Theory Of Unipolar Politics Cambridge Studies In International Relations:

Theory of Unipolar Politics Nuno P. Monteiro, 2014-04-21 Since the collapse of the Soviet Union the United States has enjoyed unparalleled military power The international system is therefore unipolar A quarter of a century later however we still possess no theory of unipolarity Theory of Unipolar Politics provides one Dr Nuno P Monteiro answers three of the most important questions about the workings of a unipolar world Is it durable Is it peaceful What is the best grand strategy a unipolar power such as the contemporary United States can implement In our nuclear world the power preponderance of the United States is potentially durable but likely to produce frequent conflict Furthermore in order to maintain its power preponderance the United States must remain militarily engaged in the world and accommodate the economic growth of its major competitors namely China This strategy however will lead Washington to wage war frequently In sum military power preponderance brings significant benefits but is not an unalloyed good *Nuclear Politics* Alexandre Debs, Nuno P.

Monteiro, 2017 A comprehensive theory of the causes of nuclear proliferation alongside an in depth analysis of sixteen historical cases of nuclear development **International Relations Theory and European Security** Lorenzo Cladi, Andrea Locatelli, 2015-08-20 This book engages with key contemporary European security issues from a variety of different theoretical standpoints in an attempt to uncover the drivers of foreign policy and defence integration in the EU Although European foreign policy has been attracting an ever increasing number of International Relations IR scholars since the end of the Cold War consensus on what drives European foreign policy integration has not yet emerged This book seeks to encourage debate on this issue by examining a wide range of high profile security issues which have roused significant interest from policy makers academics and the public in recent years The volume discusses amongst other issues the strategic posture of the European Union as a security actor the troubled relationship with Russia the debate regarding France's relations with the US following France's rapprochement with NATO and the EU's influence in the Israeli Palestinian conflict The collective intent of the contributors to highlight the drivers of EU foreign policy and defence integration ties together the wide variety of topics covered in this volume forming it into a comprehensive overview of this issue By paying considerable attention not just to the internal drivers of EU cooperation but also to the critical role played by the US as an incentive or obstacle to European security this book presents a unique contribution to this field of debate This book will be of much interest to students of European security IR theory Transatlantic Relations European politics and EU foreign policy

Abiding Influence Giuseppe Paparella, 2025-11-04 How do nationalist beliefs shape and influence American foreign policy What are the contemporary implications of America's long standing engagement in the Asia Pacific This book unearths the varied processes underpinning the relationship between nationalism and the formulation of foreign policy highlighting the central function of leaders nationalist beliefs in the history of America's international behavior By developing a novel theoretical framework and drawing on original archival research and methods of process tracing Paparella shows how

presidents nationalist beliefs can influence distinct foreign policy attitudes that have underpinned important foreign policy decisions and turning points in the Asia Pacific By putting nationalism back on center stage Paparella makes a strong case for looking at this history as a complex succession of interactions between states but also between leaders that are highly contingent and shaped by the nationalist views of the leading US decision makers over time This thoughtful study provides scholars and students with an interpretative key to understand the multifaceted role of the United States in the Asia Pacific as well as policy recommendations to overcome the security and the credibility challenges posed by the rise of China in the region today

The Return of Bipolarity in World Politics Øystein Tunsjø, 2018-02-27 Since the collapse of the Soviet Union the international system has been unipolar centered on the United States But the rise of China foreshadows a change in the distribution of power ystein Tunsj shows that the international system is moving toward a U S China standoff bringing us back to bipolarity a system in which no third power can challenge the top two The Return of Bipolarity in World Politics surveys the new era of superpowers to argue that the combined effects of the narrowing power gap between China and the United States and the widening power gap between China and any third ranking power portend a new bipolar system that will differ in crucial ways from that of the last century Tunsj expands Kenneth N Waltz s structural realist theory to examine the new bipolarity within the context of geopolitics which he calls geostructural realism He considers how a new bipolar system will affect balancing and stability in U S China relations predicting that the new bipolarity will not be as prone to arms races as the previous era s that the risk of limited war between the two superpowers is likely to be higher in the coming bipolarity especially since the two powers are primarily rivals at sea rather than on land and that the superpowers are likely to be preoccupied with rivalry and conflict in East Asia instead of globally Tunsj presents a major challenge to how international relations understands superpowers in the twenty first century

International Relations Theory of War Ofer Israeli, 2019-04-10 Covering 1816 2016 this book deals extensively with the international system as well as the territorial outcomes of several key wars that were waged during that time period providing an instructive lesson in diplomatic history and international relations among global powers Based on an in depth review of the leading theories in the field of international relations International Relations Theory of War explains an innovative theory on the international system developed by the author that he applies comprehensively to a large number of case studies The book argues that there is a unipolar system that represents a kind of innovation relative to other systemic theories It further posits that unipolar systems will be less stable than bipolar systems and more stable than multipolar systems providing new insights relative to other theories that argue that unipolar systems are the most stable ones The first chapter is devoted to explaining the manner of action of the two dependent variables systemic international outcome and intra systemic international outcome The second chapter presents the international relations theory of war and its key assumptions The third chapter precisely defines the distribution of power in the system The fourth chapter examines the theory s two key phenomena The fifth and last chapter

presents the book's conclusions by examining the theoretical assumptions of the international relations theory of war

National perspectives on a multipolar order Benjamin Zala, 2021-10-26 The global distribution of power is changing But how should we make sense of this moment of transition With the rise of new powers and the decline of seemingly unchallenged US dominance in world politics a conventional wisdom is gaining ground that a new multipolar order is taking shape Yet multipolarity an order with multiple centres of power is variously used as a description of the current distribution of power of the likely shape of a future global order or even as a prescription for how power should be distributed in the international system To understand the power of the different and sometimes competing narratives on offer today about the changing global order a global perspective is necessary This book explores how the concept of a multipolar order is being used for different purposes in different national contexts From rising powers to established powers contemporary debates are analysed by a set of leading scholars to provide in depth insight into the use and abuse of a widely employed but rarely explored concept

Middle Powers and Regional Influence Joshua B. Spero, 2018-11-16 In the growing literature on middle powers this book contributes by expanding case study analysis and extending international relations theory in its application to foreign policy decisions Thus this book builds on prominent middle power literature and aims to advance our theoretical understanding for why crucial foreign policies were made by the pivotal middle powers this book examines Poland South Korea and Bolivia For this book's three case studies and their first term leadership's critical junctures from first term post communist Poland post authoritarian post ruling party South Korea and post colonial Bolivia we have the antecedents for contemporary middle powers essential for realizing the regional evolution for cooperative change with greater powers systemically we may then grasp today why those historical foreign policies albeit not so long ago give us crucial antecedents for adapting and trying yet again to resolve seemingly perennial power dilemmas regionally peacefully Here are why middle power impact matters not only regionally for stronger dominant greater power neighbours but also for transformative middle power leaderships which proved pivotal geopolitically for their region's challenges and changes

The Making of the Asia Pacific See Seng Tan, 2025-10-01 This illuminating volume critically surveys the power of narratives in shaping the discourse on the post Cold War Asia Pacific The author examines the purposes practices power relations and protagonists behind policy networks such as the Council for Security Cooperation in the Asia Pacific and the Pacific Economic Cooperation Council

Realism and Institutionalism in International Studies Michael Brecher, Frank P. Harvey, 2002-08-20 Realism and Institutionalism in International Studies represents a unique collection of original essays by foremost scholars in the field of International Studies Six essays advocate critique or revise Realism the theoretical paradigm that explains international politics by emphasizing security competition and war among states The remaining four essays address Institutionalism the paradigm that offers explanations for the formation maintenance variation and significance of international institutions The authors reflect on the strengths and weaknesses of these approaches and suggest research agendas for the future Together

this volume provides an accessible and wide ranging survey of the issues concerning two major paradigms in International Studies This volume will be of interest to scholars and students alike and will undoubtedly determine the shape of future research Twentieth Century International Relations: The United States : from superpower to empire Michael Cox,2006

International Relations and Scientific Progress Patrick James,2002 International Relations and Scientific Progress argues that a theory focusing on the structure of the international system may explain a wider and more interesting range of events in world politics than other alternatives The first part of the book assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part review structural realism within that context and makes the case for an elaboration of structural realism by showing that a system level theory based on structure could have great unrealized explanatory potential The third part explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system Patrick James is professor of political science at the University of Missouri **Research Review** ,2005 **Nuclear Politics** Alexandre Debs,Nuno P. Monteiro,2016-12-15 When do states acquire nuclear weapons Overturning a decade of scholarship focusing on other factors Debs and Monteiro show in Nuclear Politics that proliferation is driven by security concerns Proliferation occurs only when a state has both the willingness and opportunity to build the bomb A state has the willingness to nuclearize when it faces a serious security threat without the support of a reliable ally It has the opportunity when its conventional forces or allied protection are sufficient to deter preventive attacks This explains why so few countries have developed nuclear weapons Unthreatened or protected states do not want them weak and unprotected ones cannot get them This powerful theory combined with extensive historical research on the nuclear trajectory of sixteen countries will make Nuclear Politics a standard reference in international security studies informing scholarly and policy debates on nuclear proliferation and US non proliferation efforts for decades to come *Strategy and Force Planning* ,2004 American Book Publishing Record ,2007 **The Globalization of**

World Politics John Baylis,Steve Smith,1997 An introductory text for students with no previous knowledge of contemporary world politics After an overview chapter on the concept of globalization and arguments for and against it four sections cover the historical background to contemporary world politics major theories structures and process of world politics and leading issues such as nuclear proliferation human rights global trade and finance and gender Chapters include case studies key points glossaries summaries and discussion questions Annotation copyrighted by Book News Inc Portland OR
