The World Of Roman Song The World Of Roman Song:

The World of Roman Song Thomas N. Habinek, 2005-07-27 In this bold work Thomas Habinek offers an entirely new theoretical perspective on Roman cultural history Although English words such as literature and religion have their origins in Latin the Romans had no such specific concepts Rather much of the sense of these words was captured in the Latin word *carmen* usually translated into English as song Habinek argues that for the Romans song encompassed a wide range of ritualized speech including elements of poetry storytelling and even the casting of spells Habinek begins with the fraternal societies or *sodalitates* which predated the Republic and endured into the Imperial era and whose rites although adapted over time to different deities and cults were from the beginning centered on song perhaps most notably in the ancient *Carmen Saliare* He goes on to show how this early use of song became a paradigm for cultural reproduction throughout Roman history Ritual mastery of the chaos of everyday life embodied and enacted in song produced and transmitted the beliefs on which Roman culture was founded and by which Roman communities were sustained By the emergence of the Empire song in all of its senses served in particular to reproduce the power of the state organizing relations of power at every level of society Johns Hopkins University Press

Imagining the Chorus in Augustan Poetry Lauren Curtis, 2017-09-14 From archaic Sparta to classical Athens the chorus was a pervasive feature of Greek social and cultural life Until now however its reception in Roman literature and culture has been little appreciated This book examines how the chorus is reimagined in a brief but crucial period in the history of Latin literature the early Augustan period from 30 to 10 BCE It argues that in the work of Horace Virgil and Propertius the language and imagery of the chorus articulate some of their most pressing concerns surrounding social and literary belonging in a rapidly changing Roman world By re-examining seminal Roman texts such as Horace's Odes and Virgil's Aeneid from this fresh perspective the book connects the history of musical culture with Augustan poetry's interrogation of fundamental questions surrounding the relationship between individual and community poet and audience performance and writing Greek and Roman and tradition and innovation

Written Space in the Latin West, 200 BC to AD 300 Gareth Sears, Peter Keegan, Ray Laurence, 2013-07-18 This volume explores the creation of written spaces through the accretion of monumental inscriptions and non-official graffiti in the Latin-speaking West between c. 200 BC and AD 300 The shift to an epigraphic culture demonstrates new mentalities regarding the use of language the relationship between local elites and the population and between local elites and the imperial power The creation of both official and non-official inscriptions is one of the most recognisable facets of the Roman city The chapters of this book consider why urban populations created these written spaces and how these spaces in turn affected those urban civilisations They also examine how these inscriptions interacted to create written spaces that could inculcate a sense of Roman-ness into urban populations whilst also acting as a means of differentiating communities from each other The volume includes new approaches to the study of political entities social institutions graffiti and painting and
