control over what happened and nothing we did or failed to do made things happen the way they did is deeply affecting and disturbing that can eventually be experienced as traumatic Being a survivor means to take action by moving through the ordeal the pain the grief and loss in a holistic approach encompassing the mind and body If not you can find yourself unknowingly moving into a Victim Life Position and further becoming accustomed to staying in denial trapped and engaging in self destructive coping behaviour If you do not heal through a mind heart coherence by embracing the unification of wisdom of mind and heart of compassion your victim mentality becomes programmed and embedded as your personality and eventually establishes into an identity where you can no longer recognise its origins You can end up beating yourself up and ruining valuable relationships You become a complainer and blamer and can forget ever having made a choice to live this way
