where it was used in food preparations and as remedy against a great number of diseases In Asia the first records about vinegar date back to the Zhou Dynasty 1027-221 BC and probably China's ancient rice wines may have originally been derived from fruit for which malted rice was substituted later The historical and geographical success of vinegars is mainly due to the low technology required for their production and to the fact that several kinds of raw materials rich in sugars may easily be processed to give vinegar In addition vinegars are well known and accepted as safe and stable commodities that can be consumed as beverages health drinks or added to food as preservatives or as flavoring agents *The Countryman*, 1949
