Eurasian Maritime Geopolitics Kent E. Calder, 2025-02-07 *Eurasian Maritime Geopolitics* by Kent E Calder examines the strategic geography of the sea lanes from Northeast Asia through the Indian Ocean to Europe through which much of the world s energy and information flow Calder shows how changing technology and economic patterns have profoundly transformed the global significance of those passageways since the end of the Cold War with fateful consequences for the strategic calculations of both the United States and a rising China The decline of the US shipping and shipbuilding sectors coupled with the rise of their Chinese counterparts is a major part of this hybrid equation The book provides readers a history of the changing economic role of the sea lanes as well as the decline of US maritime competitiveness It chronicles how maritime flows of energy commodities and information through submarine cables have increased Calder s clear eyed assessment documents the uncertainties relating to Eurasian sea lanes stretching from Taiwan to the Red Sea and beyond in the post Ukraine world

The United States, China, and the Competition for Control Melanie W. Sisson, 2024-11-22 This book considers whether the United States and the People s Republic of China have irreconcilable visions of world order The United States China and the Competition for Control evaluates the twin claims that China seeks to dismantle the post World War II international order and that the United States seeks to defend it It defines the post war order and examines how the United States and China have behaved within and in relation to it since 1945 An analysis of the two states rhetoric and policy reveals

that their preferences for international order are not as divergent as today's conventional wisdom suggests. The book therefore concludes that U.S. policies that treat China as a threat to international order are misplaced and offers policy recommendations for how the United States can both preserve the post-war order and protect its vital national interests. The book will be of interest to foreign policy practitioners, commentators and analysts as well as students and scholars of security studies, international relations and geopolitics. **America Since World War II** Jean Christie, Leonard Dinnerstein, 1976
