northern Vietnam The book shows that three primary socio economic dynamics have affected mangroves enclosure movements that have restricted access by different user communities over time such as the exclusion of women changing valuation of mangroves and their products and services and social and class differentiation caused by privatization of once common resources The result of these pressures have been erosions of norms rules and collective action to protect and nurture mangroves leading to widespread loss of coastal forests Sustainable mangrove management will require attention to these dynamics to address current day land conflicts The book will be of interest to policy makers practitioners and academics and students in forest policy management and governance rural livelihoods and globalization and agrarian change
