P. Phillips, 2023-01-21 The second volume of the introduction in modern Thomistic philosophy includes three parts Part one is on epistemology the second part is on general metaphysics and part three on natural theology Dr Phillips is to be congratulated on the clear and lucid way he has set forth Thomist doctrines and especially for the manner in which he has rendered the Latin terminology of Schoolman in English an achievement which makes his book very readable and interesting even for those unacquainted with the great treatises of Schoolman L J Walker in Philosophy Vol 11 Issue 43 *The Architecture of Law* Brian M. McCall, 2018-05-30 This book argues that classical natural law jurisprudence provides a superior answer to the questions What is law and How should law be made rather than those provided by legal positivism and new natural law theories What is law How should law be made Using St Thomas Aquinas's analogy of God as an architect Brian McCall argues that classical natural law jurisprudence provides an answer to these questions far superior to those provided by legal positivism or the new natural law theories The Architecture of Law explores the metaphor of law as an architectural building project with eternal law as the foundation natural law as the frame divine law as the guidance provided by the architect and human law as the

provider of the defining details and ornamentation Classical jurisprudence is presented as a synthesis of the work of the greatest minds of antiquity and the medieval period including Cicero Aristotle Gratian Augustine and Aquinas the significant texts of each receive detailed exposition in these pages Along with McCall s development of the architectural image he raises a question that becomes a running theme throughout the book To what extent does one need to know God to accept and understand natural law jurisprudence given its foundational premise that all authority comes from God The separation of the study of law from knowledge of theology and morality McCall argues only results in the impoverishment of our understanding of law He concludes that they must be reunited in order for jurisprudence to flourish This book will appeal to academics students in law philosophy and theology and to all those interested in legal or political philosophy Mind, Brain and the Elusive Soul Mark Graves,2016-04-22 Does science argue against the existence of the human soul Many scientists and scholars believe the whole is more than the sum of the parts This book uses information and systems theory to describe the more that does not reduce to the parts One sees this in the synapses or apparently empty gaps between the neurons in one s brain where informative relationships give rise to human mind culture and spirituality Drawing upon the disciplines of cognitive science computer science neuroscience general systems theory pragmatic philosophy and Christian theology Mark Graves reinterprets the traditional doctrine of the soul as form of the body to frame contemporary scientific study of the human soul **Natural Law: Five Views** Zondervan,2025-05-27 The story of natural law the idea that God has written a law on the human heart so that ethical norms derive from human nature in twentieth century Protestant ethics is one of rejection and resurgence For half a century luminaries like Karl Barth Carl F H Henry and Cornelius Van Til cast a shadow over natural law moral reflection because of its putative link to natural theology autonomous reason associations with Catholic theology and ethical witness devoid of special revelation However over the past twenty years Protestant theologians have renewed their interest in the subject often animated by debates on Christian involvement in the public arena and on matters of life death and gender and sexuality Much of this engagement has happened within Reformed circles and has largely been conducted without reference to Roman Catholic construals of the natural law Conversely Catholic developments in natural law thinking have paid little attention to the surge of interest on the Protestant side As a result Protestant and Catholic natural proponents and even those skeptical of the natural law are not in conversation with one another The lack of dialog between the various schools of natural law has left a historic tradition within Christian moral thought underdeveloped in contemporary Protestant theology By bringing together a variety of perspectives in much needed conversation this book helps readers to understand the various construals of natural law within the broader strands of Christian and classical traditions and clarifies its unique importance for Christian moral witness in a secular culture The contributors address the following questions What is natural law Can moral norms be derived from immanent creaturely ends If so how specific or action guiding can those norms be How extensive might these moral norms be How does natural law endure despite

Christian insistence on the noetic epistemological effects of sin What is the relationship between Christian reflection on natural law and the broader classical tradition s understanding of natural law How do Catholic and Protestant construals of natural law differ What is the relationship between faith and reason What s the relationship between human nature and natural law Does natural law mean secular moral reasons Or is natural law merely religious belief disguised as public reason How does natural law relate to public reason Does the affirmation of a natural law lead to a natural theology Or are these distinct What is the relationship between natural law and the laws of nature Five views Classical Natural Law Michael Pakaluk New Natural Law Melissa Moschella Reformed Natural Law W Bradford Littlejohn Lutheran Natural Law Joel D Bierman Anti Natural Law Peter J Leithart
