Therapeutic Uses Of Botulinum Toxin Therapeutic Uses Of Botulinum Toxin:

Therapeutic Uses of Botulinum Toxin Grant Cooper, 2007-10-05 Justinius Kerner a German medical officer and poet was the first to realize that botulinum toxin potentially might be useful for therapeutic purposes Kerner made this observation in 1822 but he did not call the toxin botulinum toxin Instead Kerner called it the substance in wirkenden stoffes which translates to bad sausages Kerner realized that there was a fat poison or fatty acid within sausages that produced the toxic effects that we now know as botulism Nearly a century would pass before the bacterium producing the toxin would be isolated and the toxin ultimately renamed botulinum toxin As farsighted as Kerner was it is doubtful that even he could have predicted just how much potential therapeutic punch was packed within his wirkenden stoffes It was not until 1978 more than a century and a half after Kerner's prediction that Dr Allan Scott received Food and Drug Administration approval to test botulinum toxin type A in human volunteers We do not yet have a comprehensive understanding of precisely how botulinum toxin works in the human body or how our bodies fully respond to the toxin We do know that it temporarily paralyzes muscle by inhibiting the release of acetylcholine and it also appears to inhibit the release of other neurotransmitters Scientific and Therapeutic Aspects of Botulinum Toxin Mitchell F. Brin, Mark Hallett, Joseph Jankovic, 2002 Written by an international group of noted basic scientists and clinicians this volume presents state of the art information on the mechanisms of action pharmacology neurophysiological effects and therapeutic uses of botulinum neurotoxins A major portion of the book reviews recent clinical experience and clinical trials with botulinum toxin therapy for strabismus dystonia juvenile cerebral palsy spasticity hyperhidrosis gastrointestinal and genitourinary disorders headache cosmetic facial conditions and various disorders involving excessive muscle contraction or pain Other chapters examine the immunology of botulinum toxins the use of other chemodenervating agents and the development of novel neurotoxin constructs **Botulinum Toxin** James Clark, 2022 Botulism is a serious illness whose symptoms include difficulty speaking and paralysis The disease is caused by botulinum toxin a neurotoxic protein produced by the bacterium *Clostridium botulinum* and while the disease can be fatal intensive treatment can prevent death in most cases However botulinum toxin can also be used as treatment for various illnesses when applied in correct doses This volume includes four chapters that describe various therapeutic uses of botulinum toxin Chapter One reviews the mechanism of action therapeutic uses best practices current applications effectiveness and available evidence of botulinum toxin application in various musculoskeletal disorders Chapter Two focuses on the technical aspects of botulinum toxin use for treatment of sialorrhea and reported outcomes Chapter Three describes the use of botulinum toxin as treatment for hyperkinetic movement disorders including blepharospasm oromandibular dystonia and hemifacial spasm Lastly Chapter Four deals with the use of botulinum toxin for treatment of hemimasticatory and hemifacial spasm in scleroderma Botulinum Toxin James C.
