DUKE Rozlan Mohd Noor, 2021-03-16 For fans of Jo Nesbø, Ian Rankin and John Burdett, a gripping crime thriller that is steeped in the grit and feel of the street. Inspector Mislan Latif is my kind of detective. Harry Bosch would ride shotgun with him any time. Michael Connelly. In the run up to the Eid holiday, the police department is drained of staff and the DUKE expressway jammed with vehicles as many in Kuala Lumpur leave the capital to celebrate the end of Ramadan with their extended families. In the slow lane, a Mercedes E200 suddenly veers after several bright flashes and comes to rest against the guardrail. When the highway patrol arrives, what looked like a traffic accident turns out to be an apparent murder-suicide of the driver and his female passenger, both having suffered gunshot wounds. Yet called to lend a hand with the investigation, Inspector Mislan finds something else again. The dead man and woman, a wealthy politically connected entrepreneur and his business associate, were by all appearances engaged in a long-term affair, seemingly in love, and the crime scene doesn't add up for suicide. But then if these two successful people were murdered, why? And how, when the car was locked from the inside? And why does the political establishment want the case closed in such an awful hurry? Once again, Mislan must find a way, with the help of his team and his politically savvy boss, to withstand the pressure from above, solve an impossible mystery and ensure that justice prevails.

The Car Show Nicolae Sfetcu, 2014-04-27 This e-book details the most interesting and important characteristics of the automobile: car maintenance, styling, features, car body style, the standard classification of the cars, an history of the automobile's introduction in the automotive industry and the traffic code rules and signs. An automobile, usually called a car, an old word for carriage or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with motor referring to what is now usually called the engine. It has seats for the driver and almost without exception for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006, the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.
