Think Through Math Point Cheats:

Guiding Students from Cheating and Plagiarism to Honesty and Integrity Ann Lathrop, Kathleen Foss, 2005-10-30

In the past it was the struggling student who was more likely to cheat just to get by Today above average college bound students are just as likely to do so This sequel to the eye opening Student Cheating and Plagiarism in the Internet Era A Wake Up Call 2000 is a call to arms for students teachers administrators librarians and parents to transpose school culture from one that ignores or tolerates cheating into one where every effort is made to value encourage and support honesty First person accounts lend credence to a cornucopia of practical ideas and actions No home school or library should be without at least one copy Cheating continues to be a national epidemic Here Lathrop and Foss have produced a sequel to their 2000 eye opener Student Cheating and Plagiarism in the Internet Era A Wake Up Call But where the first volume focused on honor codes and careful monitoring of student tests and written assignments their latest work is a call to arms students teachers administrators librarians and parents must make a concerted effort to change school culture from one that ignores or tolerates cheating into one where every effort is made to value encourage and support honesty Each chapter offers quick and easy access to practical ideas and actions that can be taken off the page and into the classroom or home situation Among these first person accounts dominate with such compelling themes as Why I Didn't Cheat Policies That Support Honest Students and Student Whistleblowers It is a myth that the struggling students are the ones who are more likely to cheat just to get by The above average college bound students are just as likely to do so as they compete for scholarships and college admission No home school or library should be without at least one copy of this book

Knowing and Learning Mathematics for Teaching National Research Council, Mathematical Sciences Education Board, Center for Education, Mathematics Teacher Preparation Content Workshop Program Steering Committee, 2001-01-25 There are many questions about the mathematical preparation teachers need Recent recommendations from a variety of sources state that reforming teacher preparation in postsecondary institutions is central in providing quality mathematics education to all students The Mathematics Teacher Preparation Content Workshop examined this problem by considering two central questions What is the mathematical knowledge teachers need to know in order to teach well How can teachers develop the mathematical knowledge they need to teach well The Workshop activities focused on using actual acts of teaching such as examining student work designing tasks or posing questions as a medium for teacher learning The Workshop proceedings Knowing and Learning Mathematics for Teaching is a collection of the papers presented the activities and plenary sessions that took place
