Schoolhouse Shams Peter Downs, 2013

Written by a parent and school board member who first embraced many of the ideas of the modern school reform movement, *Schoolhouse Shams* lays bare much of the mythology and misinformation that underpin many of the failed school reform policies of the last decade. Many of the top strategies of the highly publicized school reform movement already have been tried out in St. Louis with disastrous results. Along with demonstrating the failure of school reform prescriptions to improve education, the experience of St. Louis demonstrates that the ideological premise of the reform movement—that a focus on providing opportunities for private profit taking will necessarily improve schools—is both wrong and conflicts with the ideals of democracy, accountability and justice.

Bridging the Gap Between Arithmetic & Algebra Bradley S. Witzel, 2015-11-15

Although two federal panels have concluded that all students can learn mathematics and most can succeed through Algebra 2, the abstractness of algebra and missing precursor understandings may be overwhelming to many students and their teachers. *Bridging the Gap Between Arithmetic & Algebra* responds to this need for instruction and interventions that go beyond typical math lesson plans. Providing a review of evidence-based practices, the book is an essential reference for mathematics teachers and special education teachers when teaching mathematics to students who struggle with the critical concepts and skills necessary for success in algebra.

Mathematics and Multi-Ethnic Students Yvelyn Germain-McCarthy, 2017-05-25

Mathematics and Multi-Ethnic Students provides detailed profiles of teachers across the nation who have implemented effective mathematics instruction for diverse student populations. In this revised edition, Yvelyn Germain-McCarthy expands upon the popular case studies and adds two new chapters to highlight the latest educational research and practices that are reflected in the case studies. A third new chapter introduces the concept of the Life Long Learning Laboratory where courageous questions on issues such as the impact of race on student learning are discussed. Featuring useful framing tools including the Discussion with Colleagues and Commentary sections, *Mathematics and Multi-Ethnic Students* translates concrete instances of access and equity into generalized problem-solving methods for promoting ethnic diversity across grade levels.
