Fictions of Language and the Languages of Fiction Monika Fludernik, 2003-12-16 Monika Fludernik presents a detailed analysis of free indirect discourse as it relates to narrative theory and the crucial problematic of how speech and thought are represented in fiction Building on the insights of Ann Banfield's *Unspeakable Sentences* Fludernik radically extends Banfield's model to accommodate evidence from conversational narrative non-fictional prose and literary works from Chaucer to the present Fludernik's model subsumes earlier insights into the forms and functions of quotation and aligns them with discourse strategies observable in the oral language Drawing on a vast range of literature she provides an invaluable resource for researchers in the field and introduces English readers to extensive work on the subject in German as well as comparing the free indirect discourse features of German French and English This study effectively repositions the whole area between literature and linguistics opening up a new set of questions in narrative theory

The Impotency Poem from Ancient Latin to Restoration English Literature Hannah Lavery, 2016-03-03 The first book length study of the motif of impotency in poetry from early antiquity through to the late Restoration this book explores the impotency poem as a recognisable form of poetry in the longer tradition of erotic elegy Hannah Lavery's central claim is that the impotency motif is adopted by poets in recognition of its potential to signify satirically through its use as symbol and allegory By drawing together analysis of works in the tradition Lavery shows how the impotency motif is used to engage with anxieties as to what it means to enact service within political and social contexts She demonstrates that impotency poems can be seen on one level to represent bawdy escapism but on the other to offer positions of resistance and opposition to social and political concerns contemporary to a particular time Whilst the link between the *Imperfect Enjoyment* poems by Ovid and Rochester is well known Lavery here looks further back to the origins of the concept of male impotency as degradation in the works of earlier Roman poets This is an important context for considering how the impotency poem then first appears in the French and English vernaculars during the sixteenth century leading to translations and adaptations throughout the seventeenth century Lavery's close readings of the poems consider both the nature of the literary form and the political and social contexts within which the works appear in order to chart the intertextual development of the impotency poem as a distinct form of writing in the early modern period
