Transparency In Global Environmental Governance Critical Perspectives Earth System Governance:

Transparency in Global Environmental Governance Aarti Gupta, 2014-07-11 Transparency is increasingly seen as part of the solution to a complex array of economic political and ethical problems in an interconnected world It is often assumed to result in more accountable and effective governance The transparency turn in global environmental governance in particular is evident in a wide range of international agreements voluntary disclosure initiatives and public private partnerships This is the first book to scrutinise this transparency turn critically and to investigate whether it is a broadly transformative force or plays a more limited instrumental role **Transparency in Global Environmental Governance** Aarti

Gupta, Michael Mason, 2014-07-18 A critical assessment of whether transparency is a broadly transformative force in global environmental governance or plays a more limited role Transparency openness secured through greater availability of information is increasingly seen as part of the solution to a complex array of economic political and ethical problems in an interconnected world The transparency turn in global environmental governance in particular is seen in a range of international agreements voluntary disclosure initiatives and public private partnerships This is the first book to investigate whether transparency in global environmental governance is in fact a broadly transformative force or plays a more limited instrumental role After three conceptual context setting chapters the book examines ten specific and diverse instances of governance by disclosure These include state led mandatory disclosure initiatives that rely on such tools as prior informed consent and monitoring measuring reporting and verification and private or private public largely voluntary efforts that include such corporate transparency initiatives as the Carbon Disclosure Project and such certification schemes as the Forest Stewardship Council The cases which focus on issue areas including climate change biodiversity biotechnology natural resource exploitation and chemicals demonstrate that although transparency is ubiquitous its effects are limited and often specific to particular contexts The book explores in what circumstances transparency can offer the possibility of a new emancipatory politics in global environmental governance **The Ecology Politic** Anthony Burke, Stefanie

Fishel, 2025-05-06 A compelling proposal for new international law and institutions to address the planetary crisis that improves biodiversity protection supports Indigenous peoples and prevents catastrophic climate change In **The Ecology Politic** Anthony Burke and Stefanie Fishel contend that the roots of our planetary crisis lie in the modern state in its destructive entanglement with capitalism and its colonial legacies of extraction and oppression This in turn has shaped global governance and international law as they continue to fail to curb global heating deforestation and extinction In a far reaching critique of the foundational political theory of the modern state the Body Politic the authors insist that nothing less than a radically different model of the polity an Ecology Politic is needed if we are to escape this impasse Burke and Fishel argue that the international rule of law enacts a sovereign ban of nature that appropriates nonhuman lives for profit and use while denying them political and legal standing We fail because we rely on the very institutions worldviews and systems that

generated the crisis to solve it The authors reconsider political power agency scale and democracy in the Anthropocene and assert a biospheric ethic that values the entangled planetary structure of matter energy and life Further they argue for more than human beings to be represented in an ecological democracy that flows across borders In short they imagine a polity whose fundamental purpose is to protect planetary ecosystems and nurture interlocking systems of social and ecological justice *Democratic Norms of Earth System Governance* Walter F. Baber, Robert V. Bartlett, 2021-04-29 An analysis of the normative prerequisites for addressing the challenges of democratic earth system governance in the Anthropocene

Governing Complex Systems Oran R. Young, 2017-03-10 An exploration of the need for innovative mechanisms of governance in an era when human actions are major drivers of environmental change The onset of the Anthropocene an era in which human actions have become major drivers of change on a planetary scale has increased the complexity of socioecological systems Complex systems pose novel challenges for governance because of their high levels of connectivity nonlinear dynamics directional patterns of change and emergent properties Meeting these challenges will require the development of new intellectual capital In this book Oran Young argues that to achieve sustainable outcomes in a world of complex systems we will need governance systems that are simultaneously durable enough to be effective in guiding behavior and agile enough to adapt to rapidly changing circumstances While some insights from past research on governance remain valid in this setting Young argues that we need new social capital to supplement mainstream regulatory approaches that feature rule making with an emphasis on compliance and enforcement He explores the uses of goal setting as a governance strategy the idea of principled governance and the role of what is often called good governance in meeting the challenges of the Anthropocene Drawing on his long experience operating on the science policy frontier Young calls for more effective collaboration between analysts and practitioners in creating and implementing governance systems capable of producing sustainable outcomes in a world of complex systems **Global Shifts** Philip Schleifer, 2023-06-20 What global shifts in markets and power mean for the politics and governance of sustainability In recent years major shifts in global markets from North to South have created a new geography of trade and consumption particularly in the agricultural sector How this shift affects the governance of sustainability and thus the future of the planet is the pressing topic Philip Schleifer takes up in this book The processes of twenty first century globalization are fundamentally changing the politics and governance of commodity production Schleifer argues with profound implications for the environment in the food producing countries of the Global South At the center of Schleifer s study are Brazil and Indonesia two key sites of experimentation in new models of global environmental and commodity governance where palm oil and soy supply chains have seen unprecedented degrees of private environmental governance in recent years However instead of transforming these industries the diffusion of transnational sustainability standards has accompanied a worsening ecological crisis with mounting evidence of increasingly strong links between deforestation and globalization in twenty first century agricultural

trade To uncover the causes of this governance failure Schleifer develops a multi level framework for analyzing how contemporary globalization is reconfiguring the political economies of such industries The result is the first comprehensive analysis of the shift of global agricultural trade to the South and the deepening crisis of commodity driven deforestation and a complex and evolving picture of both the risks and opportunities for sustainability presented by this transformative shift

New Earth Politics Simon Nicholson, Sikina Jinnah, 2016-03-04 Prominent scholars and practitioners consider the role of global environmental politics in the face of increasing environmental stress Humanity's collective impact on the Earth is vast The rate and scale of human driven environmental destruction is quickly outstripping our political and social capacities for managing it We are in effect creating an Earth 2.0 on which the human signature is everywhere a new earth in desperate need of humane and insightful guidance In this volume prominent scholars and practitioners in the field of global environmental politics consider the ecological and political realities of life on the new earth and probe the field's deepest and most enduring questions at a time of increasing environmental stress Arranged in complementary pairs the essays in this volume include reflections on environmental pedagogy analysis of new geopolitical realities reflections on the power of social movements and international institutions and calls for more compelling narratives to promote environmental action At the heart of the volume is sustained attention to the role of traditional scholarly activities in a world confronting environmental disaster Some contributors make the case that it is the scholar's role to provide activists with the necessary knowledge and tools others argue for more direct engagement and political action All the contributors confront the overriding question What is the best use of their individual and combined energies given the dire environmental reality Contributors Erik Assadourian Frank Biermann Wil Burns Ken Conca Peter Dauvergne Daniel Deudney Navroz Dubash Richard Falk Joyeeta Gupta Maria Ivanova Peter Jacques Sikina Jinnah Karen T Litfin Michael F Maniates Elizabeth Mendenhall Simon Nicholson Kate O'Neill Judith Shapiro Paul Wapner Oran R Young

Designing Rulemaking Claire A. Dunlop, Jonathan C. Kamkhaji, Claudio M. Radaelli, Gaia Taffoni, Claudius Wagemann, 2024-11-21 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations Over the last twenty five years many governments around the world have adopted access to information legislation introduced or re designed impact assessment procedures for proposed legislation created ombudsman offices and engaged stakeholders in various types of consultation With a general aim of making rulemaking more transparent and inclusive and ultimately more efficient these governments nudged by the advocacy of International Organizations have reformed the design of their rulemaking procedures and calibrated them in specific yet distinct ways The question arises do these innovations designed to open up rulemaking process and make regulation better have an actual effect on policy and governance outcomes In Designing Rulemaking the authors answer this question with a novel purpose built dataset on regulatory design based on the legal provisions disciplining four rulemaking procedures impact assessment

stakeholder consultation freedom of information and ombudsman procedures Examining twenty eight countries the EU twenty seven plus the UK the dataset operationalises rules as data and measures the design features of each procedure in each country The authors then using set theoretic methods consider the effects of these combinations of designs of rulemaking procedures on the quality of the business environment perception of corruption and environmental performance Their findings shatter predominant views on policy change in Europe and offer a varied detailed granular account of the efficacy of regulatory design

Governing Through Goals Norichika Kanie, Frank Biermann, 2017-05-05 A detailed examination of the UN's Sustainable Development Goals and the shift in governance strategy they represent In September 2015 the United Nations General Assembly adopted the Sustainable Development Goals as part of the 2030 Agenda for Sustainable Development The Sustainable Development Goals built on and broadened the earlier Millennium Development Goals but they also signaled a larger shift in governance strategies The seventeen goals add detailed content to the concept of sustainable development identify specific targets for each goal and help frame a broader more coherent and transformative 2030 agenda The Sustainable Development Goals aim to build a universal integrated framework for action that reflects the economic social and planetary complexities of the twenty first century This book examines in detail the core characteristics of goal setting asking when it is an appropriate governance strategy and how it differs from other approaches analyzes the conditions under which a goal oriented agenda can enable progress toward desired ends and considers the practical challenges in implementation Contributors Dora Almassy Steinar Andresen Noura Bakkour Steven Bernstein Frank Biermann Thierry Giordano Aarti Gupta Joyeeta Gupta Peter M Haas Masahiko Iguchi Norichika Kanie Rakhyun E Kim Marcel Kok Kanako Morita M ns Nilsson L szl Pint r Michelle Scobie Noriko Shimizu Casey Stevens Arild Underdal Tancr de Voiturez Takahiro Yamada Oran R Young

Learning in Governance Katharina Rietig, 2021-08-24 An investigation of the role of learning and its impact on policy change as exemplified in European Union climate policy integration Although learning is often considered an important factor in effective environmental governance it is not clear to what extent learning affects decision making and policy outcomes In this book Katharina Rietig examines the role of learning understood as additional knowledge or experience that is taken into account by policymakers in earth system governance and policy change She does this by examining learning in European Union climate policy integration looking in detail at the examples of the Renewable Energy Directive its controversial biofuels component and the greening measures in the Common Agricultural Policy To examine how learning occurs in the policy process how to differentiate aspects of learning and under what conditions learning matters for policy outcomes Rietig introduces the Learning in Governance Framework applying it to analyze the EU examples She finds that policy outcomes are affected through leadership of policy entrepreneurs who use previously acquired knowledge and past experience to achieve outcomes aligned with their deeper beliefs and policy objectives She concludes that learning does matter in governance as an intervening variable and can affect policy outcomes

in combination with dedicated leadership by policy entrepreneurs who act as learning brokers Bargaining dominates the policymaking process among actors who represent the interests of different organizations Rietig s theoretical framework empirical studies and nuanced analysis offer a new perspective on the relevance of learning in earth system governance
