## **Thinking About Oneself From Nonconceptual Content To The Concept Of A Self:**

**Thinking about Oneself** Kristina Musholt, 2015-07-31 A novel theory of self consciousness and its development that integrates philosophical considerations with recent findings in the empirical sciences In this book Kristina Musholt offers a novel theory of self consciousness understood as the ability to think about oneself Traditionally self consciousness has been central to many philosophical theories More recently it has become the focus of empirical investigation in psychology and neuroscience Musholt draws both on philosophical considerations and on insights from the empirical sciences to offer a new account of self consciousness the ability to think about ourselves that is at the core of what makes us human Examining theories of nonconceptual content developed in recent work in the philosophy of cognition Musholt proposes a model for the gradual transition from self related information implicit in the nonconceptual content of perception and other forms of experience to the explicit representation of the self in conceptual thought A crucial part of this model is an analysis of the relationship between self consciousness and intersubjectivity Self consciousness and awareness of others Musholt argues are two sides of the same coin After surveying the philosophical problem of self consciousness the notion of nonconceptual content and various proposals for the existence of nonconceptual self consciousness Musholt argues for a non self representationalist theory according to which the self is not part of the representational content of perception and bodily awareness but part of the mode of presentation She distinguishes between implicitly self related information and explicit self representation and describes the transitions from the former to the latter as arising from a complex process of self other differentiation By this account both self consciousness and intersubjectivity develop in parallel *Franz Brentano's Philosophy After One Hundred Years* Denis Fisette, Guillaume Fréchette, Hynek Janoušek, 2021-01-11 This volume brings together contributions that explore the philosophy of Franz Brentano It looks at his work both critically and in the context of contemporary philosophy For instance Brentano influenced the phenomenology of Edmund Husserl the theory of objects of Alexius Meinong the early development of the Gestalt theory the philosophy of language of Anton Marty the works of Carl Stumpf in the psychology of tone and many others Readers will also learn the contributions of Brentano's work to much debated contemporary issues in philosophy of mind ontology and the theory of emotions The first section deals with Brentano's conception of the history of philosophy The next approaches his conception of empirical psychology from an empirical standpoint and in relation with competing views on psychology from the period The third section discusses Brentano's later programme of a descriptive psychology or descriptive phenomenology and some of his most innovative developments for instance in the theory of emotions The final section examines metaphysical issues and applications of his mereology His reism takes here an important place The intended readership of this book comprises phenomenologists analytic philosophers philosophers of mind and value as well as metaphysicians It will appeal to both graduate and undergraduate students professors and researchers in philosophy and psychology *The Developmental Psychology of Personal Identity* Massimo

Marraffa,Cristina Meini,2024-03-21 Massimo Marraffa and Cristina Meini re connect the psychology of identity with its philosophical roots in this study They trace the contemporary problem of the self to John Locke and William James foundational theories on personal identity By integrating the philosophy of identity with empirical and neuropsychological research Marraffa and Meini provide an original synthesis of multidisciplinary conceptions of the self The Developmental Psychology of Personal Identity builds on Chomsky inspired developmental psychology Jean Piaget s constructivism Lev Vygotskij s sociocultural perspective on development and John Bowlby s attachment theory In this theoretical framework the book draws on the data of the psychological sciences to reconstruct the trajectory of the self as a Lockean person i e as morally responsible agent The authors link the birth of self consciousness through the body and emotions to the construction of a narrative self Their combination of philosophy and cognitive sciences makes an important contribution to multiple disciplines concerned with personal identity It provokes new routes to understanding identity and self autobiographical memory and personality      *The Phenomenology of Self-Awareness and the Nature of Conscious Subjects* Julien Bugnon,Martine Nida-Rümelin,Donnchadh O'Conaill,2025-10-27 This volume explores the connections between the phenomenology of self awareness and the metaphysical nature of subjects of experience bringing together two important research areas in contemporary philosophy of mind into fruitful engagement with one another The phenomenology of self awareness concerns what it is like to be aware of oneself in various conscious experiences such as perceiving recollecting experiencing agency or emotions The metaphysical nature of subjects of experience raises questions concerning whether subjects are physical or non physical entities whether they are substances or bundles of properties and what it is for subjects to have experiences The ten original essays in this volume are grouped into thematic sections covering the following topics the nature of self awareness and its relation to conscious experience the metaphysical nature of the subject of experience and whether self awareness can reveal anything about the metaphysical nature of the subject Each chapter is accompanied by comments from another contributor to the volume and a response from the author The Phenomenology of Self Awareness and the Nature of Conscious Subjects will appeal to researchers and advanced students working in analytic philosophy of mind      *Reasons and Empty Persons: Mind, Metaphysics, and Morality* Christian Coseru,2023-02-22 Best known for his groundbreaking and influential work in Buddhist philosophy Mark Siderits is the pioneer of fusion or confluence philosophy a boldly systematic approach to doing philosophy premised on the idea that rational reconstruction of positions in one tradition in light of another can sometimes help address perennial problems and often lead to new and valuable insights Exemplifying the many virtues of the confluence approach this collection of essays covers all core areas of Buddhist philosophy as well as topics and disputes in contemporary Western philosophy relevant to its study They consider in particular the ways in which questions concerning personal identity figure in debates about agency cognition causality ontological foundations foundational truths and moral cultivation Most of these essays engage Siderits work directly building on his pathbreaking

ideas and interpretations Many deal with issues that have become a common staple in philosophical engagements with traditions outside the West Their variety and breadth bear testimony to the legacy of Siderits impact in shaping the contemporary conversation in Buddhist philosophy and its reverberations in mainstream philosophy giving readers a clear sense of the remarkable scope of his work

*The Routledge Handbook of Philosophy of the Social Mind* Julian Kiverstein, 2016-11-18 The idea that humans are by nature social and political animals can be traced back to Aristotle More recently it has also generated great interest and controversy in related disciplines such as anthropology biology psychology neuroscience and even economics What is it about humans that enabled them to construct a social reality of unrivalled complexity Is there something distinctive about the human mind that explains how social lives are organised around conventions norms and institutions The Routledge Handbook of Philosophy of the Social Mind is an outstanding reference source to the key topics and debates in this exciting subject and is the first collection of its kind An international team of contributors present perspectives from diverse areas of research in philosophy drawing on comparative and developmental psychology evolutionary anthropology cognitive neuroscience and behavioural economics The thirty two original chapters are divided into five parts The evolution of the social mind including the social intelligence hypothesis co evolution of culture and cognition ethnic cognition and cooperation Developmental and comparative perspectives including primate and infant understanding of mind shared intentionality and moral cognition Mechanisms of the moral mind including norm compliance social emotion and implicit attitudes Naturalistic approaches to shared and collective intentionality including joint action team reasoning and group thinking and social kinds Social forms of selfhood and mindedness including moral identity empathy and shared emotion normativity and intentionality Essential reading for students and researchers in philosophy of mind and psychology The Routledge Handbook of Philosophy of the Social Mind is also suitable for those in related disciplines such as social psychology cognitive neuroscience economics and sociology

**The Routledge Handbook of Mindshaping** Tadeusz Wiesław Zawidzki, Rémi Tison, 2025-05-29 Of all species human beings are uniquely capable of coordinating on long term large scale cooperative projects with unfamiliar and genetically unrelated others According to the mindshaping hypothesis this relies on mechanisms and practices like imitation pedagogy normative cognition and narrative self constitution which shape us into expert coordinators without requiring time consuming and epistemically fraught attempts to read each other's minds Mindshaping has been applied to many areas of inquiry including game theory shared agency communication the ontogeny of human cognition the dissemination of scientific knowledge in popular media mental illness and the influence of social media technologies The Routledge Handbook of Mindshaping is the first volume of its kind Comprising 37 chapters by an international team of leading scholars this Handbook is organised into seven sections Mindshaping and coordination Mindshaping and cognitive psychology Mindshaping and normativity Mindshaping and epistemology Social and political dimensions of mindshaping Nonhuman mindshaping Mindshaping applied Within these

Psychopathology and Philosophy of Mind Valentina Cardella, Amelia Gangemi, 2021-03-30 This book explores how the human mind works through the lens of psychological disorders challenging many existing theoretical constructs especially in the fields of psychology psychiatry and philosophy of mind Drawing on the expertise of leading academics the book discusses how psychopathology can be used to inform our understanding of the human mind The book argues that studying mental disorders can deepen the understanding of psychological mechanisms such as reasoning emotions and beliefs alongside fundamental philosophical questions including the nature of the self the universal aspects of morality and the role of rationality and normativity in human nature By crossing different domains this book offers a fresh perspective on the human mind based on the dialogue between philosophy cognitive science and clinical psychology Mental disorders discussed include schizophrenia anxiety disorders major depression obsessive compulsive disorder post traumatic stress disorder and paranoia This book caters to the increasing interest in interdisciplinary approach to solving some of the problems in psychopathology Since this book treats psychological engagement with empirically informed philosophy of mind this book is essential reading for students and researchers of cognitive psychology clinical psychology and philosophy as well as being of interest to clinicians and psychiatrists

**Embodied Emotions** Rebekka Hufendiek, 2015-12-07 In this book Rebekka Hufendiek explores emotions as embodied action oriented representations providing a non cognitivist theory of emotions that accounts for their normative dimensions Embodied Emotions focuses not only on the bodily reactions involved in emotions but also on the environment within which emotions are embedded and on the social character of this environment its ontological constitution and the way it scaffolds both the development of particular emotion types and the unfolding of individual emotional episodes In addition it provides a critical review and appraisal of current empirical studies mainly in psychophysiology and developmental psychology which are relevant to discussions about whether emotions are embodied as well as socially embedded The theory that Hufendiek puts forward denies the distinction between basic and higher cognitive emotions all emotions are embodied action oriented representations This approach can account for the complex normative structure of emotions and shares the advantages of cognitivist accounts of emotions without sharing their problems Embodied Emotions makes an original contribution to ongoing debates on the normative aspects of emotions and will be of interest to philosophers working on emotions embodied cognition and situated cognition as well as neuroscientists

or psychologists who study emotions and are interested in placing their own work within a broader theoretical framework

**The Routledge Handbook of Philosophy and Implicit Cognition** J. Robert Thompson, 2022-12-30 Humans think of ourselves as acting according to reasons that we can typically articulate and acknowledge though we may be reluctant to do so Yet some of our actions do not fit this mold they seem to arise from motives and thoughts that appear outside of our control and our self awareness Rather than treating such cases as outliers theorists now treat significant parts of the mind as operating implicitly or behind the scenes Mental faculties like reasoning language and memory seem to involve this sort of implicit cognition and many of the structures we use to understand one another seem infused with biases perceptions and stereotypes that have implicit features The Routledge Handbook of Philosophy and Implicit Cognition is an outstanding guide and reference source to this important topic Composed of more than thirty chapters by an international team of contributors the Handbook is divided into eight clear parts Defining Features Identifying Implicitness Among Cognate Notions The Nature and Limits of Implicit Processing Ways of Perceiving Knowing Believing Language Agency and Control Social Cognition Memory Learning and Reasoning The Routledge Handbook of Philosophy and Implicit Cognition is essential reading for students and researchers in philosophy of psychology moral psychology and philosophy of mind and will also be of interest to those in related disciplines such as psychology neuroscience and linguistics

**Kant and the Problem of Self-Knowledge** Luca Forgiione, 2018-10-17 This book addresses the problem of self knowledge in Kant's philosophy As Kant writes in his major works of the critical period it is due to the simple and empty representation I think that the subject's capacity for self consciousness enables the subject to represent its own mental dimension This book articulates Kant's theory of self knowledge on the basis of the following three philosophical problems 1 a semantic problem regarding the type of reference of the representation I think 2 an epistemic problem regarding the type of knowledge relative to the thinking subject produced by the representation I think and 3 a strictly metaphysical problem regarding the features assigned to the thinking subject's nature The author connects the relevant scholarly literature on Kant with contemporary debates on the huge philosophical field of self knowledge He develops a formal reading according to which the unity of self consciousness does not presuppose the identity of a real subject but a formal identity based on the representation I think

**Self and Affect** Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self

Alsmith, Matthew R. Longo, 2022-11-30 Bodily awareness is one of the most interesting and enigmatic forms of experience Our earliest and most pervasive form of conscious experience it also arguably remains the most private Bodily awareness has also long played a central role in the study of the mind and self consciousness and is fundamental to much current philosophical and psychological research The Routledge Handbook of Bodily Awareness is an outstanding reference source to this fascinating subject Comprising over thirty chapters by an international team of contributors the Handbook is divided into seven parts Epistemology and Metaphysics Historical Issues Body Representation Sensing the Body Dynamics Pathology Interaction Within these sections specific topics covered include bodily ownership personal identity self consciousness body modelling in robot design body illusions touch proprioception phantom limb syndrome pain eating disorders out of body experiences and virtual reality The handbook features specially commissioned contributions from researchers in a wide array of disciplines whilst being accessible to readers with any disciplinary background It also includes an interdisciplinary introduction written by the editors tying together the central themes with particular attention to the interaction between conceptual technological and empirical issues The Routledge Handbook of Bodily Awareness will be of great interest to those in a wide variety of philosophical subdisciplines as well as those in psychology cognitive science sociology and related subjects     The Bodily Self Jose Luis Bermudez, 2024-02-06 Essays on the role of the body in self consciousness showing that full fledged linguistic self consciousness is built on a rich foundation of primitive nonconceptual self consciousness These essays explore how the rich and sophisticated forms of self consciousness with which we are most familiar as philosophers psychologists and as ordinary reflective individuals depend on a complex underpinning that has been largely invisible to students of the self and self consciousness Jos Luis Berm dez extending the insights of his groundbreaking 1998 book The Paradox of Self Consciousness argues that full fledged linguistic self consciousness is built on a rich foundation of primitive nonconceptual self consciousness and that these more primitive forms of self consciousness persist in ways that frame self conscious thought They extend throughout the animal kingdom and some are present in newborn human infants Berm dez makes the case that these primitive forms of self awareness can indeed be described as forms of self consciousness arguing that they share certain structural and epistemological features with full fledged linguistic self consciousness He offers accounts of certain important classes of states of nonconceptual content including the self specifying dimension of visual perception and the content of bodily awareness considering how they represent the self And he explores the general role of nonconceptual self consciousness in our cognitive and affective lives examining in several essays the relation between nonconceptual awareness of our bodies and what has been called our sense

of ownership for our own bodies
