Graff,2024-11-12 One of the rare books on the topic that manages to be both entertaining and factually grounded The Wall Street Journal From the bestselling author of Raven Rock The Only Plane in the Sky and Watergate finalist for the Pulitzer Prize in history comes the first comprehensive and eye opening exploration of our government s decades long quest to solve one of humanity s greatest mysteries Are we alone in the universe For as long as we have looked to the skies the question of whether life on earth is the only life to exist has been at the core of the human experience driving scientific debate and discovery shaping spiritual belief and prompting existential thought across borders and generations It s one of our culture s favorite conversations and yet the idea of extraterrestrial intelligence has been largely banished to the realm of fantasy and conspiracy Now for the first time the full story of our national obsession with UFOs and the covert search by scientists the United States military and the CIA for proof of alien life is told by bestselling author and Pulitzer Prize finalist Garrett M Graff in a deeply reported and researched history It begins

in 1947 when two headline making sightings of strange flying objects prompt the US Air Force's newly formed Department of Defense to create a series of secret programs to determine how unidentified phenomena may pose a threat to national security. Over the next half century as the atomic age gives way to the space race and the Cold War the mission continues bringing together an unexpected group of astronomers, military officials, civilian contactees and true believers who bring us closer then further then closer again to answering one of our most enduring questions: What exactly is out there? Drawing from original archival research, declassified documents and interviews with senior intelligence and military officials, Graff brings readers a story that's loads of fun, a fascinating deep dive down the rabbit hole. *Publishers Weekly* *Dreamland* Phil Patton, 2012-10-31. There is a place in the Nevada desert the size of Belgium that doesn't officially exist. It is the airbase where test flights of our top secret experimental military aircraft are conducted and not coincidentally where the conspiracy theorists insist the Pentagon is hiding UFOs and aliens. This is Dreamland or Area 51. For Phil Patton the idea of writing a travel account of a place he couldn't actually visit was irresistible. What he found was a world where Chick Yeager and the secret planes of the Cold War converged with the Nevada Test Site and alien landings at Roswell. A think tank for aviation engineering, Dreamland can be seen from a summit outside the base's perimeter, a hundred miles north of Las Vegas. On Freedom Ridge groups of airplane buffs gather with their camouflage outfits and binoculars. These are the Stealth chasers, the Skunkers, guys with code names like Agent X and Zero, hoping for a glimpse of the rumored raylike shapes of planes like Black Manta and the mother ship. The most mysterious craft is Aurora, the successor to the legendary U-2, said to run on methane and fly as fast as Mach 6. Scanning the same horizon, the UFO buffs are looking for the hovering lights and doughnut shaped contrails of alien aircraft. Are they looking at something sinister and mysterious? Imagined? Or more terrestrial than they think? Dreamland shows how much we need mystery in the information age and how the cultures of nuclear power and airpower merge with the folklores of extraterrestrials and earthly conspiracies. Patton found people who found themselves in the mysteries of the place. John Lear, the son of aviation pioneer Bill Lear who gave his name to the jet, served as a pilot for the CIA's Air America but back home he became fascinated by UFOs and eventually believed in it all: the underground bases, the alien-human hybrids, the secret treaties. But was he a true believer or part of a disinformation campaign? Bob Lazar seems to know when the saucers will come and has made three clear sightings at night along Dreamland's perimeter, but is his story real or a vision of what's possible? Dreamland is an exploration of America's most secret place, the base for our experimental airplanes, the fount of UFO rumors, an offshoot of the Nevada Test Site. How this blackspot came to exist, its history, its creators, its spies and counterspies, is Phil Patton's tale. He tunnels into the subcultures of the conspiracy buffs, the true believers and the aeronautic geniuses, creating a novelistic tour de force destined to make us all rethink our convictions about American know-how and alien inventiveness. **JFK & UFO** Kenn Thomas, 2011-06-01. A witness to the first UFO sighting in modern times was also believed by Jim Garrison to have shot JFK. *Aliens and UFOs: Physical, Psychic or Social*
