web a reversible reaction is a reaction in which the conversion of reactants to products and the conversion of products to reactants occur simultaneously 1 a and b can react to form c and d or in the reverse reaction c and d can react to form a and b this is distinct from a reversible process in thermodynamics

web may 8 2017 after a time a reversible reaction in a closed system can reach what we call a dynamic equilibrium this is where the forwards reaction reactants reacting to produce the products and the backwards reaction products reacting to reform the reactants are occurring at the same rate

the equilibrium constant k article khan academy - Sep 04 2022

web all reactions tend towards a state of chemical equilibrium the point at which both the forward process and the reverse process are taking place at the same rate since the forward and reverse rates are equal the concentrations of the reactants and products are constant at equilibrium

equilibrium in reversible chemical reactions jack westin - Jun 01 2022

web in a chemical equilibrium the forward and reverse reactions occur at equal rates and the concentrations of products and reactants remain constant law of mass action the law of mass action links the rate of a chemical reaction as proportional to the concentrations of the reactants and products in a chemical reaction for a chemical reaction
