Eating Ourselves Sick Louise Stephen,2017-01-31 Louise Stephen's powerful no holds barred demolition of Big Food dissects the profit motive that has filled our food supply with toxic oils and sugar and shows us how money is destroying our health DAVID GILLESPIE Our diet has changed radically in the space of 100 years We have swapped home cooked food made with whole ingredients for processed food made from sugar seed oils and refined wheat Modern day food is cheap convenient and accessible but also hugely destructive to our health Former business consultant Louise Stephen developed an autoimmune disease in her early thirties which led to renal failure and a kidney transplant As a middle class professional from a wealthy Western country she was perplexed as to how she had become so ill She started to investigate using her business and research skills to find out what she could about diet and how it relates to health What she uncovered will change the way you think about processed food frozen dinners breakfast cereals packaged snacks dips flavoured drinks bottled sauces and the industry that is profiting from the commodification and toxication of our food supply Stephen shows us how Big Food is picking up where Big Tobacco left off employing skilful marketing to nudge us towards increasingly processed food while hoping we'll fail to notice the commensurate rise in obesity and decline in health Stephen reveals how governments and peak health bodies are often powerless to intervene and even worse are sometimes complicit in convincing us to ditch our wholefood ingredients for factory made products This is not a diet book Meticulously researched and compellingly argued *Eating Ourselves Sick* shines a light on the powerful forces that stand between us and a healthy diet

Nutrition in Crisis Richard David Feinman,2019 Why Low Carb Should Be the Default Approach for Managing and Preventing Metabolic Syndrome and Other Chronic Diseases Almost every day it seems a new study is published that shows you are at risk for diabetes cardiovascular disease or all cause mortality due to something you've just eaten for lunch Many of us no longer know what to eat or who to believe In the Nutrition Revolution distinguished biochemist Richard Feinman PhD cuts through the noise explaining the intricacies of nutrition and human metabolism in accessible terms He lays out the tools

you need to navigate the current confusion in the medical literature and its increasingly bizarre reflection in the media At the same time The Nutrition Revolution offers an unsparing critique of the nutritional establishment which continues to demonize fat and refute the benefits of low carbohydrate and ketogenic diets all despite decades of evidence to the contrary

Feinman tells the story of the first low carbohydrate revolution fifteen years ago how it began what killed it and why a second revolution is now reaching a fever pitch He exposes the backhanded tactics of a regressive nutritional establishment that ignores good data and common sense and highlights the innovative work of those researchers who have broken rank

Entertaining informative and irreverent Feinman paints a broad picture of the nutrition world the beauty of the underlying biochemistry the embarrassing failures of the medical establishment the preeminence of low carbohydrate diets for weight loss diabetes other metabolic diseases and even cancer and what's wrong with the constant reports that common foods represent a threat rather than a source of pleasure
