**Giving Voice to the Poor** Ruhul Amin, Maurice St. Pierre, 2002 The Focus In This Book Is On Poverty Alleviation In Two Relatively Underdeveloped Areas In Asia Namely Bangladesh And West Bengal In India *Hear Our Voices*, 2001

*Patient voices in Britain, 1840–1948* Anne Hanley, Jessica Meyer, 2021-09-07 Historians have long engaged with Roy Porter's call for histories that incorporate patients' voices and experiences. But despite concerted methodological efforts there has simply not been the degree and breadth of innovation that Porter envisaged. Patients' voices still often remain obscured. This has resulted in part from assumptions about the limitations of archives, many of which are formed of institutional records written from the perspective of health professionals. Patient voices in Britain repositions patient experiences at the centre of healthcare history using new types of sources and reading familiar sources in new ways. Focusing on military medicine, Poor Law medicine, disability, psychiatry and sexual health, this collection encourages historians to tackle the ethical challenges of using archival material and to think more carefully about how their work might speak to persistent health inequalities and challenges in health service delivery.

**from Many Lands** Patti L. Petesch, 2002 Voice and Laryngeal Disorders Sally K. Gallena, 2007-01-01 This interactive workbook style text highlights important concepts in the evaluation and treatment of voice and laryngeal disorders. It features 24 case studies for 11 disorders plus audio samples to help students and entry level clinicians become familiar with a broad spectrum of voice disorders, diagnostic report information and treatment plans. It is an ideal review tool for those seeking certification. Five sections cover Case Studies, Evaluation, Treatment, Learning Opportunities and Unsolved Case Studies to build clinician knowledge and practical skills. Speech disorders across the life span are detailed through overviews, efficacy data to support therapy techniques, case studies and pre and post therapy audio samples. Case Studies teach students to analyze and describe disordered voices and engage in diagnostic and treatment plan processes. Accompanying CD contains 30 audio samples of voice disorders, solutions to Labs and Unsolved Case Studies, electronic copies of evaluation forms and other resources to be used in the clinical setting. Clinical forms and templates are included for use in assessing and treating various speech disorders. Pediatric and adult unsolved case studies require students to solve problems, develop treatment plans and refine clinical writing skills via written summaries, recommendations and goals. Unsolved Case Studies encourage critical thinking, problem solving, assessment and clinical documentation skills essential for clinical practice. Addresses clinical competencies in voice resonance and alaryngeal speech as specified by ASHA Knowledge and Skills Acquisition KASA.
