Theory of Hypnosis A very comprehensive theory of hypnosis is presented based on solid principles of conditioning and inhibition, one that encompasses and supersedes all current theories, pointing out similarities and differences. Covers all three aspects of hypnosis: induction, process, hypnotic and post-hypnotic phenomena. Wide Scope The theory not only presents a rational explanation for hypnosis aimed at removing the mystery, misunderstanding and disbelief for hypnosis but also a number of important related concepts including free will, the placebo, faith and even God. It is pointed out that all these concepts are tied in with the concept of belief with hypnosis defined as a state of heightened belief and belief defined as concentration on a thought to the exclusion of anything contradicting that thought. Main Value Main value of hypnosis is shown to be its ability to facilitate change or re-programming.
