Thinking the Twentieth Century Tony Judt, 2012-02-02 An intellectual feast learned lucid challenging and accessible San Francisco Chronicle Ideas crackle in this triumphant final book of Tony Judt taking readers on a wild ride through the ideological currents and shoals of 20th century thought Los Angeles Times The final book of the brilliant historian and indomitable public critic Tony Judt *Thinking the Twentieth Century* maps the issues and concerns of a turbulent age on to a life of intellectual conflict and engagement The twentieth century comes to life as an age of ideas a time when for good and for ill the thoughts of the few reigned over the lives of the many Judt presents the triumphs and the failures of prominent intellectuals adeptly explaining both their ideas and the risks of their political commitments Spanning an era with unprecedented clarity and insight *Thinking the Twentieth Century* is a tour de force a classic engagement of modern thought by one of the century's most incisive thinkers The exceptional nature of this work is evident in its very structure a series of intimate conversations between Judt and his friend and fellow historian Timothy Snyder grounded in the texts of the time and focused by the intensity of their vision Judt's astounding eloquence and range are here on display as never before Traversing the complexities of modern life with ease he and Snyder revive both thoughts and thinkers guiding us through the debates that made our world As forgotten ideas are revisited and fashionable trends scrutinized the shape of a century emerges Judt and Snyder draw us deep into their analysis making us feel that we too are part of the conversation We become aware of the obligations of the present to the past and the force of historical perspective and moral considerations in the critique and reform of society then and now In restoring and indeed exemplifying the best of intellectual life in the twentieth century *Thinking the Twentieth Century* opens pathways to a moral life for the twenty first This is a book about the past but it is also an argument for the kind of future we should strive for *Thinking the Twentieth Century* is about the life of the mind and the mindful life Judt's book *Ill Fares the Land* republished in 2021 featuring a new preface by bestselling author of *Between the World and Me* and *The Water Dancer* Ta Nehisi Coates

Reappraisals Tony Judt, 2008-04-17 Exhilarating brave and forthright The New York Times Book Review Perhaps the greatest single collection of thinking on the political diplomatic social and cultural history of the past century Forbes We have entered an age of forgetting Our world we insist is unprecedented wholly new The past has nothing to teach us Drawing provocative connections between a dazzling range of subjects from Jewish intellectuals and the challenge of evil in the recent European past to the interpretation of the Cold War and the displacement of history by heritage the late historian Tony Judt takes us beyond what we think we know of the past to explain how we came to know it showing how much of our history has been sacrificed in the triumph of myth making over understanding and denial over memory *Reappraisals* offers a much needed road map back to the historical sense we urgently need Judt's book *Ill Fares the Land* republished in 2021 featuring a new preface by bestselling author of *Between the World and Me* and *The Water Dancer* Ta Nehisi Coates

Summary of Tony Judt's Thinking the Twentieth Century Everest Media,2022-04-30T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 My full name is Tony Robert Judt I have two perspectives on my childhood From one perspective it was an utterly conventional somewhat lonely and very lower middle class London childhood of the 1950s From another perspective it was an exotic distinctive and therefore privileged expression of mid twentieth century history as it happened to immigrant Jews from East Central Europe 2 My father s father Enoch Yudt was a Jewish economic marginal in a state of permanent migration He had no particular skill except selling and not much of that He got by on the black market between Belgium Holland and Germany in the 1920s But things must have gotten a bit warm for him around 1930 because he had to move on 3 My father who was from Belgium had come to Ireland with his family in 1936 In 1936 his brother in London invited him to England He left school at fourteen to work odd jobs While my mother spent her late teens in London she was far more English in her soul than my father who had been born there 4 I was born in 1948 in East London The first thing I remember is walking along Tottenham High Road I have other memories of North London life including looking at trucks and buses out of my parents bedroom window Thinking with Cases Charlotte Furth,Judith T. Zeitlin,Ping-chen Hsiung,2007-02-28 Case studies fascinate because they link individual instances to general patterns and knowledge to action without denying the priority of individual situations over the generalizations derived from them In this volume an international group of senior scholars comes together to consider the use of cases to produce empirical knowledge in premodern China They trace the process by which the project of thinking with cases acquired a systematic and public character in the ninth century CE and after Premodern Chinese experts on medicine and law circulated printed case collections to demonstrate efficacy or claim validity for their judgments They were joined by authors of religious and philosophical texts The rhetorical strategies and forms of argument used by all of these writers were allied with historical narratives exemplary biographies and case examples composed as aids to imperial statecraft The innovative and productive explorations gathered here present a coherent set of interlocking arguments that will be of interest to comparativists as well

as specialists on premodern East Asia For China scholars they examine the interaction of different fields of learning in the late imperial period the relationship of evidential reasoning and literary forms and the philosophical frameworks that linked knowledge to experience and action For comparativists the essays bring China into a global conversation about the methodologies of the human sciences Contributors Chu Honglam Charlotte Furth Hsiung Ping chen Jiang Yonglin Yasuhiko Karasawa Robert Sharf Pierre tienne Will WuYanhong Judith T Zeitlin

Chaitin, 2007 Dr Gregory Chaitin one of the world s leading mathematicians is best known for his discovery of the remarkable O number a concrete example of irreducible complexity in pure mathematics which shows that mathematics is infinitely complex In this volume Chaitin discusses the evolution of these ideas tracing them back to Leibniz and Borel as well as GAdel and Turing This book contains 23 non technical papers by Chaitin his favorite tutorial and survey papers including Chaitin s three Scientific American articles These essays summarize a lifetime effort to use the notion of program size complexity or algorithmic information content in order to shed further light on the fundamental work of GAdel and Turing on the limits of mathematical methods both in logic and in computation Chaitin argues here that his information theoretic approach to metamathematics suggests a quasi empirical view of mathematics that emphasizes the similarities rather than the

differences between mathematics and physics He also develops his own brand of digital philosophy which views the entire universe as a giant computation and speculates that perhaps everything is discrete software everything is 0 s and 1 s Chaitin s fundamental mathematical work will be of interest to philosophers concerned with the limits of knowledge and to physicists interested in the nature of complexity *Utopian Thinking and Social Work* Chris Horsell,2025-02-03 This book highlights the importance of employing imaginative sensibilities to thinking and action in social work and social policy practice Exploring the question of how ideas about utopia and utopian method can be used in social work practice and policy practice to address social inequalities it shows that central to this critique is the argument that contemporary social policy responses and subsequent social work interventions to a range of policy problems e g homelessness poverty family violence need to acknowledge the failure of dominant neoliberal discourses in addressing these issues The COVID 19 pandemic has highlighted and in many ways exacerbated existing inequalities and the post pandemic future provides opportunities to put utopian ideas into action Showing how utopian thinking can challenge fundamental assumptions regarding welfare dependency and unitary identities in policy settings this book will be of interest to all scholars students and professionals working in social work and social policy *Thinking the Unthinkable* Charles C. Lemert,2015-12-03 In the eloquent style for which he has become famous Charles Lemert writes of social theory as no one else Thinking the Unthinkable is offered as text for instruction yet it defies the prevailing assumption that social theory is a method for clarifying the facts of social life Lemert shows how social theory began late in the 19th century as a struggle to come to terms with the failure of modern reason to solve the social problems created by the capitalist world system Since then social theory has developed through twists and turns to think and rethink this Unthinkable Hence the surprising innovations of recent years postmodern queer postcolonial third wave feminist risk theories among others arising in the wake of globalization Once again Lemert has made the difficult clear in a book that students and other readers will treasure and keep *Thinking Otherwise* Susan A.
