Classical Confucian Philosophy Roger T. Ames, 2022-10-01 Over the years Roger T Ames and his collaborators have consistently argued for a processual understanding of Chinese natural cosmology made explicit in the *Book of Changes* It is this way of thinking captured in its own interpretive context with the expression continuities in change *biantong* that has shaped the grammar of the Chinese language and informs the key philosophical vocabulary of Confucian philosophy Over the past several centuries of cultural encounter the formula established by the early missionaries for the translation of classical Chinese texts into Western languages has resulted in a Christian conversion of Confucian texts that is still very much with us today And more recently the invention of a new Chinese language to synchronize East Asian cultures with Western modernity has become another obstacle in our reading of the Confucian canons This volume a companion volume to *A Sourcebook in Classical Confucian Philosophy* employs a comparative hermeneutical method in an attempt to explain the Confucian terms of art and to take the Confucian tradition on its own terms God Is Not One Stephen Prothero, 2010-09-20 fascinating guide

'Justification by Grace Alone' Facing Confucian Self-Cultivation Arne Redse, 2015-09-29 Chinese contexts as influenced by the religious moral philosophy of New Confucianism are characterized by the idea of becoming a sage through self cultivation For Christian theology with its emphasis on God's grace rather than on self cultivation Confucian teaching in this matter may appear as a problem Chinese Christian theology may ask How can the Christian doctrine of justification by grace alone be contextualized in Chinese contexts which are characterized by the contradicting idea of self cultivation Another question may be equally interesting for Christian theology in all contexts Which insights can be attained from an attempt at contextualizing the Christian doctrine of justification to contexts influenced by New Confucianism In this book professor Arne Redse contributes to answering these questions

On Chinese Body Thinking Wu, 2021-11-01 This book uses Western philosophical tradition to make a case for a form of thinking properly associated with ancient China The book's thesis is that Chinese thinking is concrete rather than formal and abstract and this is gathered in a variety of ways under the symbol body thinking The root of the metaphor is that the human body has a kind of intelligence in its most basic functions When hungry the body gets food and eats when tired it sleeps when amused it laughs In free people these things happen instinctively but not automatically The metaphor of body thinking is extended far beyond bodily functions in the ordinary sense to personal and communal life to social functions and to cultivation of the arts of civilization As the metaphor is extended the way to stay concrete in thinking with subtlety becomes a kind of ironic play a natural adeptness at saying things with silences Play and indirection are the roads around formalism and abstraction Western formal thinking it is argued can be sharpened by Chinese body thinking to exhibit spontaneity and to produce healthy human thought in a community of cultural variety
