Thoughts On Grammaticalization Classics In Linguistics Volume 1:

Measurements of Grammaticalization David Correia Saavedra, 2021-10-25 Grammaticalization has often been described as a gradual phenomenon While many studies have discussed the quantitative aspects of grammaticalization there has been little to no work that has tried to propose a way of measuring degrees of grammaticalization This book addresses this gap by proposing a corpus based approach to the measurement of grammaticalization using binary logistic regression modelling Such an approach has theoretical benefits as it can provide empirical evidence for the gradience and gradualness of grammaticalization It can help substantiate observations that have been done on the basis of case studies so far such as the hypothesized unidirectionality of grammaticalization In addition as the methods proposed in this book rely on corpus based data only it offers a way of comparing grammaticalization across multiple languages which is currently a challenging endeavour What this book hopes to achieve is to start a discussion on the measurement of grammaticalization To draw a parallel the field of morphological productivity has greatly benefited from the discussions and disputes regarding how its object of study should be measured and I believe that so will the field of grammaticalization

The Rise of Discourse Markers Bernd Heine, Gunther Kaltenböck, Tania Kuteva, Haiping Long, 2021-06-24 This pioneering study highlights the importance in linguistic communication of discourse markers a previously neglected area of research

Studies at the Grammar-Discourse Interface Alexander Haselow, Sylvie Hancil, 2021-06-15 This book investigates phenomena at the grammar discourse interface with a strong focus on discourse markers whose development and concrete uses in a given language tend to be based on a close interplay of grammatical and discourse related forces The topics range from the transition of linguistic signs out of sentence grammar and into the domain of discourse to differences between more grammatical vs more discourse pragmatic expressions in terms of structural behavior and cognitive processing and the different intricate ways in which the usage conditions and meanings of grammatical constituents or structural units are affected by the discourse context in which they are used The twelve studies in this book are based on fresh empirical data from languages such as English Basque Korean Japanese and French and involve the study of linguistic expressions and structures such as pragmatic markers and particles comment clauses expletives adverbial connectors and expressives

Morphological Variation Antje Dammel, Oliver Schallert, 2019-06-15 Morphological variation is a rather young yet fascinating topic to study in its own right because it offers challenging evidence both for the autonomy of morphology morphomic processes as well as for its tight interconnection with other grammatical domains notably phonology and syntax Covering a wide range of phenomena e g negation structures form function mismatches in the verbal and nominal domain loss of morphosyntactic feature values etc the contributions to this volume combine in depth empirical studies with the explanatory potential of modern theories of grammar as well as approaches for capturing and modelling microtypological diversity

The Grammar of Body-Part Expressions Roberto Zariquiey, Pilar M. Valenzuela, 2022-06-21 This volume explores

the grammatical properties of body part expressions across a range of languages and language families in the Americas including Arawakan Eastern Tukano Mataguayan Panoan and Takanan Expressions denoting parts of the body often exhibit specific grammatical properties that are intrinsically related to their semantics and frequently appear in dedicated constructions many of which are found exclusively in association with these expressions Following a detailed introduction and discussion of the foundations of body part grammar the chapters in the first part of the book investigate categorialization lexicalization and the semantic processes associated with body part expressions In the second part of the book contributors investigate specific grammatical properties of body part expressions such as inalienability incorporation possessive constructions prefixation topicality and word formation strategies The volume draws on data from lesser known languages that are often under represented in comparative work and makes a significant contribution not only to the linguistics of the Americas and the typology of body part expressions but also to typological studies more broadly and to historical comparative and anthropological linguistics

Modality and Diachronic Construction Grammar Martin Hilpert, Bert Cappelle, Ilse Depraetere, 2021-10-15 This volume explores how Diachronic Construction Grammar can shed new light on changes in a central and well researched domain of grammar namely modality Its main goal is to show how constructional analyses can help us address some of the long standing questions that have informed discussions of modal expressions and their development and to illustrate the processes that are involved in these developments on the basis of data from languages such as English Finnish French Galician German and Japanese The studies in this volume are organized around three interrelated topics The first of these concerns the organization of modal constructions in a network A second focus area of the studies in this volume concerns the developmental pathways that modal constructions follow diachronically The third topic that ties the contributions of this volume together is the contrast between constructionalization and constructional change

Ten Lectures on Grammaticalization Christian Lehmann, 2024-05-21 On the basis of analyzed examples from many languages basic concepts of grammaticalization theory are explained Grammaticalization is delimited against other types of variation and change Degrees of grammaticalization are assessed by well defined criteria and parameters Many well documented cases from different functional domains are analyzed in depth Issues of directionality are settled on a theoretical basis The cognitive bases of grammaticalization are identified

Thoughts on grammaticalization Christian Lehmann, 2015-12-24 After a short review of the history of research the work introduces and delimits the concepts related to grammaticalization It then provides extensive exemplification of grammaticalization phenomena in diverse languages ordered by grammatical domains such as the verbal pronominal and nominal sphere and clause level relations The final chapter presents a theory of grammaticalization which is based on the autonomy of the linguistic sign with respect to the paradigmatic and syntagmatic axes This is the basis of the structural parameters that constitute grammaticalization They are operationalized to the point of rendering degrees of grammaticalization measurable

Headedness and/or grammatical anarchy? Ulrike Freywald, Horst J. Simon, Stefan Müller, 2022-10-20 In most grammatical models hierarchical structuring and dependencies are considered as central features of grammatical structures an idea which is usually captured by the notion of head or headedness While in most models this notion is more or less taken for granted there is still much disagreement as to the precise properties of grammatical heads and the theoretical implications that arise of these properties Moreover there are quite a few linguistic structures that pose considerable challenges to the notion of headedness Linking to the seminal discussions led in Zwicky 1985 and Corbett Fraser Mc Glashan 1993 this volume intends to look more closely upon phenomena that are considered problematic for an analysis in terms of grammatical heads The aim of this book is to approach the concept of headedness from its margins Thus central questions of the volume relate to the nature of heads and the distinction between headed and non headed structures to the process of gaining and losing head status and to the thought provoking question as to whether grammar theory could do without heads at all The contributions in this volume provide new empirical findings bearing on phenomena that challenge the conception of grammatical heads and or discuss the notion of head headedness and its consequences for grammatical theory in a more abstract way The collected papers view the topic from diverse theoretical perspectives among others HPSG Generative Syntax Optimality Theory and different empirical angles covering typological and corpus linguistic accounts with a focus on data from German

Internal and External Causes of Language Change Nikolaos Lavidas, Alexander Bergs, Elly van Gelderen, Ioanna Sitaridou, 2023-11-26 This volume collects ten studies that propose modern methodologies of analyzing and explaining language change in the case of various morpho phonological and morpho syntactic characteristics The studies were first presented in the fourth fifth and sixth workshops at the Language Variation and Change in Ancient and Medieval Europe summer schools organized on the island of Naxos Cyclades Greece and online between 2019 and 2021 The book is divided into two parts that both focus on modern tools and methodologies of analyzing and accounting for language change The first part focuses on common directions of change in Indo European languages and beyond and the second part

emphasizes explanations that reveal the role of language contact The volume promotes a dialogue between approaches to language change having their starting point in structural and typological aspects of the history of languages on the one hand and approaches concentrating on external factors on the other Through this dialogue the volume enriches knowledge on the contrast or complementarity of internally and externally motivated causes of language change **Up and down the Cline** □

The Nature of Grammaticalization Olga Fischer, Muriel Norde, Harry Perridon, 2004-05-28 The basic idea behind this volume is to probe the nature of grammaticalization Its contributions focus on the following questions i In how far can grammaticalization be considered a universal diachronic process or mechanism of change and in how far is it conditioned by synchronic factors ii What is the role of the speaker in grammaticalization iii Does grammaticalization itself provide a cause for change or is it an epiphenomenon i e a conglomeration of causal factors mechanisms which elsewhere occur independently iv If it is epiphenominal how do we explain that similar pathways so often occur in known cases of grammaticalization v Is grammaticalization unidirectional vi What is the nature of the parameters guiding grammaticalization The overall aim of the book is to enrich our understanding of what grammaticalization does or does not entail via detailed case studies in combination with theoretical and methodological discussions **Morphosyntactic Variation in Bantu**

Cognitive Foundations of Grammar Bernd Heine, 1997-11-27 The main function of language is to convey meaning Therefore argues Bernd Heine in these pages the question of why language is structured the way it is must first of all be answered with reference to this function Linguistic explanations offered in terms of other exponents of language structure for example syntax are likely to highlight peripheral or epi phenomenal rather than central characteristics of language structure Heine provides a solid introductory treatment of the ways in which language structure that is grammar and language usage can be explained with reference to the processes underlying human conceptualization and communication Exploring an area of linguistics that has developed only recently and is rapidly expanding Cognitive Foundations of Grammar
