents are urged to avoid their basements because Monsanto s radioactive waste laces their homes foundations Factory workers who peel off layers of their skin before accepting cash bonuses to continue dirty jobs An executive wrestling with the ethics of selling a profitable product he knew was toxic Incorporating global fieldwork interviews with company employees and untapped corporate and government records Elmore traces Monsanto s astounding evolution from a scrappy chemical startup to a global agribusiness powerhouse Monsanto used seed money derived from toxic products including PCBs and Agent Orange to build an agricultural empire promising endless bounty through its genetically engineered technology Skyrocketing sales of Monsanto s new Roundup Ready system stunned even those in the seed trade who marveled at the influx of cash and lavish incentives into their sleepy sector But as new data

emerges about the Roundup system and as Bayer faces a tide of lawsuits over Monsanto products past and present Elmore s urgent history shows how our food future is still very much tethered to the company s chemical past Globalization is a form of Colonialism ,2015-01-20 Essay from the year 2011 in the subject Politics Topic Globalization Political Economics grade 1 3 language English abstract This paper analyzes the historical phenomenon of colonialism and globalization and the similarities in their ideologies In addition using examples of nations and multinational corporations this paper tries to find economic and social connections between colonialism and globalization in the behavior of suppressor and oppressor Furthermore the term neo colonialism is going to be researched and some recent examples of expansion and discrimination in different countries are shown Z Magazine ,2008 **Traffic World** ,1991 The Arizona Quarterly ,2011 *World According to Monsanto* Robin Marie-Monique,2013 The Ecologist ,2008 **The Publishers Weekly** ,1880 Digital Talking Books Plus ,2013 *Talking Book Topics* ,2013-03 Electrical World ,1969 *Drug and Chemical Markets* ,1914 Solving International Financial & Currency Problems Business International Corporation,1976
