On the Alternation of Generations, Or The Propagation and Development of Animals Through Alternate Generations Joh. Japetus Steenstrup, 1845

Connecting Generations Hayim Herring, 2019-05-08 Social isolation loneliness and suicide are conditions we often associate with the elderly But in reality these issues have sharply increased across younger generations Baby Boomers Gen X ers Millennials and post Millennials all report a declining number of friends and an increasing number of health issues associated with loneliness Even more concerning it appears that the younger the generation the greater the feelings of disconnection Regardless of age it feels as though we re living through a period of ongoing disequilibrium because we re not able to adapt quickly enough to the social and technological changes swirling around us These powerful changes have not only isolated individuals from their own peers but have contributed to becoming an age segregated society And yet we need fulfilling relationships with people our own age and across the generations to lead lives that are rich in meaning and purpose Even in those rare communities where young and old live near each other they lack organic settings that encourage intergenerational relationships In addition it isn t technology but generational diversity that is our best tool for navigating the changes that affect so many aspects of our lives whether it s work entertainment education or family dynamics We can t restore yesterday s model of community where only those who were

older transmitted wisdom downward to the generation below But we can relearn how much members of different generations have to offer each other and recreate intergenerational communities for the 21st century where young old and everyone in between is equally valued for their perspectives and where each generation views itself as having a stake in the other's success Here Hayim Herring focuses more deeply on how Baby Boomers Gen Xers and Millennials perceive one another and looks underneath the generational labels that compound isolation He offers ways we can prepare current and future generations for a world in which ongoing interactions with people from multiple generations become the norm and re-experience how enriching intergenerational relationships are personally and communally **Generations, Political**

Participation and Social Change in Western Europe Maria Grasso, 2016-03-31 This new comparative analysis shows that there are reasons to be concerned about the future of democratic politics Younger generations have become disengaged from the political process The evidence presented in this comprehensive study shows that they are not just less likely than older generations to engage in institutional political activism such as voting and party membership they are also less likely to engage in extra institutional protest activism **Generations Political Participation and Social Change in Western Europe** offers a rigorously researched empirical analysis of political participation trends across generations in Western Europe It examines the way in which the political behaviour of younger generations leads to social change Are younger generations completely disengaged from politics or do they simply choose to participate in a different way to previous generations The book is of key interest to scholars students and practitioners of political sociology political participation and behaviour European Politics Comparative Politics and Sociology [The Shift Age Generations \(Entering the Shift Age, eBook 4\)](#) David Houle, 2012-11-01
