Citizenship Nigel Dower,John Williams,2016-04-22 The idea of global citizenship is that human beings are citizens of the world Whether or not we are global citizens is a topic of great dispute however those who take part in the debate agree that a global citizen is a member of the wider community of humanity the world or a similar whole which is wider than that of a nation state or other political community of which we are normally thought to be citizens Through four main sections the contributors to Global Citizenship discuss global challenges and attempt to define the ways in which globalization is changing the world in which we live Offering a breadth of coverage to the core theme of the individual in a global world Global Citizenship combines two factors the idea of global responsibility and the development of institutional structures through which this responsibility can be exercised **The American Journal of Islamic Social Sciences** ,2001 **Historical**

The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In National Culture and the New Global System he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order Exotic Commodities Frank

Dikötter,2006 Exotic Commodities is the first book to chart the consumption and spread of foreign goods in China from the

mid nineteenth century to the advent of communism in 1949 Richly illustrated and revealing this volume recounts how exotic commodities were acquired and adapted in a country commonly believed to have remained hostile toward alien things during the industrial era China was not immune to global trends that prized the modern goods of civilized nations Foreign imports were enthusiastically embraced by both the upper and lower classes and rapidly woven into the fabric of everyday life often in inventive ways Scarves skirts blouses and corsets were combined with traditional garments to create strikingly original fashions Industrially produced rice sugar wheat and canned food revolutionized local cuisine and mass produced mirrors were hung on doorframes to ward off malignant spirits Frank Dik tter argues that ordinary people were the least inhibited in acquiring these products and therefore the most instrumental in changing the material culture of China Landscape paintings door leaves and calligraphy scrolls were happily mixed with kitschy oil paintings and modern advertisements Old and new interacted in ways that might have seemed incongruous to outsiders but were perfectly harmonious to local people This pragmatic attitude would eventually lead to China s own mass production and export of cheap modern goods which today can be found all over the world The nature of this history raises the question which Dik tter pursues in his conclusion If the key to surviving in a fast changing world is the ability to innovate could China be more in tune with modernity than Europe *IR* Michael G. Roskin, Nicholas O.
