Ernst, 2003-03-21 This book will be an ally for teachers striving to ignite a passion in their students for psychology's many relevant findings and for students wanting to satisfy a growing curiosity about themselves, their families, their friends, and the world of people around them **Thinking about Psychology** Amy C. Fineburg, Charles T. Blair-Broeker, Randal M. Ernst, David G. Myers, 2013 **Thinking about Psychology, High School Version** Charles T. Blair-Broeker, Randal M. Ernst, 2019-02-08 **Teaching Critical Thinking in Psychology** Dana S. Dunn, Jane S. Halonen, Randolph A. Smith, 2009-01-30 Teaching Critical Thinking in Psychology features current scholarship on effectively teaching critical thinking skills at all levels of psychology. Provides new course delivery formats by which faculty can create online course materials to foster critical thinking within a diverse student audience. Places specific emphasis on how to both teach and assess critical thinking in the classroom as well as issues of wider program assessment. Discusses ways to use critical thinking in courses ranging from introductory level to upper level including statistics and research methods courses, cognitive psychology, and capstone offerings. *Types of Thinking* S. Ian Robertson, 1999 Types of Thinking provides a basic grounding in the psychology of thinking for undergraduate students. This overview explores the practical aspects and applications of everyday thinking: creative thinking, logical and scientific thinking. *How to Think Like a Psychologist* Donald McBurney, 2002 For freshman through senior level courses in Introductory Psychology, Research Methods, Critical Thinking, Educational Research, or other courses that deal with philosophical and methodological assumptions of psychology. Featuring an informal writing style throughout, this unique text uses a question and answer format to explore some of the most common questions students ask about psychology, which are often stumbling blocks in their introduction to the discipline. Topics are keyed to chapters of typical introductory psychology texts; focus on issues that are personally relevant to students; feature many everyday examples and include exercises that encourage students to think critically and to relate the material to their own lives. Thinking about Thinking Joan Wynn Reeves, 2016-12-10 Originally published in 1965, this title is a series of exploratory essays on approaches to thinking. The central topic is the relation of processes of an associative kind, sometimes irrational, in so far as they are not enmeshed with a world of shared experience to those involving some degree of reference to a common world and hence forming the basis of constructive critical and logical thought. This theme ran through a good deal of psychological controversy at the time. It is a very old theme that had been dealt with many times and in many ways in the course of its history. One might have chosen to discuss approaches to it other than those considered in the present volume. These, however, were selected for their bearing on one another and because they formed an interesting part of the background to contemporary psychological theory of the time. The Psychology of Thinking Irving Elgar Miller, 1923

Thinking and Deciding Jonathan Baron, 2006-10-22 Beginning with its first edition and through subsequent editions *Thinking and Deciding* has established itself as the required text and important reference work for students and scholars of human cognition and rationality In this fourth edition first published in 2007 Jonathan Baron retains the comprehensive attention to the key questions addressed in the previous editions how should we think What if anything keeps us from thinking that way How can we improve our thinking and decision making and his expanded treatment of topics such as risk utilitarianism Baye s theorem and moral thinking With the student in mind the fourth edition emphasises the development of an understanding of the fundamental concepts in judgement and decision making This book is essential reading for students and scholars in judgement and decision making and related fields including psychology economics law medicine and business

The Psychology of Thinking John Paul Minda, 2015-10-07 Instructors Electronic inspection copies are available or contact your local sales representative for an inspection copy of the print version How do we define thinking Is it simply memory perception and motor activity or perhaps something more complex such as reasoning and decision making This book argues that thinking is an intricate mix of all these things and a very specific coordination of cognitive resources Divided into three key sections there are chapters on the organization of human thought general reasoning and thinking and behavioural outcomes of thinking These three overarching themes provide a broad theoretical framework with which to explore wider issues in cognition and cognitive psychology and there are chapters on motivation and language plus a strong focus on problem solving reasoning and decision making all of which are central to a solid understanding of this field The book also explores the cognitive processes behind perception and memory how we might differentiate expertise from skilled competent performance and the interaction between language culture and thought

Methodological Thinking in Psychology Aaro Toomela, Jaan Valsiner, 2010 Brings together contributions from leading scholars in different fields of psychology cognitive psychology developmental psychology cultural psychology methodology of psychology to discuss methodological issues that were more thoroughly understood more than half a century ago than they are now

A Study of Thinking Jerome Bruner, 2017-07-12 *A Study of Thinking* is a pioneering account of how human beings achieve a measure of rationality in spite of the constraints imposed by bias limited attention and memory and the risks of error imposed by pressures of time and ignorance First published in 1956 and hailed at its appearance as a groundbreaking study it is still read three decades later as a major contribution to our understanding of the mind In their insightful new introduction the authors relate the book to the cognitive revolution and its handmaiden artificial intelligence The central theme of the work is that the scientific study of human thinking must concentrate upon meaning and its achievement rather than upon the behaviorists stimuli and responses and the presumed connections between them The book s point of departure is how human beings group the world of particulars into ordered classes and categories concepts in order to impose a coherent and manageable order upon that world But rather than relying principally on philosophical speculation to make its point *A Study of Thinking* reports dozens of

experiments to elucidate the strategies that people use in penetrating to the deep structure of the information they encounter This seminal study was a major event in the cognitive revolution of the 1950s Reviewing it at the time J Robert Oppenheimer said it has in many ways the flavor of conviction which makes it point to the future The Psychology of Thinking Irving Elgar Miller,1909 **The Psychology of Thinking** Robert Thomson,1961 *Psychology* Scott O. Lilienfeld,Steven J. Lynn,Nancy J. Woolf,Laura L. Namy,2009-07 Teaching Critical Thinking in Psychology Jane S. Halonen, **Critical Thinking about Psychology** Brent D. Slife,Jeffrey S. Reber,Frank C. Richardson,2005-01-01 In this work contributors examine the unquestioned givens of psychology and suggest other ways of looking at them It covers six major psychology subdisciplines ranging from clinical psychology to neuropsychology **The Psychology of Thinking** Neil Bolton,2017-11-01 In this concise and lucid survey originally published in 1972 the author considers the major theoretical perspectives influential in the psychology of thinking at the time They are looked at in relation to the problems which they are designed to answer and their success in accounting for the experimental evidence **Psychology** Scott O.
